Justshoppe WordPress Theme Documentation

This is documentation for justshoppe WordPress theme.

I would like to thank you first for buying the theme.

This theme is developed by [Bolvo.com](https://bolvo.com)

Lets get started...

Introduction

Steps to get help

1. Please check for the solution in appropriate page on This document, if not found please check on FAQ page on bottom of this page.
2. Please check online version of this document [here](#), there are chances I have updated it after you downloaded the theme.
3. Please browse/search here for more how-to: <https://kb.bolvo.com/> (There is not much content for now, but it will be added in future.)
4. Create ticket <https://bolvo.com/support/> (Do not forget to provide your themeforest purchase key for speedy reply.)

Thanks so much in advance for cooperation!

Best Practice to customize theme

Few style changes: If you only want to do few style changes, I suggest you to use Custom Css box in Appearance / Customise / Additional CSS. (this will override all other styles and it saves in database so it stays even if you update the theme)

Heavy style modifications: If you want to do heavy style modifications, I suggest you to use child theme instead. A blank simple child theme is supplied with your download in Resources folder. Just put your styles in style.css file of child theme.

Heavy customization: In case you are a developer and want to do heavy customization, again I suggest you use child theme. You can read more about child theme, here https://codex.wordpress.org/Child_Themes (Blank child theme is supplied with your Themeforest All Files Download.)

Installation

I assume you already know how to install WordPress, many Web-hosts provide 1-Click interface to install one of the Most popular CMS today, WordPress!

For detailed WordPress installation instructions visit http://codex.wordpress.org/Installing_WordPress

Uploading Justshoppe Theme

Before moving to installation, we first need to upload theme to WordPress. (Assuming you are logged into wp-admin already at this point). Here is what to do next...

- Download theme from Themeforest. Please download All **Files and Documentation** and Not *Installable WordPress files only*.
- Unzip that folder on your local PC/Mac
- Inside that folder, you will find a zip justshoppe.zip around 200KB - 5MB of size. (this is the WordPress theme)
- Go to your wp-admin dashboard, then go to Appearance -> Themes -> Add new, and upload justshoppe.zip, and then activate the theme.
- Immediately skip to below section please.

Installing Justshoppe Theme

The theme comes with 1-Click installer and demo setup, you only need to follow below simple instructions.

- After activating the theme, please go to Appearance/Install plugins to install few plugins, please install theme, and then activate them. (refer image 1 below)
 - Click on Dashboard link on Left bar, on the top. (We do this to trigger the plugins we just activated)
 - At this point, you might see Woocommerce setup wizard popup. If you do, Please skip this for now. (see image 5 below.)
 - Go to Appearance > Import Demo data (If you dont see this link, all required plugins are not activated yet then.) (refer image 3 below)
 - Follow easy on-screen instructions.
 - Thats it !
-

Note: If for some reason, menus does not get assigned automatically, please go to wp-admin/Appearance->Menus to assign menu. (refer image 4 below)

The above process is automatic and thus is technical. There are chances things might go wrong depending on your server's technical settings. Feel free to [contact us](#) if you have any trouble.

Now you should have Theme installed and setup just like demo. Now lets see how to edit things to match theme to your business.

Please also check FAQ section below for more answers.

Image 1 (referred above)

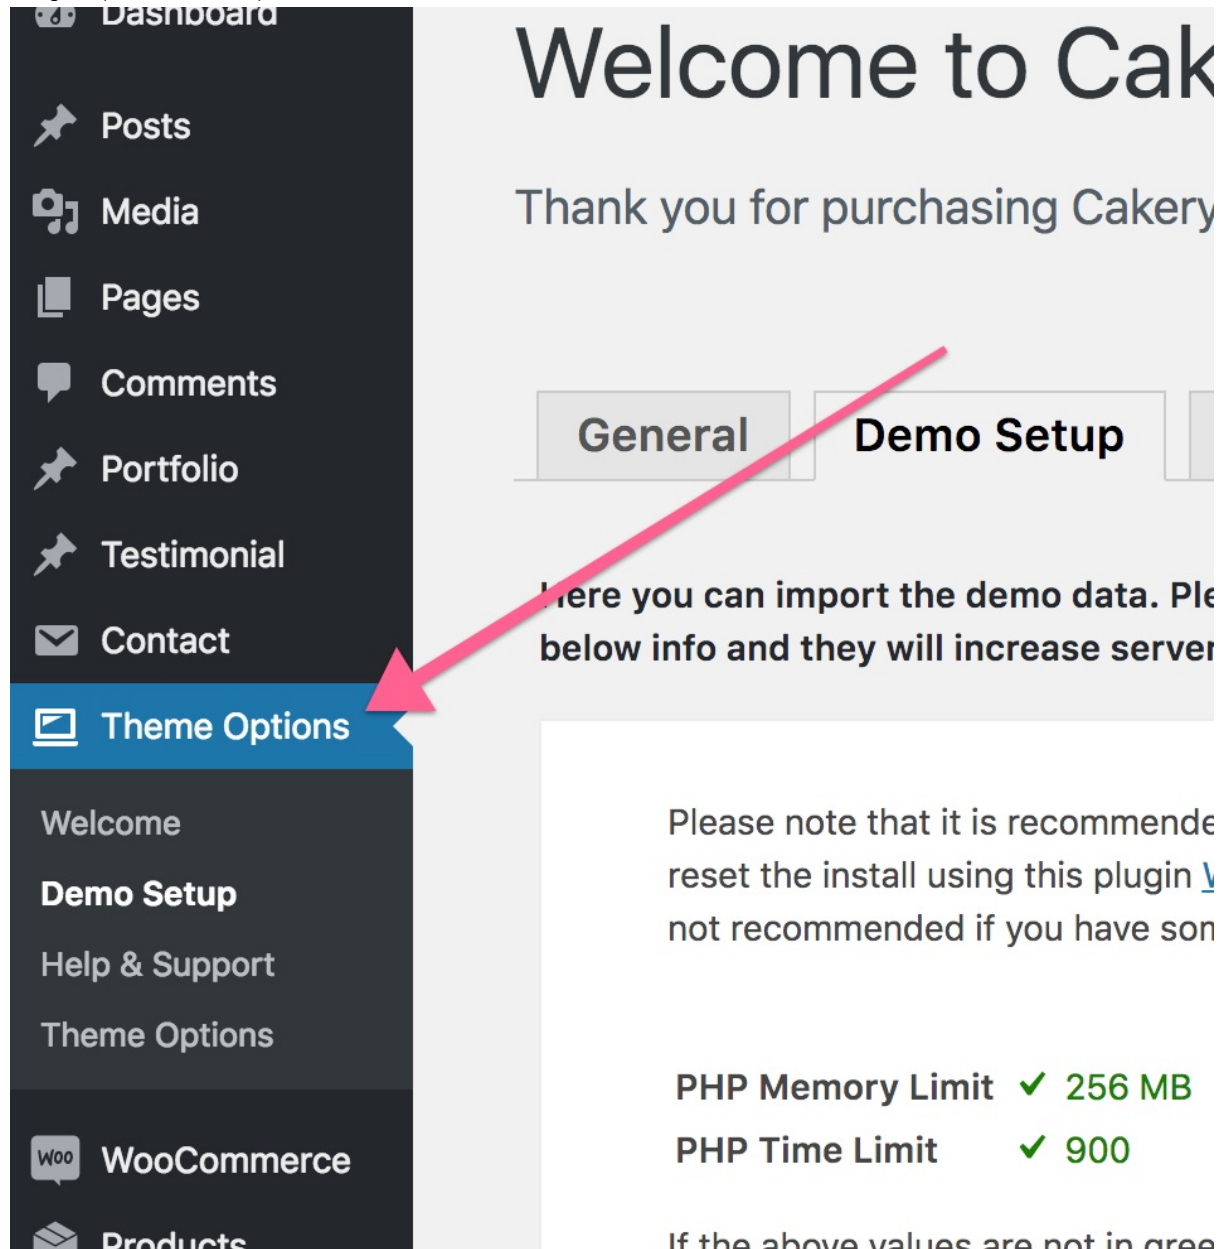

The screenshot shows the WordPress dashboard with the 'Appearance' menu highlighted in the left sidebar. The main content area displays a message about activating the Plumberx WordPress theme and a list of plugins. Annotations with arrows indicate the steps to install and activate plugins:

- Step 1: Select all plugins** points to the checkboxes in the plugin list.
- Step 2: Install all plugins** points to the 'Install' option in the 'Bulk Actions' dropdown menu.
- Step 3: Activate all plugins** points to the 'Activate' option in the 'Bulk Actions' dropdown menu.

The plugin list includes:

Plugin Name	Source
Demo Content	External Source
Plumberx Essentials	External Source
Visual Composer	External Source
Contact Form 7	WordPress Repository

Welcome to Cakery

Thank you for purchasing Cakery

General **Demo Setup**

Here you can import the demo data. Please follow the below info and they will increase server requirements.

Please note that it is recommended to reset the install using this plugin [if you have not](#) not recommended if you have some data.

PHP Memory Limit ✓ 256 MB

PHP Time Limit ✓ 900

If the above values are not in green, you need to increase them.

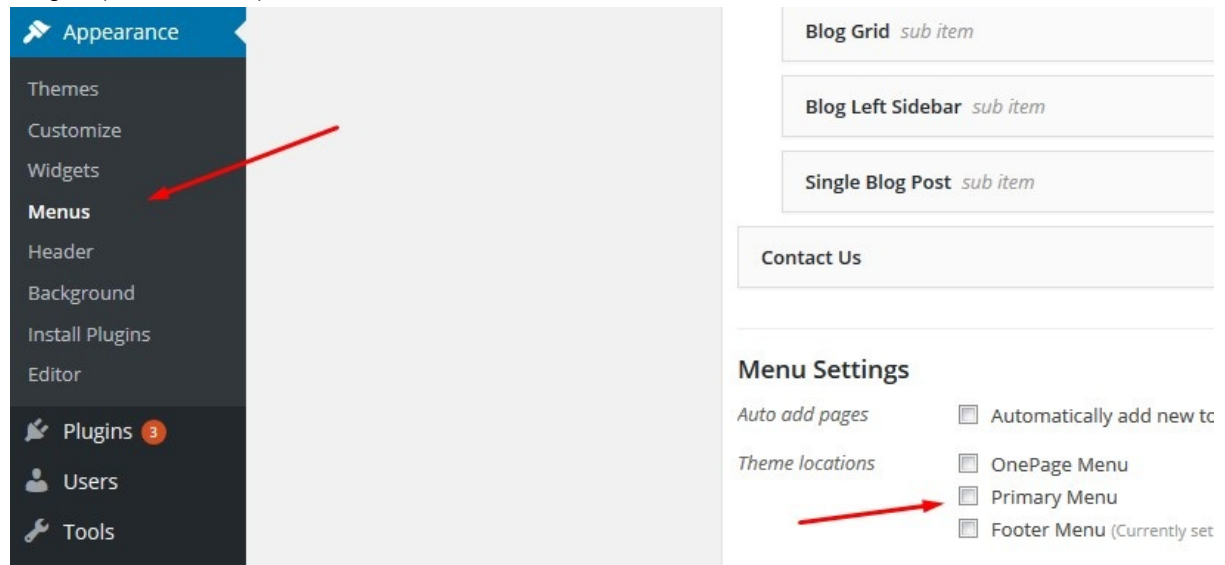

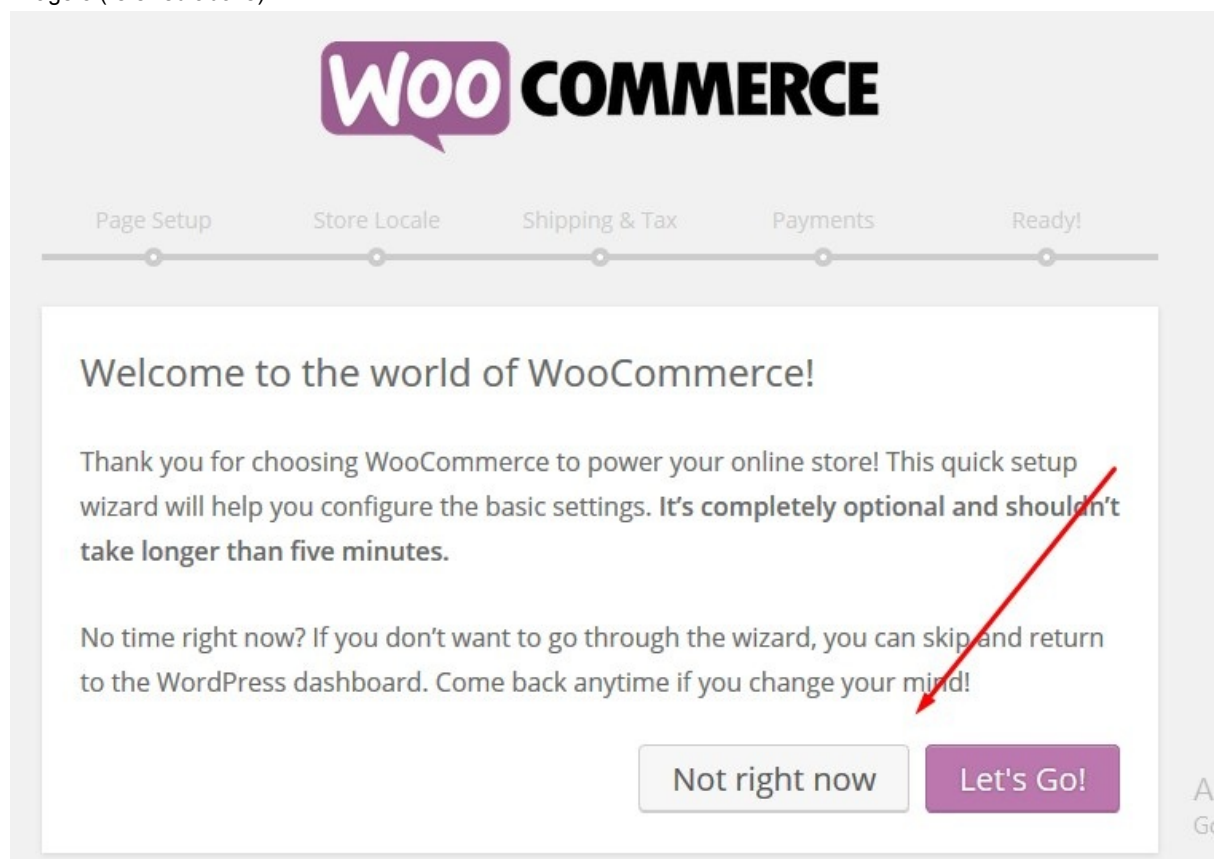

Image 5 (referred above)

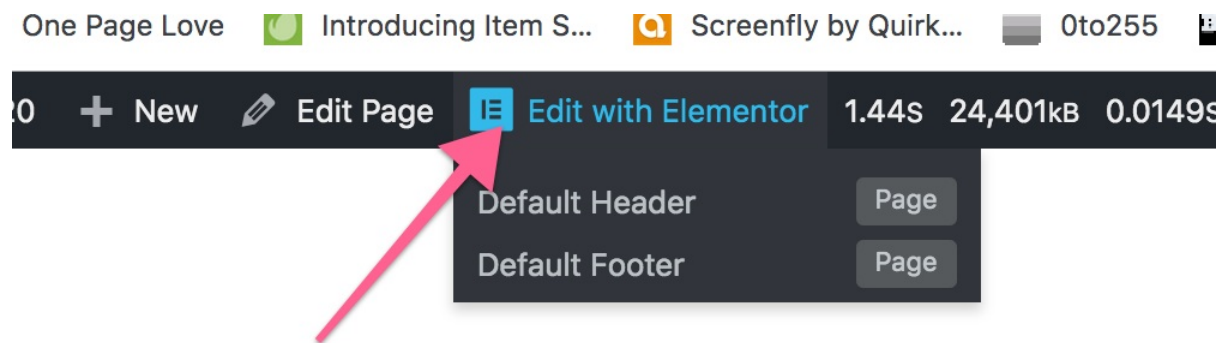

Page Builder

This theme is created with Popular Elementor Page Builder. Theme comes with over 50 custom modules as well. Its easy and fun to customise the website to your requirements.

Find out more about that plugin here <https://elementor.com/>

Here is quick start guide...

- To create/edit a page.. Log in as admin and Go to Pages (add new or edit) and then click Edit with Elementor.
Or you can also click Edit with Elementor from Top admin bar from front page if you are logged in as admin.(as shown below)

Note: If you need, Documentation for the plugin can be found here <https://elementor.com/support/>

Main Setup

Please follow the instructions ahead for the basic setups of the theme.

Header & Footer

(Below guide is written for Header mainly, but the exact steps applies for footer also.)

There are 2 ways to build the header & Footer in Justshoppe theme, and both ways provide full flexibility.

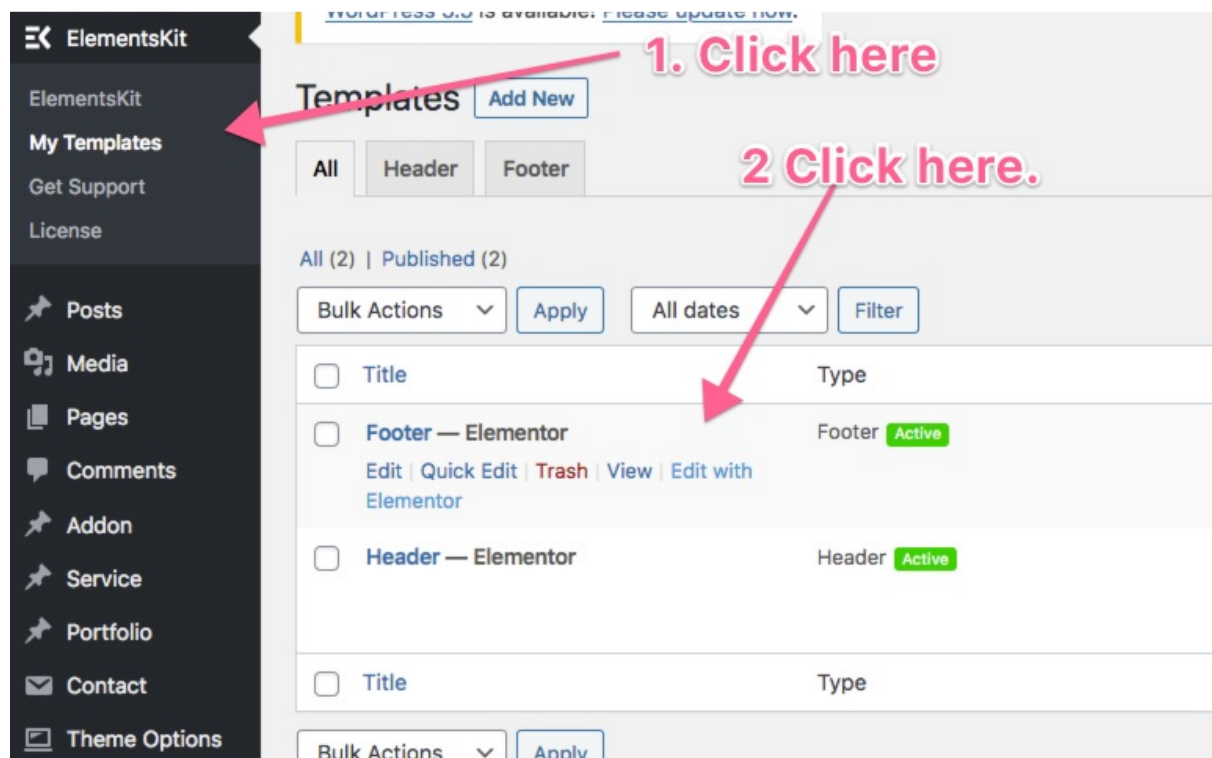

1) Using Customizer

2) Using Elementor.

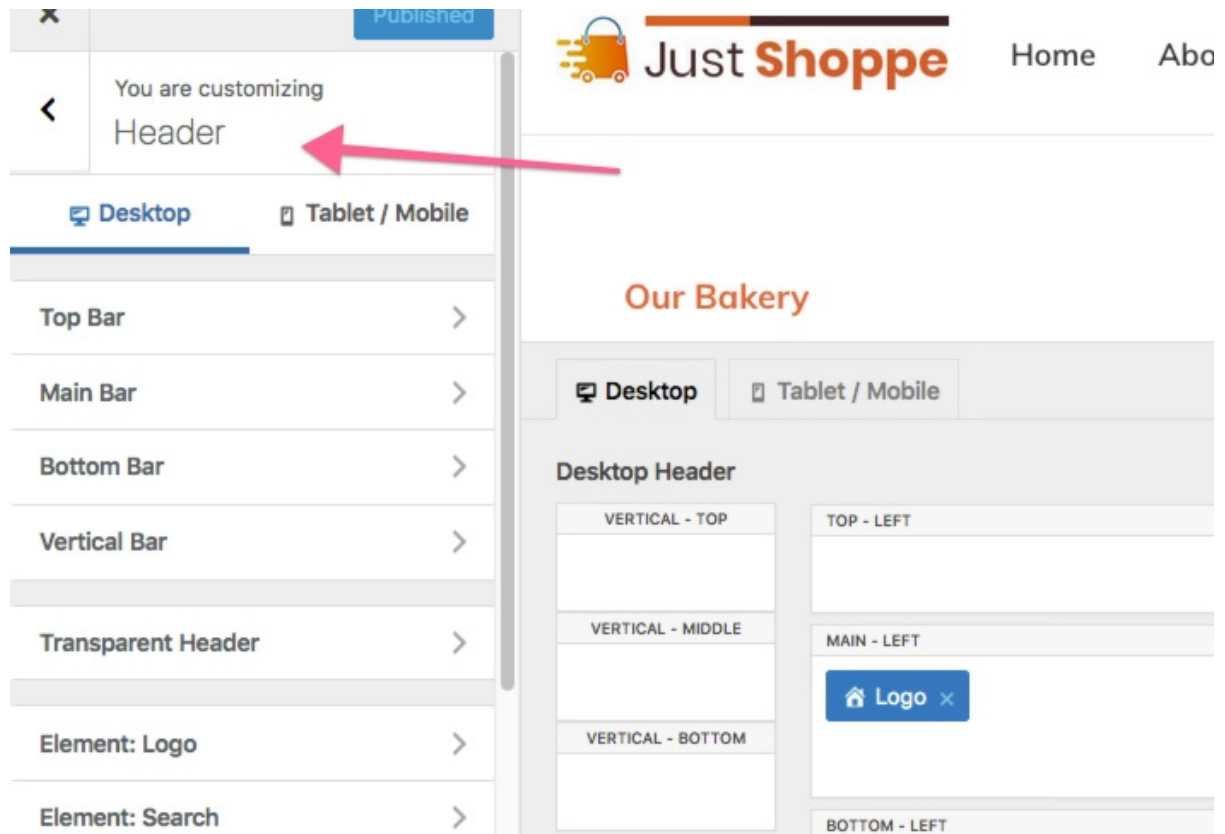

You can choose the way you prefer based on your personal choice. If you are not sure, Elementor is recommended because this way, you can edit full website using same page builder.

Here are the instructions to edit the header.

- Login as admin, and go to wp-admin/ElementsKit/Mytemplates, from there, edit the header with Elementor. As seen in the image 1 below.
- If you see no template in wp-admin/ElementsKit/Mytemplates, that means the header is built using Customizer(that too provide a lot of flexibility). To edit that, please go to wp-admin/appearance/customize/Header. As seen in image 2 below.
- After that you can edit as per on-screen instructions.

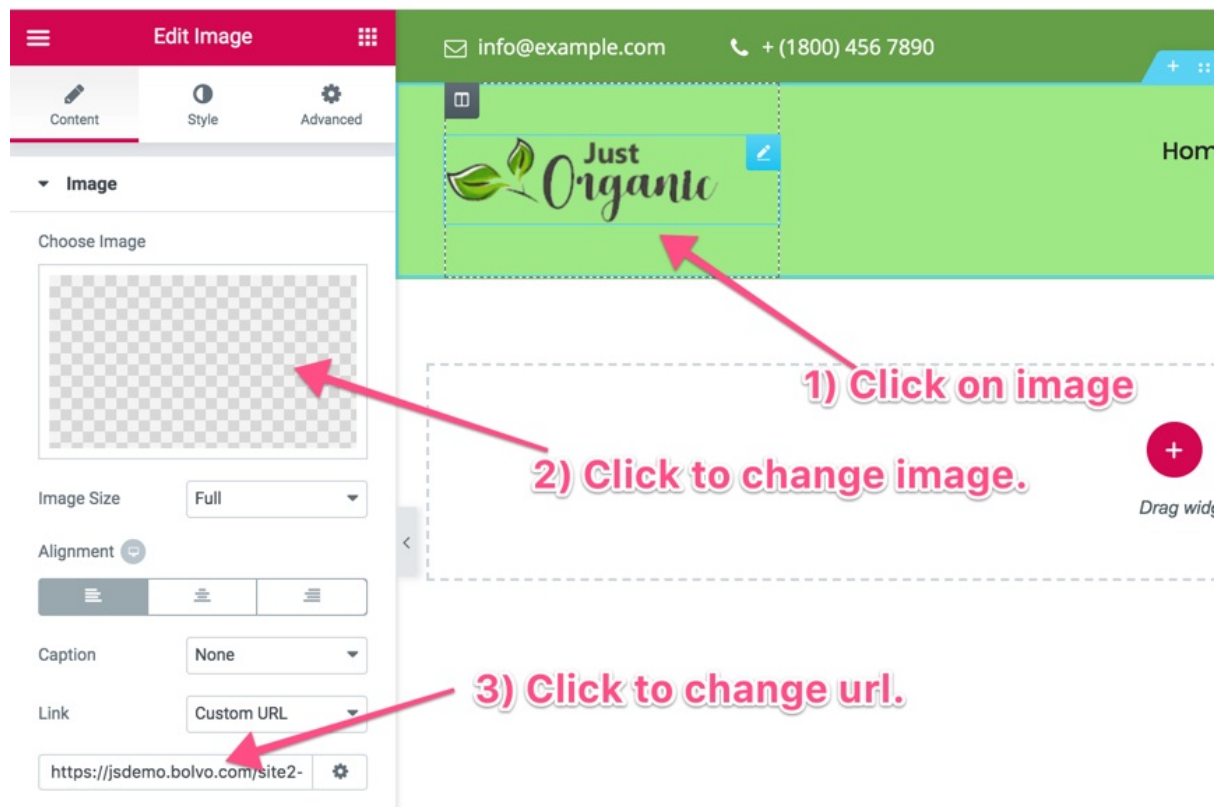

(Image 1: Login as admin, and go to wp-admin/ElementsKit/Mytemplates, from there, edit the header with Elementor.)

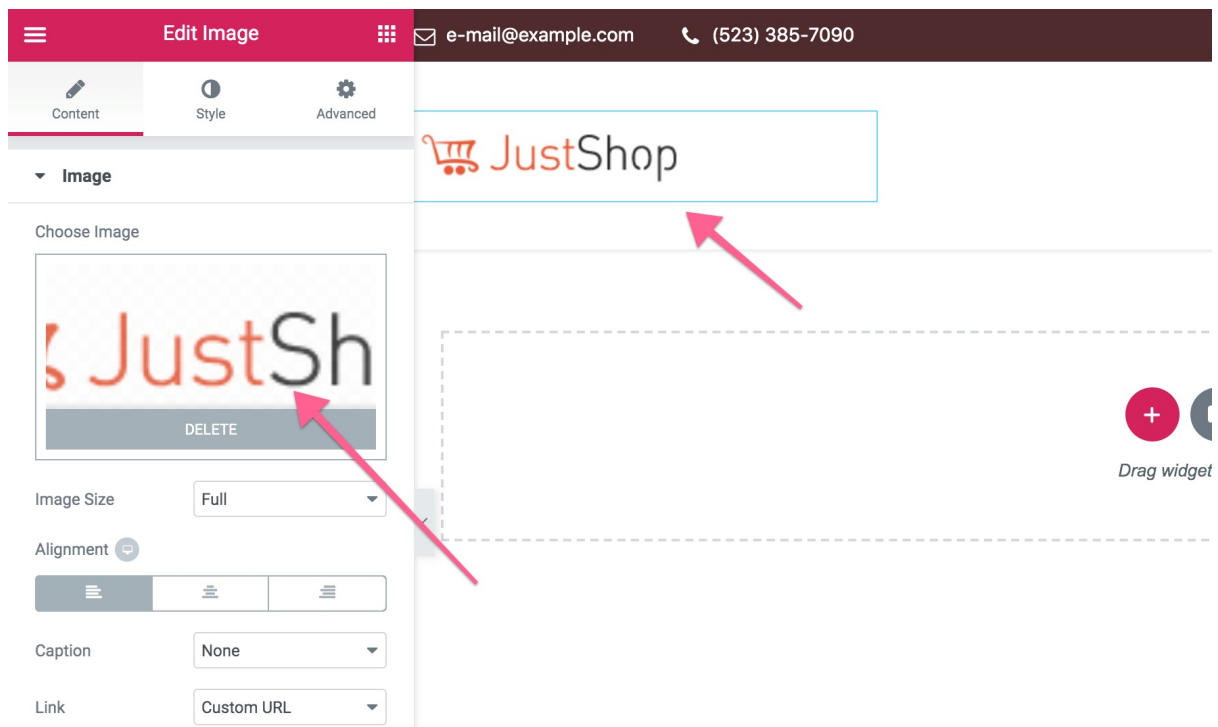

(Image 2: Customizer edit)

To update logo, please click on the logo image and update image and URL from the left panel.

Logo Setup

As Header is powered by Elementor in this theme, so to Edit the logo, just Edit the header as shown in previous article and you can point and click Header logo Image.

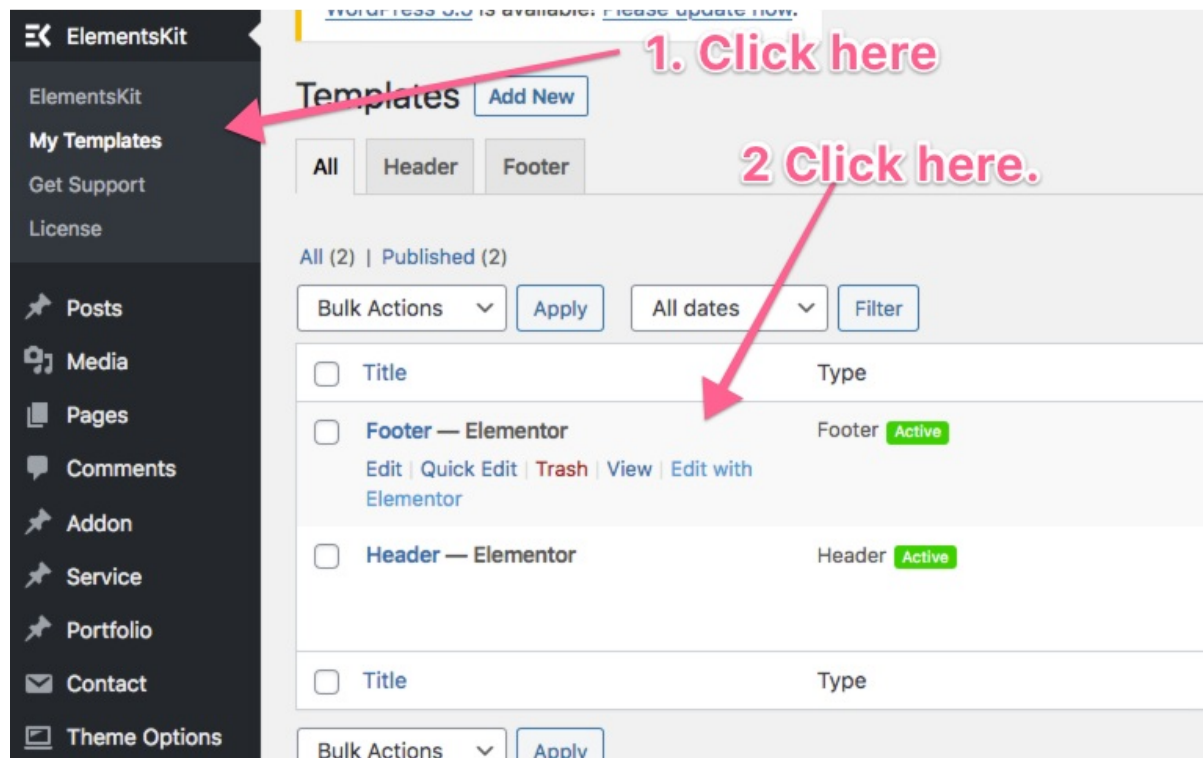

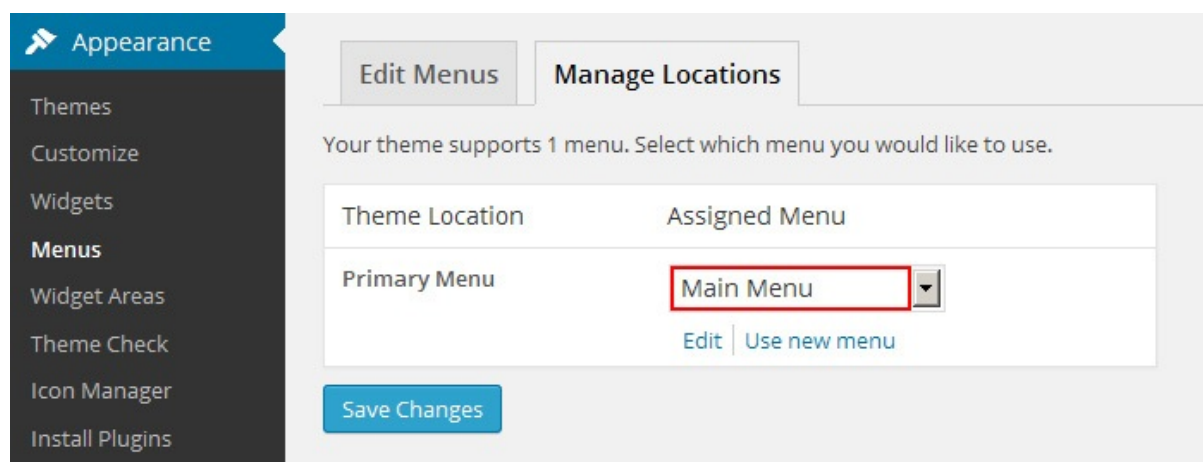

Menu

If importing went successful, you will see menu already. To Setup menu as per your need, please go through these steps:

1. Go to Appearance > Menus. You can edit or create your own menu and assign items to it.
2. Edit the Header as shown in previous article
3. Click menu to edit and select that newly created menu. You can also edit style if you want from left panel easily.

If you are totally new to WordPress, there are plenty of videos of Youtube you can refer to know more about WordPress menus.

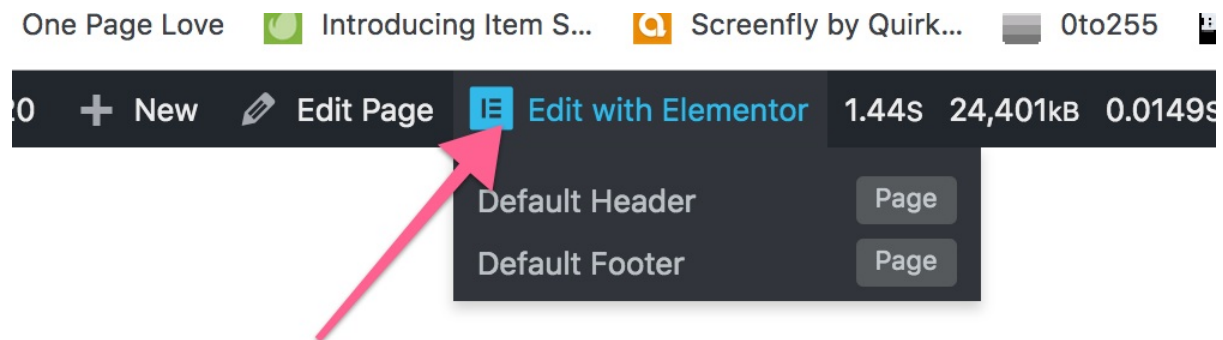

If you need help, please contact [support](#).

Pages

All pages are created with Elementor Page builder. So editing is as easy as point and click.

You can edit page from wp-admin/pages or you can also Edit any page directly from Front end by clicking Edit with Elementor menu on the Top.

Once you click the Edit button, the Elementor edit panel will load and you can point and click any element on page to see edit options on the left side. You can also edit some text by just clicking and start typing.

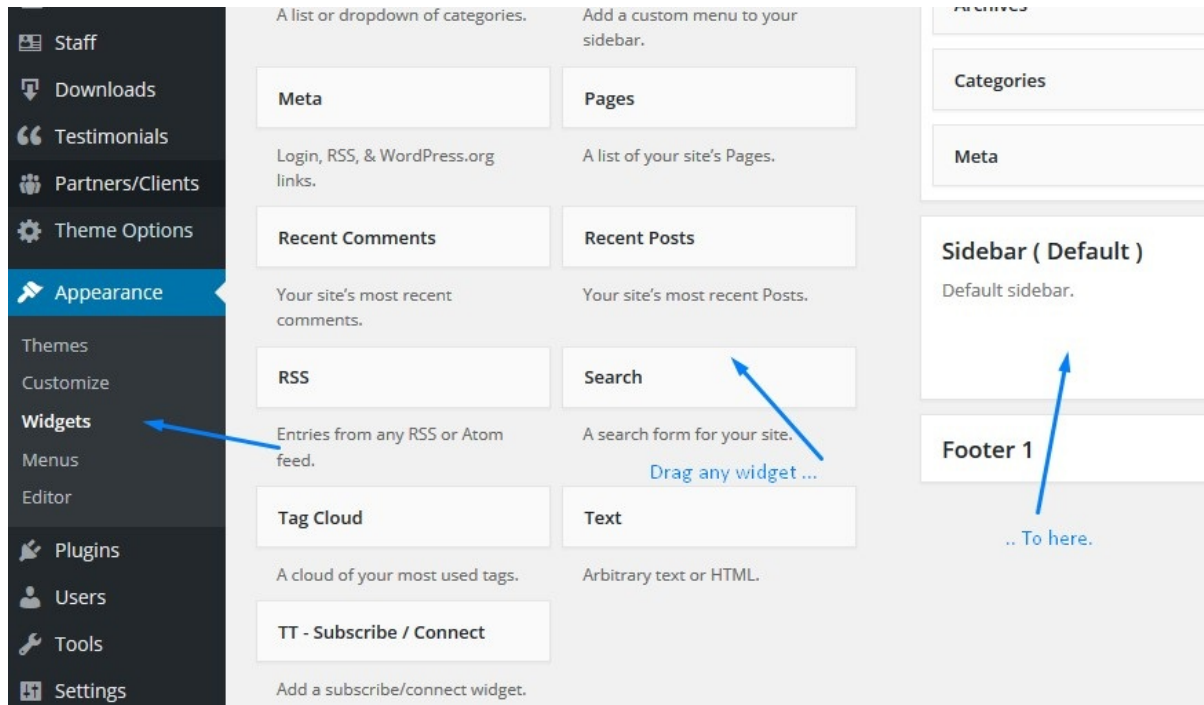

The screenshot shows the Elementor editor interface. On the left, the 'Content' tab is active, showing a 'Heading' widget configuration. The main canvas displays a live preview of a website for 'JustShop'. The website has a header with the 'JustShop' logo and 'Home' and 'About' links. Below the header is a large hero image of a chef. The 'Our Mission' section is visible, featuring a paragraph about baked goods and a list of services: Custom cakes, Birthday cakes, Wedding cakes, Birthdays, Weddings, and Euro.

If you need help, there is very large community for Elementor so Google your Youtube can help alot. After just 1 hour of learning curve you will start enjoying the Elementor a lot!

Sidebar & Widgets Management.

In this theme, you can choose to have sidebar.

To put Widgets in sidebar, please go to Appearance / Widgets and drag Widgets of your choice to Default Sidebar Widget area.

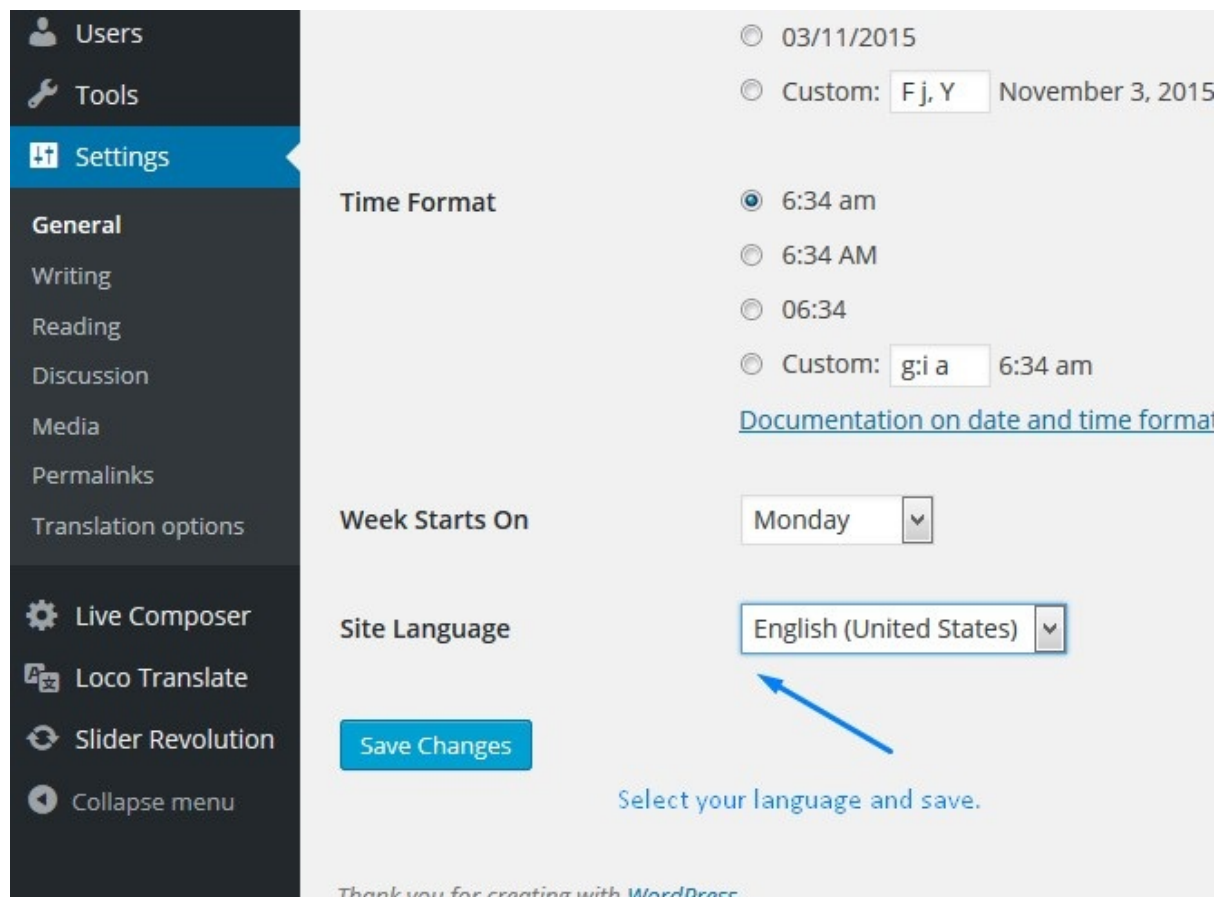

In this theme, there are more than one Sidebar areas. As you can see from below image, Every sidebar area has description that explains its significance. Please note that before placing widgets in Footer Columns, read Footer Article please.

Translation

The theme is translation ready and its very easy to translate it in your desired language.

Here are the steps.

1) Go to wp-admin/settings/general/ and Select your language.

2) Install and activate this plugin <https://wordpress.org/plugins/loco-translate/> (I am assuming you know how to install plugins, if you do not, please Google it.)

3) Once plugin is activated, you will find a new menu on left. Please go to Loco Translate -> Manage translations, and click on New language link of justshoppe theme. (Please disregard theme name in following screenshot, it was built for another theme. You can still follow the same steps.)

Select a plugin or theme to translate

Themes *Make sure you are working on the this theme.*

Package details	Translations (PO)	Template (POT)	File permissions
mylawyer 1 language Updated November 3, 2015 6:34 am	New language hi_IN : Hindi 0%	templatation.pot	Some files not writ

step 2: Click here, on next page, add your language.

Plugins *You can ignore this.*

Package details	Translations (PO)	Template (POT)	File permissions
Loco Translate 16 languages Updated November 3, 2015 6:15 am	New language nl_BE : Dutch (Belgium) 46% fr_FR : French (France) 92% de_DE : German 91% pl_PL : Polish 91% ru_RU : Russian 80% id_ID : Indonesian 90%	loco-translate.pot	OK

Step 1, click here

4) On next page, select your language, and click Start translating, on next page you will see list of all available strings and a box to enter their translation.

Source text:

Name of the template

Default Blog

Hindi translation:

Select your Language here.

Select string

Last step, save translation If you see green bar saying data saved. Then you are done!

Add that string's translation

Note that there are over 1000 strings, but you do not need to translate all of them, most of them are being used in Admin panel like in themeoptions etc and can be ignored as front user never see them.

So its recommended that you go through the front website and find and translate terms as needed. There should be under 100 strings that are required.

Once Saved in last step, if you do not see Green bar, and see some permission problems in saving data instead, then please contact your host about it, as its server file permission problem.

Theme Updates

Note : Its always recommended to backup your Website, Theme, Database before updating. You can use [this updraftplus plugin](#) to have regular backups of your Website.

Updating the theme is very easy.

You can go to Appearance / Themes and you will see a notification to update theme if you have entered a valid purchase code in Themeoptions/Welcome screen.

After updating the theme, just go to Appearance->plugins to update all plugins to their latest versions.

Frequently Asked Questions.

Question: Is there any online Knowledgebase ?

Answer: Yes, please find it at <https://bolvo.com> (There is not much content for now, but it will be added in future.)

Question: I have a question, how do I contact you ?

Answer: Feel free to contact anytime using <https://bolvo.com/support/> for any question, suggestion, feedback, or just saying Hi!

Question: I do not know how to install WordPress, what should I do.

Answer: There are number of tutorials online for installing Wordpress, you can also find Videos on Youtube for same. Apologies for inaccurate answer, but thats because its not part of Theme-support. Thanks for understanding in advance.
