

The Public Group Chat

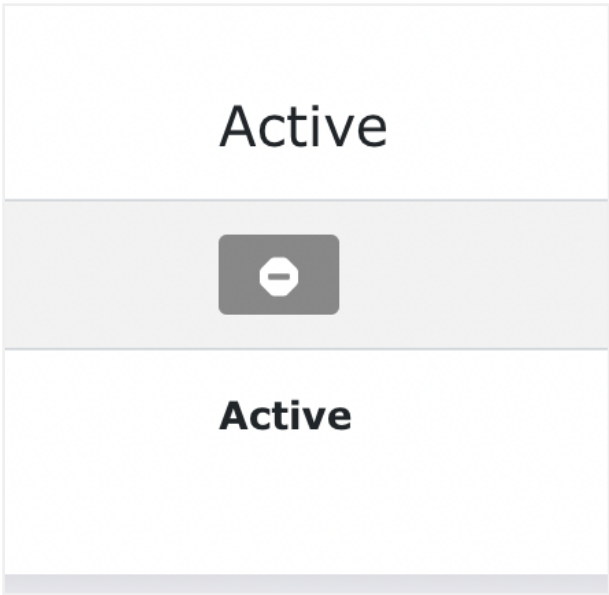

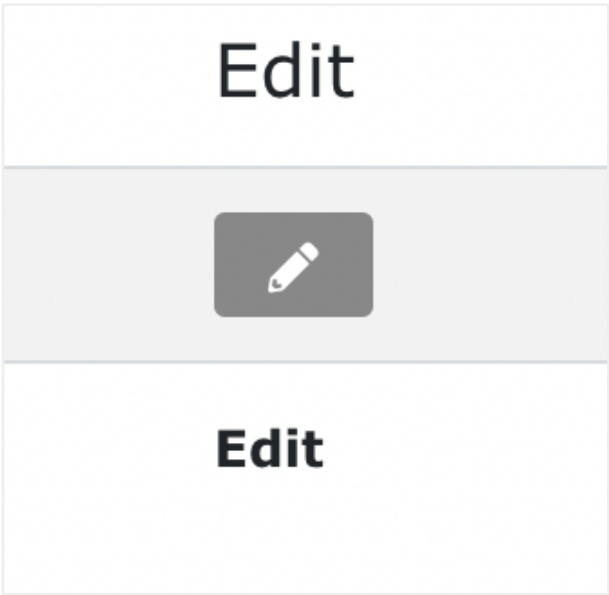

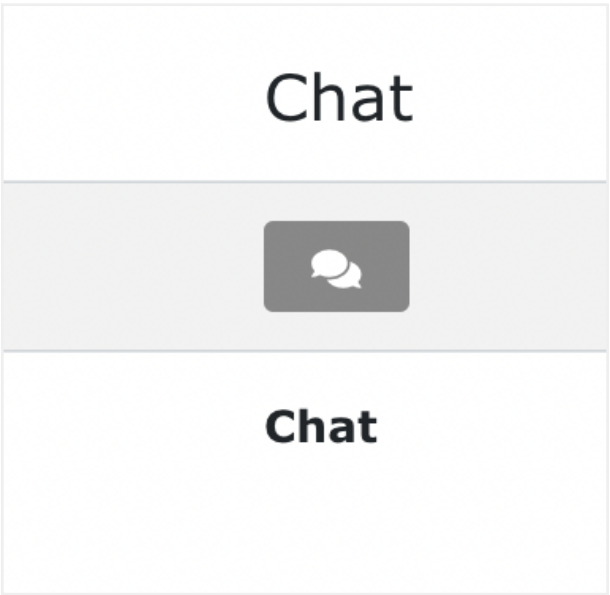

The public group chat page explained.

1 The public group chat gives you the option to have chat conversations with up to 50 visitors or members at the same time.

2 With the new chat widget form you can add another group chat with your custom settings. You can also set a password, that way only vip can enter the chat.

3 The table next to the form with list all existing group chats. With a click on the title you can go to the edit page and modify the settings of the group chat.

4 The quick link to open the group chat in a new tab. Make sure the group chat is active or nothing will happen (see number 6).

5 Instead of clicking on the title to edit the group chat settings you can also click on the edit icon.

6 The group chat is inactive by standard. The symbol above shows that the group chat is inactive. To have access to the group chat you will need to change the status to active, by clicking on the icon.
