1. Unzip the Product Zip file downloaded from Themeforest on your desktop.

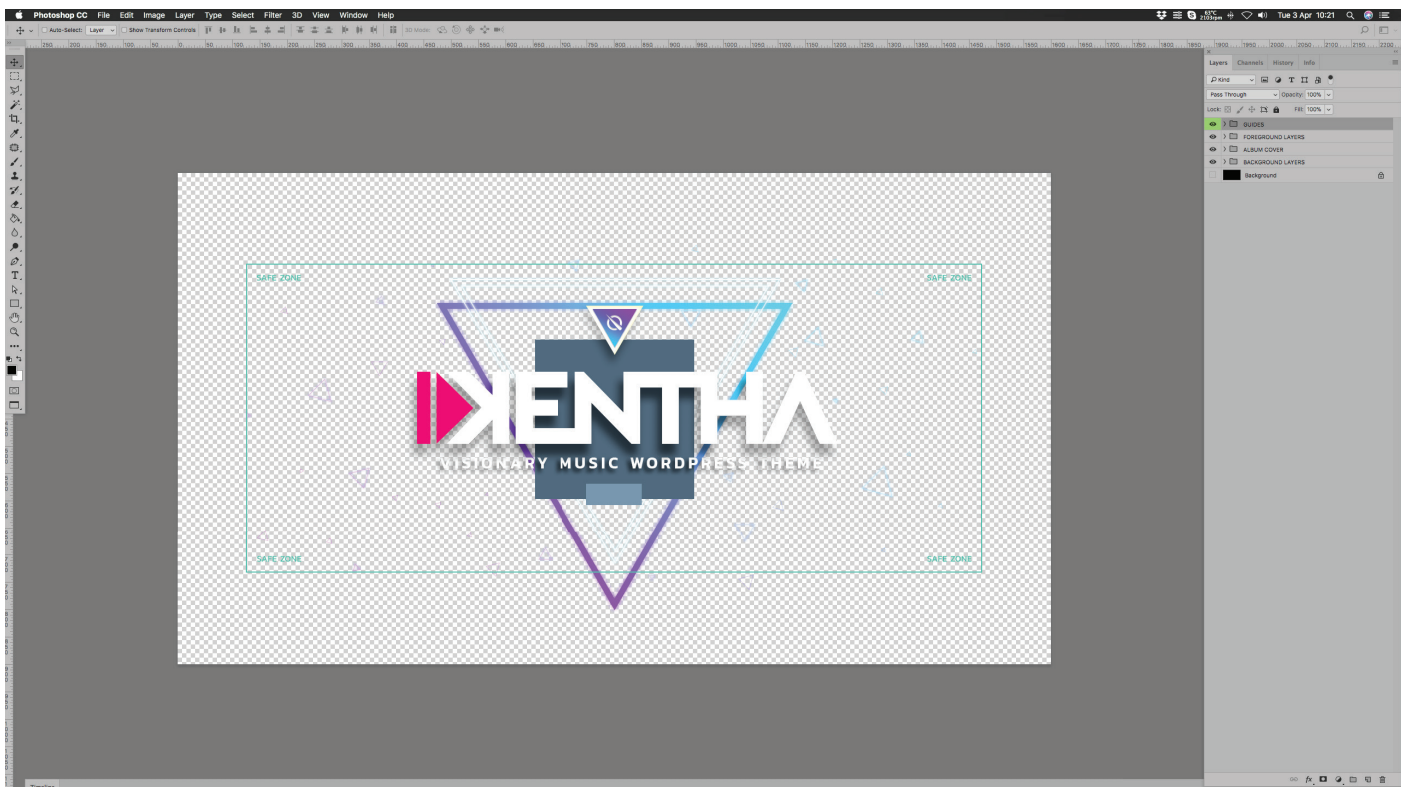

2. Open the folder **04. 3D RELEASE TEMPLATES** and choose a template

3. Inside each template, there are an editable PSD files and a folder containing all the png files already exported

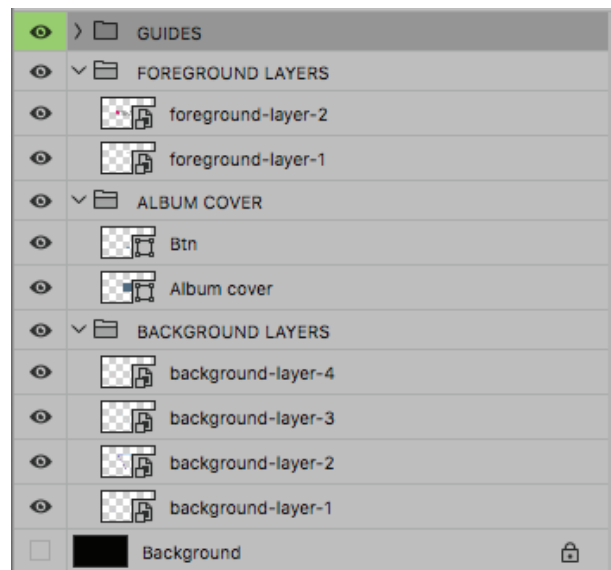

4. In order to edit the template graphic items, open the .psd file

The PSD includes:

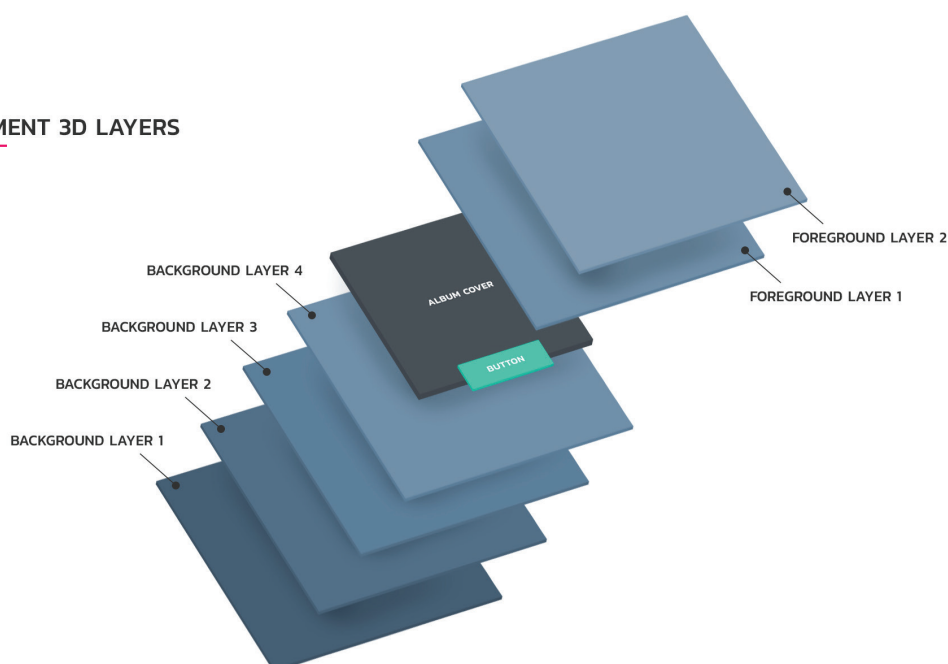

- **GUIDES**

You can use **GUIDES** and **ALBUM COVER** Groups as visual reference. They should not be exported with your final graphics. **FOREGROUND LAYERS** will be placed over the album cover, **BACKGROUND LAYERS** behind it.
