How to in Details

01. What are the Server Requirements to install the script?

Answer:

To install the script, the minimum server requirements are:

- Php version 8.2+
- MySQL 8.0+
- MariaDB 10.3+
- mod_rewrite Apache
- BCMath PHP Extension
- Ctype PHP Extension
- JSON PHP Extension
- Mbstring PHP Extension
- OpenSSL PHP Extension
- PDO PHP Extension
- Tokenizer PHP Extension
- XML PHP Extension
- ZipArchive Extension

On most servers, these extensions are enabled by default, but you should check with your hosting provider.

02. How to install the script?

Answer:

To install the script, follow the steps below.

- Extract the downloaded .zip file from codecanyon on your PC.
- **Upload** the Install.zip file to your server's **public_html** or any other directory where you intend to run the script.

- **Extract** the zip file in that directory.
- Create a new database from your server's **MySQL database**.
- Create a DB **user** for the database and link that **database** to the **DB user**.
- First, hit your **site URL** and it will automatically take you to the **installation**.
- Click on the **Start Installation Process**.
- You will see the **Checking File Permission** page. If everything is okay, then click on **Go to the next step**.
- Now you need to set the **Database Host, Database Name, Database Username, Database Password**, and click **Continue**.
- Now you need to **import the SQL file**.
- Now **fill up the information about the shop** and click **Continue**.
- Click on **Go to Home/ Login to the admin panel**.

03. How to activate the script?

Answer:

Following the given procedure below will activate the license for your domain, and you'll be able to use the script smoothly:

- Open the link in the browser <https://activeitzone.com/activation/>
- In the respective fields, put your Name, E-mail, **CodeCanyon Username, Purchase Key** and your intended **domain name** for the script.
- The form will be submitted to check the **purchase key** and then activate the **license** for that domain.
- You can change the **activation later** from this same form. Activating a **Regular license** again with another domain name will remove the activation of the **previous domain**.
- After activating the script you will find a **system key**. Now you need to use this **system key**. For using the **system key** please follow question **no 4**.

Instruction for activating purchase code

1. Make sure you have valid purchase code.
2. Make sure your CodeCanyon username is correct.

Active It Zone Product Activation

Your Name

Your Email

CodeCanyon Purchase Code

Where is My Purchase Code?

CodeCanyon User Name

Domain Name (example: www.abcd.com)

Site URL (example: https://www.abcd.com or https://abcd.com)

Activate

© AIZ

04. How to use the system key?

Answer:

Following the given procedure below:

- After activating the application you will get the **system key**. Use **copy** button to copy the **system key**

https://activeitzone.com/activation

Instruction for activating purchase code

1. Make sure you have valid purchase code.
2. Make sure your CodeCanyon username is correct.

Active It Zone Product Activation

Your Name

Your Email

CodeCanyon Purchase Code

Where is My Purchase Code?

CodeCanyon User Name

Domain Name (example: www.abcd.com)

Activate

Your domain is activated successfully! For security, this will be the last time we will display this code. Please use the copy button to copy the code and save it for future use. Check the documentation on how to use this code.

- Now you can follow the manual process to **set the system key**
 - Find the **.env file** from your **root project**

- Find the **SYSTEM_KEY** from the **.env** file (if you do not find the key then write the **SYSTEM_KEY**) and set the code that you copied from this site <https://activeitzone.com/activation> within a **double quote**.

You, 2 hours ago •

- The image shows an IDE with two panels. The left panel is the file explorer, showing a project named 'Active_eCommerce_flutter'. The 'lib' folder is highlighted with a red box. The right panel shows the 'app_config.dart' file. The code defines various configuration constants. Two lines are highlighted with red boxes: 'static String purchase_code = ""' and 'static String system_key = ""'. The code also includes comments for default language, HTTPS configuration, domain path, and API endpoints.

05. How to download the latest version?

Answer:

To download your item(s):

- **Login** to your **Codecanyon account**.
- Hover over your username from the top right corner and click '**Downloads**' from the drop-down menu.
- The downloads section displays a list of all the items purchased using your account.
- Click the '**Download**' button next to the item and select 'Main File(s)' which contains all files, or 'License Certificate and Purchase Code' for the item license information only.

06. How to upgrade to the Latest Version?

Answer:

You can **automatically update to the latest version from any of the past 10 versions**.

To **automatically** upgrade to the latest version:

- Go to **Admin > System > Update**, Upload the Update zip folder, and click on '**Update Now**' button and It's **Done!** The full system has been **updated** with a **single click**.

If your version is **older than the last 10 versions**, you need to update your system **manually**.

To **manually** upgrade to the latest version:

- **Extract** the **downloaded file** from codecanyon.
- There you will get a zipped folder named '**updates.zip**'. **Upload** that to the root directory on your server in which your previous version is running. **Unzip** that updates.zip file by selecting "**Extract here**".
- Then, run all the SQL files manually in order (starting with the version after your current one, up to the latest version) in your phpMyAdmin. Now **reload** the home page
**** Make sure to back up all your files and database before manual update, as lost data may not be recoverable.**

07. Where will I find the purchase code?

Answer:

- **Log into** your Envato Market account.
- Hover the mouse over your **username** at the top of the screen.
- Click '**Downloads**' from the drop-down menu.'
- Click '**License certificate & purchase code**' (available as PDF or text file).

08. How to import demo files?

Answer:

Demo files can only be imported during **Step 4 of the installation process**, where you will see **two options**:

- **Install with Demo Data :**
 - This will automatically import sample content such as the homepage layout, sample products, categories, brands, and some general settings.
- **Install without Demo Data :**
 - The script will be installed with a clean setup and no sample content. You can then manually configure everything according to your needs.

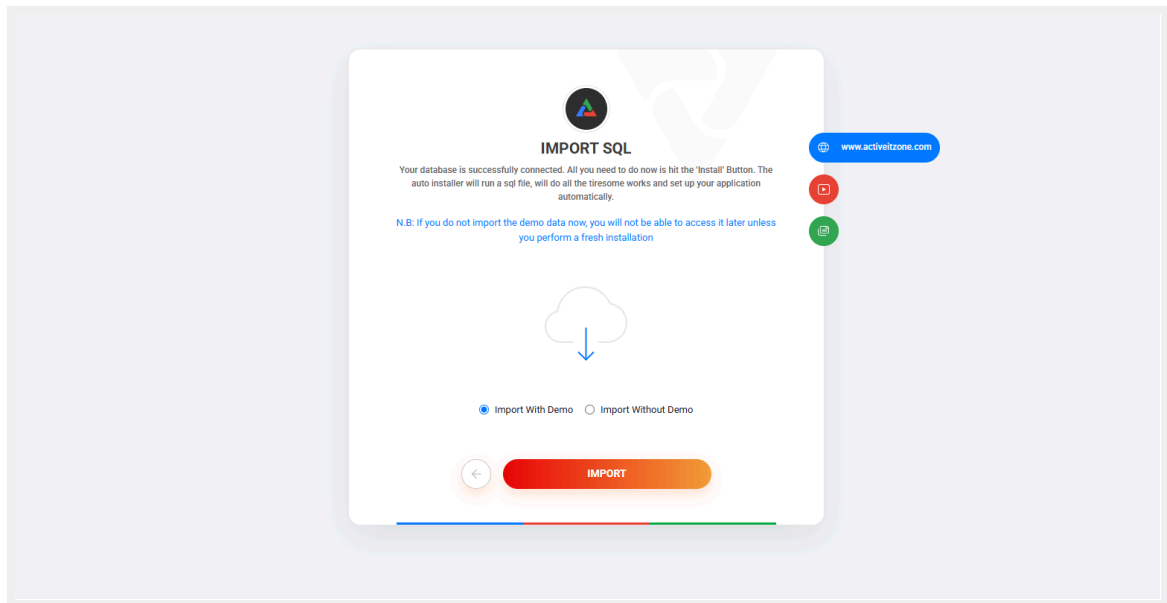

Figure (8a): Importing demo files

*****Please note that,**

- Make sure your server has matched all requirements.
- It may take some time to upload so do not close the browser or tab.
- If you do not import demo data during the step 4 of installation, you will not be able to access it later unless you perform a fresh installation.

09. How to upload products from admin?

Answer:

There are several steps to upload a product. Follow the instructions below:

- **Log in** as an **admin**
- Click on **All Products** from the left navbar.
- Then click on the **Add New Product** button.
- Or, click on **Add New product** from the left navbar
- Product information - Need to fill the required field with proper data one by one.
 - By clicking on the **General** part you can see the product information details

- Insert a **product name**.
- Select **multiple categories** and a **main** category.
- Choose a **brand** from the dropdown list.
- Insert the product **unit** like **pc, kg, ltr** etc.
- Insert the product **weight** in kg.
- Insert the product's **Minimum purchase quantity**.
- Input single/multiple words for product **Tags** and press enter.
- Input **Barcode**
- Enable or disable the **Refundable** switch.
- Write the **description** of the product. You can add any image or video in this description box.
- Enable/disable the **Featured** and **Today's Deal switch**
- Fill up the Flash Deal part
 - Choose the Flash title
 - Insert the discount amount
 - Choose the discount type
 - Fill up the VAT & TAX part
 - Insert the TAX amount and choose the TAX type
 - Insert the VAT amount and choose the VAT type
 - Now, **Click** on the **Save & Publish** button

Figure (9a): General part of product adding

- Now go to the **Files & Media** Section
 - Upload **Gallery images**- Preferable size **600 x 600**.
 - Upload the **Thumbnail image** - Preferable size **300 x 300**
 - Choose any video provider
 - Insert video link
 - Pdf upload option(if available).

- Now, **Click** on the **Save & Publish** button

The screenshot shows the 'Add New product' interface. On the left, a sidebar lists tabs: General, **Files & Media** (highlighted with a red box), Price & Stock, SEO, and Shipping. The main content area is titled 'Product Files & Media' and includes the following fields:

- Gallery Images (600x600)**: Includes a 'Browse' button and a 'Choose file' link. A note below states: 'These images are visible in product details page gallery. Use 600x600 sizes images.'
- Thumbnail Image (300x300)**: Includes a 'Browse' button and a 'Choose file' link. A note below states: 'This image is visible in all product box. Use 300x300 sizes image. Keep some blank space around main object of your image as we had to crop some edge in different devices to make it responsive.'
- Video Provider**: A dropdown menu currently set to 'Youtube'.
- Video Link**: A text input field with a note below: 'Use proper link without extra parameter. Don't use short share link/embedded frame code.'
- PDF Specification**: Includes a 'Browse' button and a 'Choose file' link.

At the bottom right of the form, there are two buttons: 'Save & Unpublish' and 'Save & Publish'. A red arrow points to the 'Save & Publish' button.

Figure (9b): Files & Media part of product adding

- Now go to the **Price & Stock** Section
 - You can choose **multiple colors** by enabling the switch.
 - Choose the **attributes** of this product and then input the values of each attribute.
 - Insert the **Unit price** of the product.
 - You can also give the discount date from the **Discount Date Range**.
 - Add product **discount**(if available then put the amount or if not available then just put zero). Select "**Flat**" or "**Percent**" from the right option and insert the **value**
 - **Fill the set point filed**
 - Insert the **quantity** of the product.
 - Insert the SKU (Unit of product quantity)
 - Insert the **External link** (if you want to put)
 - Insert the **External link button text** (this button will take you to the external link)
 - Insert the **Low Stock Quantity**

- Enable/disable any switch of Show stock quantity/ Show stock of text only/Hide stock
- Now, **Click** on the **Save & Publish** button

The screenshot displays the 'Price & Stock' configuration page for a product. The left sidebar contains tabs for 'General', 'Files & Media', 'Price & Stock' (highlighted), 'SEO', and 'Shipping'. The main content area is titled 'Product price + stock' and includes several input fields and toggle switches. The 'Stock Visibility State' section at the bottom contains three toggle switches: 'Show Stock Quantity' (checked), 'Show Stock With Text Only' (unchecked), and 'Hide Stock' (unchecked). At the bottom right, there are two buttons: 'Save & Unpublish' and 'Save & Publish', with a red arrow pointing to the 'Save & Publish' button.

Figure (9c): Price & Stock part of product adding

- Now go to the **SEO** Section
 - Write a title that will appear on a shared link.
 - Write a short description that will appear on a shared link.
 - Upload a single image
 - Then click on the **Save & Publish** button.

10. How to add a New Warranty ?

Answer:

To add a new warranty, please follow the steps outlined below:

- Log in as an administrator.
- Navigate to the "Products" section and select "Warranty" from the left sidebar.

In this section, you will find the warranty list and the form to add a new warranty.

- In the "Add Warranty" form, enter the warranty details, including text and logo, then click on the "Save" button."

Note: When adding or editing a product, you can select any of the previously added warranties.

The warranty details, along with any relevant notes, will be visible in the product details page.

11. How to Add a New Note?

Answer:

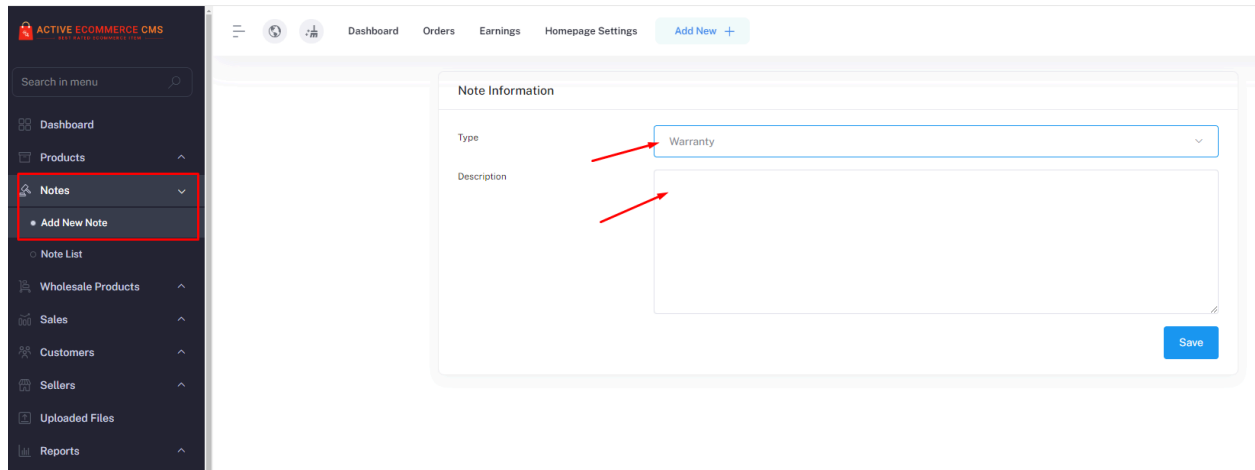

To add a new note as an admin, please follow the steps below:

1. **Log in with an Administrator account.**
2. **Navigate to the Dashboard** and select **"Note"** from the left sidebar.
3. Click on the **"Add New Note"** button.
4. In the **"Add New Note"** form, select the appropriate note type, enter the note description, and click **"Save"** to finalize the process.

Additionally, from the note list, the admin can enable **seller access permissions**. By enabling this option, the seller will be granted access to the admin's notes.

The screenshot displays the Active eCommerce CMS interface. On the left sidebar, the 'Note List' option is highlighted with a red box. The main content area shows the 'All Notes' page. At the top right, there is a purple 'Add New Note' button with a red arrow pointing to it. Below this, there is a toggle switch for 'Seller Can Add Note?' which is currently turned on. The main table lists six notes with columns for #, User, Type, Description, Seller Can Access?, and Options. The 'Seller Can Access?' column has toggle switches for each note, all of which are currently turned on. The 'Options' column contains icons for edit, delete, and a red icon.

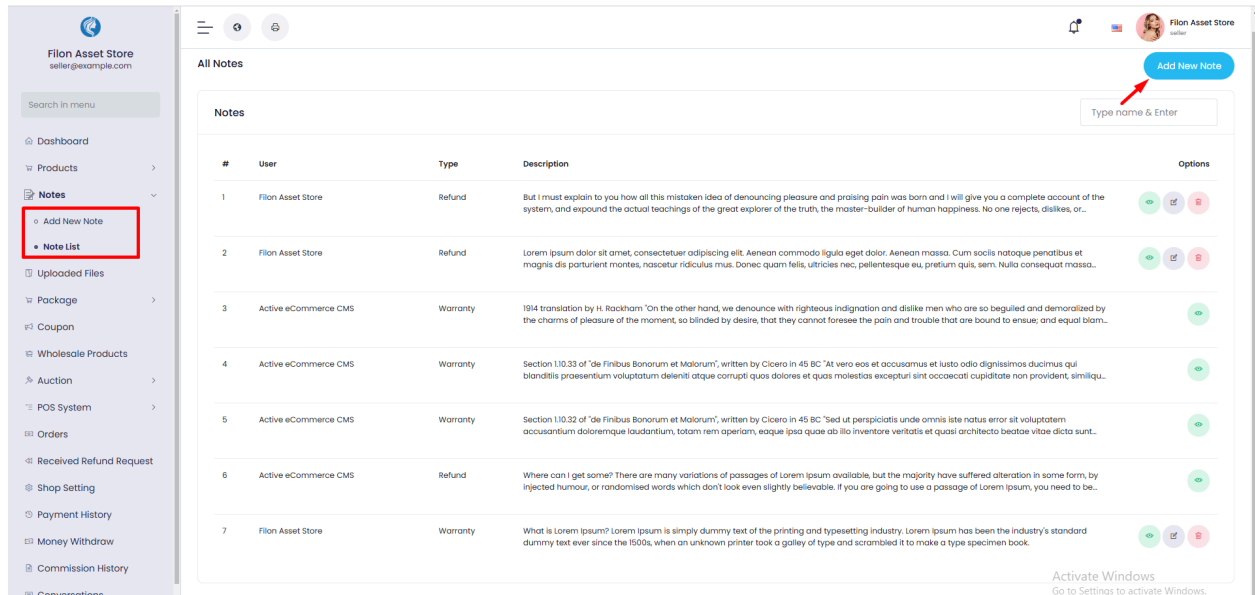

#	User	Type	Description	Seller Can Access?	Options
1	In-House	Refund	We're here to help make this process smooth and hassle-free. Based on our refund policy, we'll review your request and aim to process your refund within [X] business days. You will receive a confirmation email once your refund has been processed. This product has a [specified period, eg. 7-Day, 1-week] limited retur...	<input checked="" type="checkbox"/>	
2	In-House	Refund	Thank you for reaching out to us regarding your recent purchase. We're sorry to hear that the product didn't meet your expectations, and we completely understand your request for a refund.	<input checked="" type="checkbox"/>	
3	In-House	Warranty	We are committed to ensuring the quality and performance of our products. This product comes with a [specify duration, e.g., 5-year/6-months] limited warranty that covers defects in material or workmanship under normal use.	<input checked="" type="checkbox"/>	
4	In-House	Warranty	We are committed to ensuring the quality and performance of our products. This product comes with a [specify duration, e.g., 3-year/6-months] limited warranty that covers defects in material or workmanship under normal use.	<input checked="" type="checkbox"/>	
5	In-House	Warranty	We are committed to ensuring the quality and performance of our products. This product comes with a [specify duration, e.g., 2-year/6-months] limited warranty that covers defects in material or workmanship under normal use.	<input checked="" type="checkbox"/>	
6	In-House	Warranty	We are committed to ensuring the quality and performance of our products. This product comes with a [specify duration, e.g., 1-year/6-months] limited warranty that covers defects in material or workmanship under normal use.	<input checked="" type="checkbox"/>	

Please follow the formalized steps below to add a new note from the seller account:

1. **Log in to your Seller account.**
2. **Navigate to the Dashboard** and select **"Note"** from the left sidebar.
3. Click on the **"Add New Note"** button. (This option will be available if the admin has granted permission for adding new notes.)
4. In the **"Add New Note"** form, select the appropriate note type, enter the note description, and click **"Save"** to finalize the process.

Additionally, the seller will be able to access the admin's notes, provided the admin has granted the permissions.

12. How to become a seller?

Answer:

To become a **seller**, anyone has to **register his/her shop** first.

- From the below section of Active ecommerce CMS website > **Apply now**.
- Register your shop: **Your Name** > **Your Email** > **Your Password** > **Repeat Password** > **Shop Name** > **Address**
- Now, click **register your shop**.

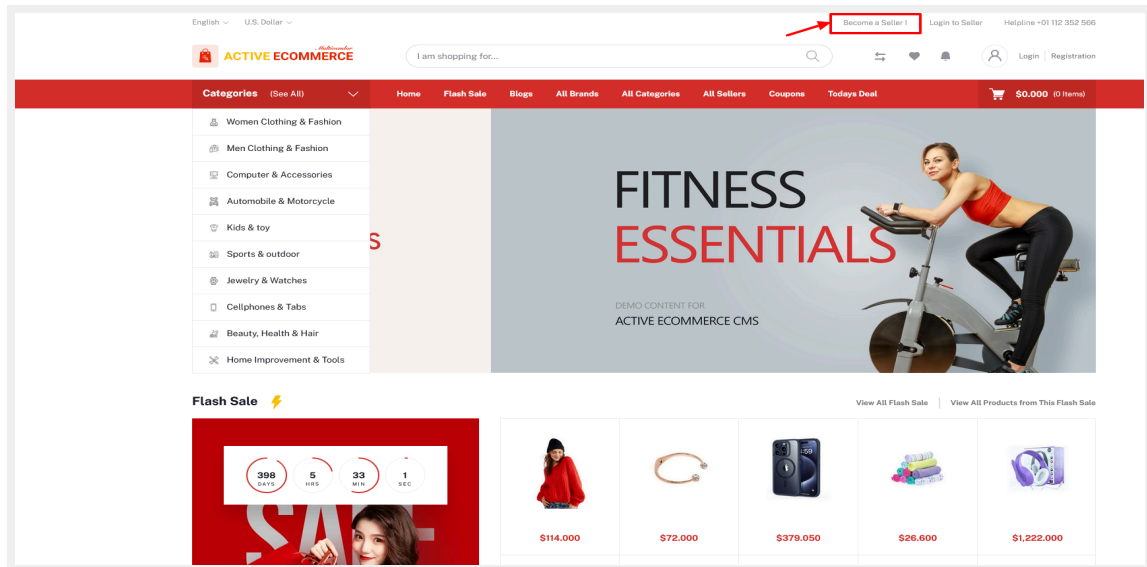

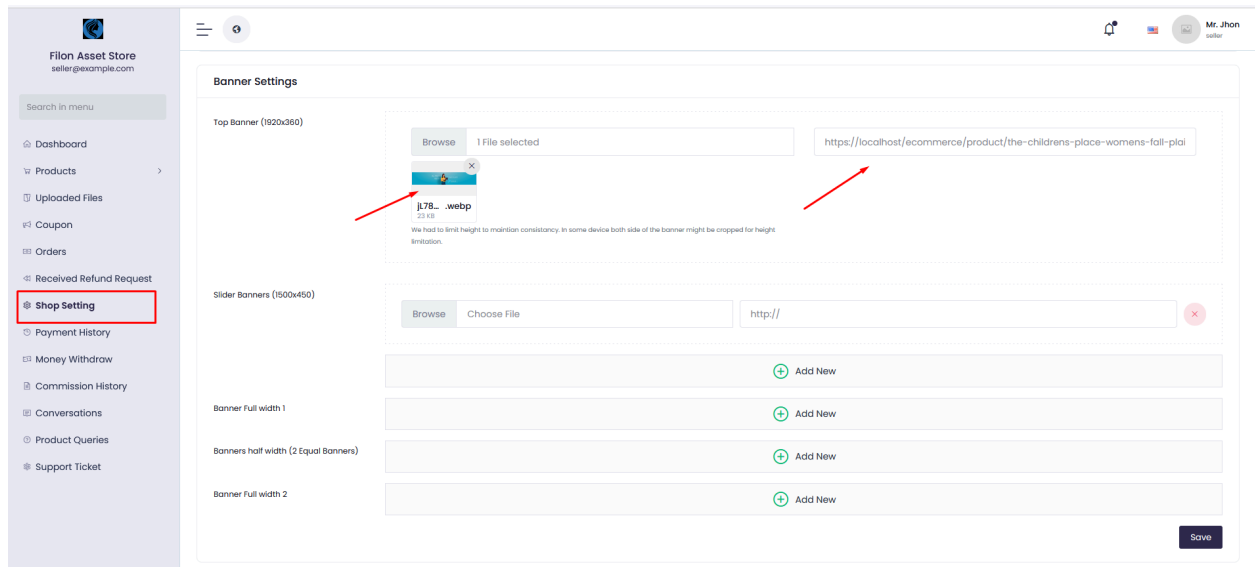

Figure (10a): Become a Seller.

13. How to add a Seller Banner link?

Answer:

Follow the below procedure:

- Log in as an **Seller**
- Go to **Seller Dashboard > Shop Setting**
- Click on **Shop Setting** from the left navbar.
- At first, add the Banner Check the right side to add the banner link:

14. How to add a seller from the admin panel?

Answer :

Follow the below procedure:

- **Log in as an admin**
 - Go to **Sellers > All Seller**
 - Click on the **Add New Seller** button
 - Now insert the information of a customer, insert the name and email address, shop name, and address. (The password will be sent to the mail address).
- **For sending the password in mail, the admin needs to configure the SMTP correctly.**

15. How does a customer register him/herself?

Answer:

To become a customer, anyone has to register themselves. Follow the procedure:

- From the top right side of homepage you can find login option, click on **Login**
- If you have already registered then you will just put your mail/phone and password and log in your panel.

- For register click on **Register Now** option
- Input Name, Phone/mail, password, confirm password, agree with terms & condition and click **Create account**.

Figure (12a): Customer register him/herself.

16. How to add a customer from the admin panel?

Answer :

Follow the below procedure:

- **Log in** as an admin
- Go to **Customers > Customer List**
- Click on the **Add New Customer** button
- Now insert the information of a customer, insert the name and email or phone. (The password will be sent to the mail address or phone no). ****For sending the password in**

mail admin needs to configure the SMTP correctly and for sending the password in phone number admin needs to configure the SMS properly from the OTP system.

17. How to upload products from sellers?

Answer :

Registered sellers will get product uploading options from their profiles. The steps are below,

- **Log in** as a **seller**.
- Go to the left navigation bar and click **Products**.
- Click **Add New Products** from the top navigation bar.
- Fill the text fields named **Product Name, Brand, Unit, Weight, Minimum Purchase Qty, Tags, Barcode**, enable or disable **Refundable** switch, **Image** (Main Images, Thumbnail Image), **Video** (Video From, Video URL)

18. How to set seller commissions?

Answer:

For setting up the fixed commission rate, follow the below instructions:

- First navigate to **Sellers > Seller commission** and then enable the **seller commission activation**. otherwise the options on this page will be disabled.
- Now select the **Fixed Commission Rate**, and click on **Save**.
- Set the **Fixed Commission Rate**, and click on **save**.

Figure (15a): Select & set the Fixed Rate Commission

- In this way you can set a fixed commission rate for sellers.

**** The commission rate(%) of Seller product price will be deducted from seller earnings.**

For setting up the Seller Based Commission Rate, follow the below instructions:

- First navigate to **Sellers > Seller commission** and then enable the **seller commission activation**. otherwise the options on this page will be disabled.
- Select the **Seller Based Commission Rate**, and click on **Save**.
- Now, click the '**Here**' link next to "If the Commission Type is Seller Based, set commission percentage" from the note section to set or edit the seller's commission directly.

Figure (15b): Choose the Seller Based Commission Rate

- After setting or editing the commission rate, click on **Save**
- In this way you can set different commissions for different sellers

**** The commission rate(%) of Seller product price will be deducted from seller earnings.**

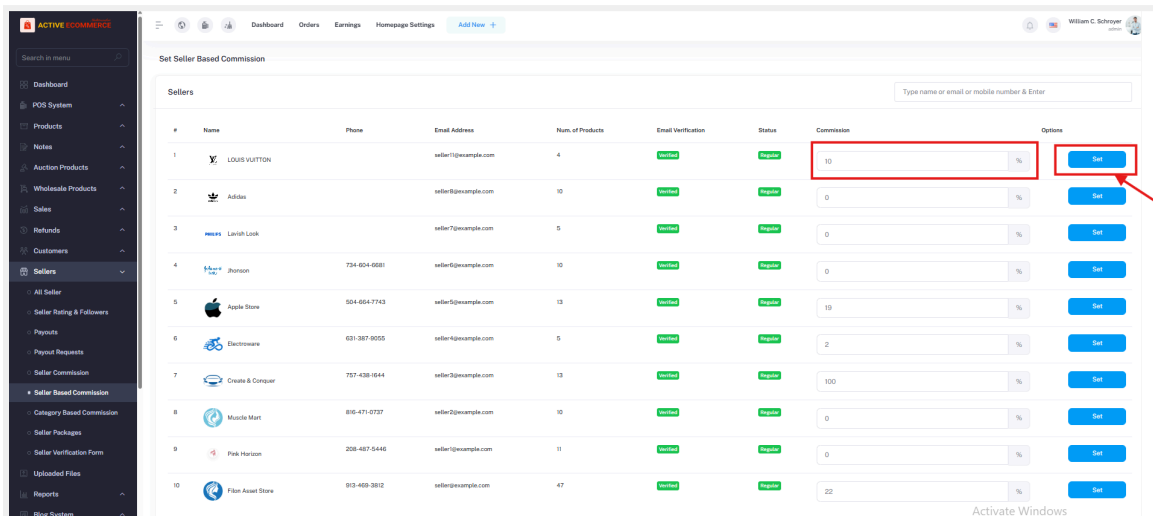

Figure (15c): Set the Commission

For setting up the **Category Based Commission Rate**, follow the below instructions:

- First navigate to **Sellers > Seller commission** and then enable the **seller commission activation**. otherwise the options on this page will be disabled.
- Select the **Category Based Commission Rate**, and click on **Save**.
- Now, click the '**Here**' link next to "If the Commission Type is Category Based, set commission percentage" from the note section to set or edit the category commission directly.

The screenshot displays the 'Seller Commission Activation' page in the Active eCommerce CMS. The sidebar on the left shows the navigation menu with 'Sellers' expanded and 'Seller Commission' selected. The main content area contains the following sections:

- Seller Commission Activation:** A section with a green status indicator, highlighted with a red box.
- Commission Type:** A section with three radio button options: 'Fixed Commission Rate', 'Seller Based Commission Rate', and 'Category Based Commission Rate'. The 'Category Based Commission Rate' option is selected and highlighted with a red box.
- Withdraw Seller Amount:** A section with two input fields for 'Minimum Seller Amount Withdraw' and 'Minimum Seller Amount Withdraw', each with a 'Save' button.
- Note:** A section with three numbered instructions. The third instruction, '3. If the Commission Type is Category Based, set commission percentage Here', is highlighted with a red box.

Figure (15d): Choose the Category Based Commission Rate

- After setting or editing the commission click on **Save**
 - In this way you can set different commissions for different categories
- **The commission rate(%) of Seller product price will be deducted from seller earnings.**

20. How to translate product information in multiple languages?

Answer:

To translate product information for bulk products from admin, follow the below steps:

- From the admin panel navigation, go to the **Products list**.
- From the product list, click on the **edit** icon.
- Your product is right now in the default language, to translate it into another language click on your required language.
- Translate your product's **name**, **unit** and **description**. (Other information is not translatable)
- Click on **Save**.

Figure (17a): Translate product information into multiple languages

21. How to purchase products?

Answer:

There are two ways to purchase any product. You can purchase any product by clicking on the “**cart**” icon on the product box, or you can “open the product in a new tab”.

- Direct purchase without entering product details page
- Select the **cart** icon.
- A pop-up will appear with a quick view of the products.
- Select options(if available) & quantity.
- Click on **Add to cart**.
- A pop-up will appear with 2 buttons **Back to shopping & proceed to checkout** and select **proceed to checkout**.
- Your cart page will be available with an order summary. If have any coupon then apply the coupon and then click on the **Proceed to Checkout**
- If you are a registered user then **name & email address** will be available there in shipping address. Insert **address, address, city, postal code & phone number** then below you can see the **delivery information**, choose the **delivery type** from here, In that page you can find the payment option, select any **payment type**, and click on **Complete Order**.
- After clicking on **complete order** customer can get the order confirmed page and see the order details

Purchase from product details page

- Click on the product title and you will be redirected to the product details page.
- From here you can check & select the product's all info and add it to the cart.
- You can also add this product to the wishlist or **compare** list.
- To proceed with the purchase follow the above steps.

41. How to configure the SMTP system?

Answer:

To configure the SMTP system follow the steps below:

- If you're using cPanel then follow this link
 - <https://blog.cpanel.com/setting-up-and-troubleshooting-smtp-in-cpanel/>
- Create an email from your server panel
- After creating an email account, go to Active eCommerce admin **Dashboard > Setup And Configuration > SMTP settings**.
- Fill up the form as below:
 - **MAIL DRIVER:** SMTP
 - **MAIL HOST :** your domain SMTP host (sample: smtp.yourdomain.com)
 - **MAIL PORT:** 587/465
 - **MAIL USERNAME:** Your email id
 - **MAIL PASSWORD :** Your email password
 - **MAIL ENCRYPTION:** ssl/tls

- **MAIL FROM ADDRESS:** Your mail address
- **MAIL FROM NAME:** Your shop name

Figure: (38a) SMTP Setting

42. How to configure Facebook login API?

Answer:

To configure facebook login api follow the steps below:

- **Log in** to <https://developers.facebook.com> using facebook email and password.
- Click on **My App** and then click the **Add New App**.
- Give the name of the app and then click on **Create App ID**. It will automatically redirect to the App dashboard.
- Then go to **Settings > Basic**.
- Set the App Domains and click on **Save Changes**.
- Get the **App ID** and **App Secret**.
- Now click on **Products** and select **Facebook login**.
- It will redirect you to Quick Settings.
- Select **Web** and give your **site url** and click **Save**.
- Go to **Facebook login > Settings**.

- Set the Valid OAuth Redirect URIs
(example: <https://example.com/social-login/facebook/callback>) and click on Save.
- Now go to **Active Ecommerce admin Dashboard > Setup & Configuration > Social media login** and set the App ID and App Secret in Facebook Login Credential.
- Click on **Save**.

43. How to configure Facebook pixel?

Answer:

Follow the below steps:

- **Login** to your **admin panel**.
- Then go to the left navigation bar and click **Setup And Configuration> Google > Analytics Tool** .
- Turn **on** the switch of facebook pixel
- Then fill the field with Pixel ID.

For getting your pixel id please follow the steps.

- **Log in** to **Facebook** and go to your **Ads Manager account**.
- Open the **Navigation Bar** and select **Events Manager**.
- Here you'll find your pixel ID.

Figure: (40a) Facebook pixel configure

44. How to configure google login API?

Answer:

To configure google login api follow the steps below.

- Go to <https://developers.google.com/identity/sign-in/web/sign-in>.
- Click on **Configure A Project**.
- Give your **project name** and click **next**.
- Give your **product name** and click **next**.
- Configure OAuth client by selecting the **web server** and give your **Authorized redirect URIs** (example: <https://example.com/social-login/google/callback>) and click on Create.
- Then you will get the **Client ID** and **Client Secret**.
- Now go to **Active e-commerce CMS admin Dashboard > Setup & Configuration > Social media login** and set the Client ID and Client Secret in Google Login Credential.
- Click on **Save**.

45. How to configure Twitter API?

Answer:

To configure the Twitter login API follow the steps below.

- Go to <https://developer.twitter.com/en/apps>.
- Click on **Create An App**.
- Fill in your application details.
- The callback URL will be <https://example.com/social-login/twitter/callback>
- After creating the app follow the steps to get the consumer key & consumer secret key.
- Now go to **Active ecommerce CMS admin Dashboard > Setup And Configuration > Social media login** and set the **consumer key** as **Client ID** and **consumer secret key** as **Client Secret** in Twitter Login Credential.
- Click on **Save**.

46. How to configure Apple login API?

Answer:

To configure Apple login, follow the below steps

- From dashboard go to this link <https://developer.apple.com/account/resources/identifiers/list/bundleId> to create identifier
- From the left nav choose Identifiers and App IDs.
- Click on the plus(+) icon to create identifier

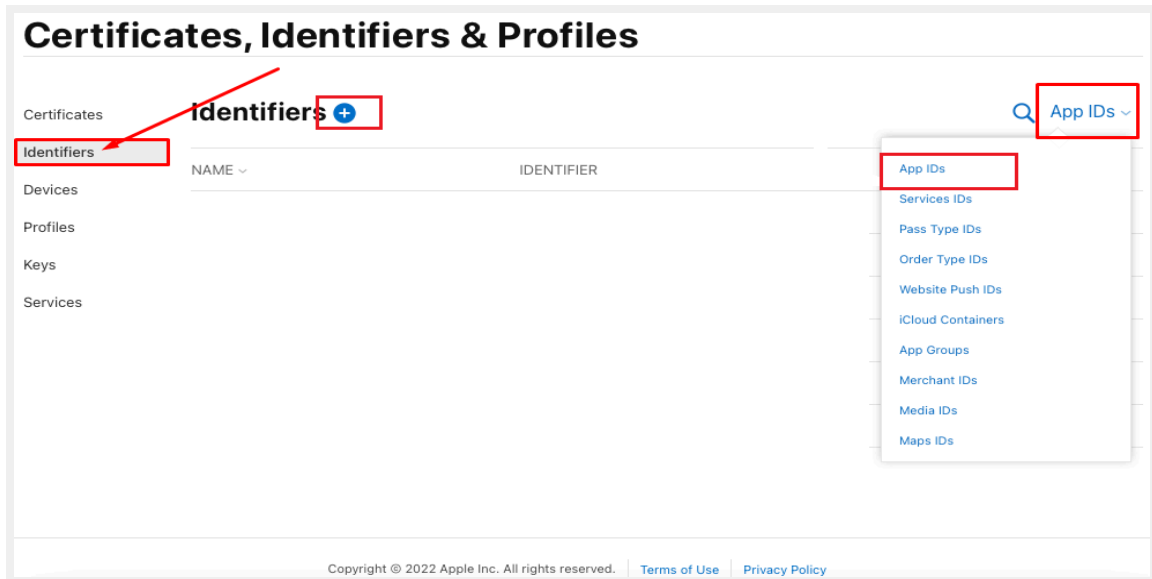

Figure: (43a) Configure Apple login API step 1

- Set the Description and Bundle ID, and select the Sign In with Apple capability
 - Usually the default setting of "Enable as a primary App ID" should suffice here. If you ship multiple apps that should all share the same Apple ID credentials for your users, please consult the Apple documentation on how to best set these up.

Figure: (43b) Configure Apple login API step 2

- Choose **Sign in with Apple**
- Click **Continue**, and then click **Register** to finish the creation of the App ID

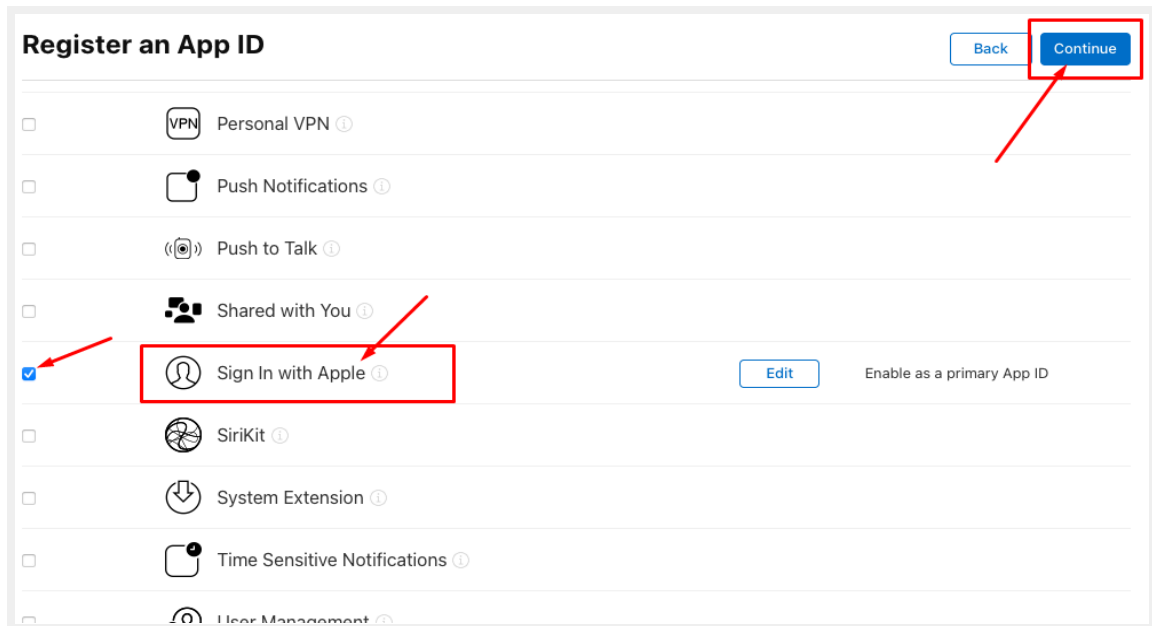

Figure: (43c) Configure Apple login API step 3

In case you already have an existing App ID that you want to use with Sign in with Apple:

- ❖ Open that App ID from the list
- ❖ Check the **Sign in with Apple** capability
- ❖ Click **Save**
- Go to your apple developer page then [Identifiers](#) and then Go to <https://developer.apple.com/account/resources/identifiers/list/serviceId>
- From the left nav choose Identifiers and Service IDs from the left dropdown.

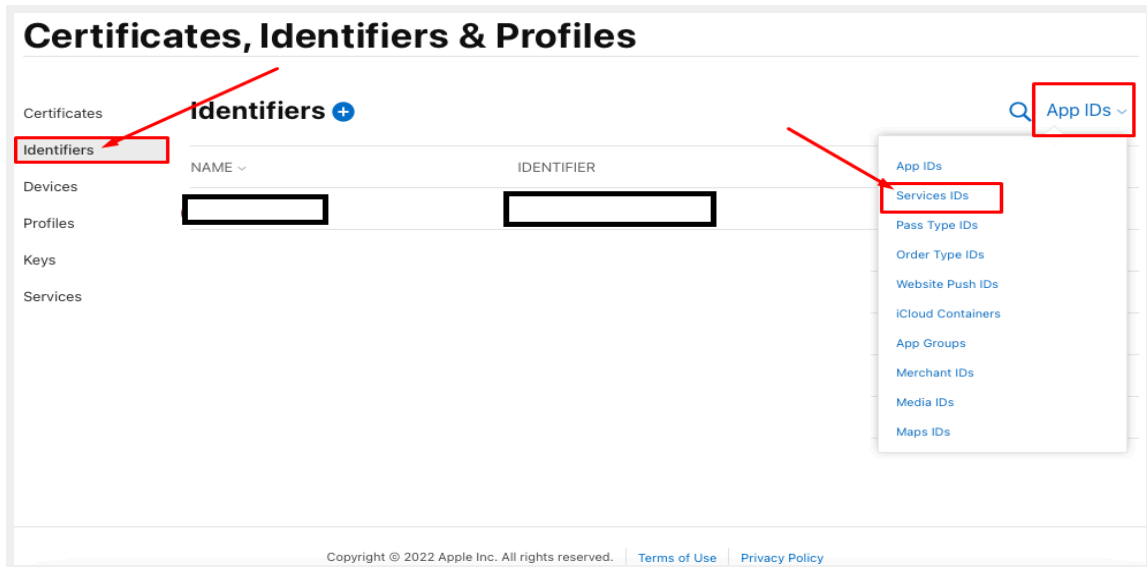

Figure: (43d) Configure Apple login API step 4

- After then click **Register an Services ID**

Figure: (43e) Configure Apple login API step 5

- Select **Services IDs**, click **Continue**

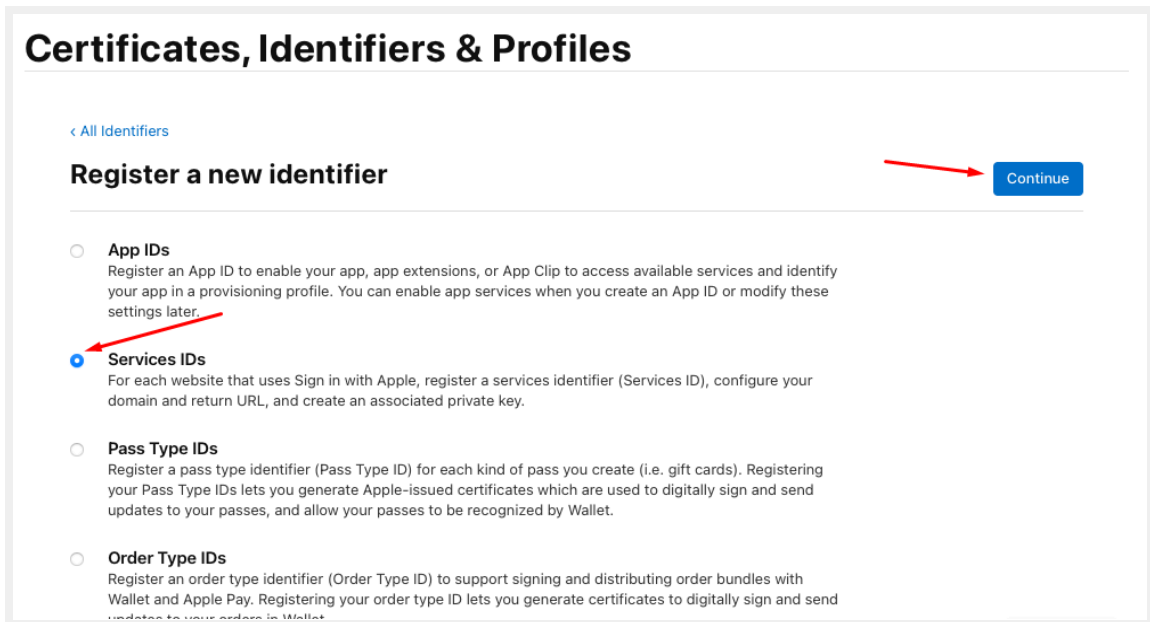

Figure: (43f) Configure Apple login API step 6

- Set your **Description** and **Identifier**. This **Identifier** will later be referred to as your clientID

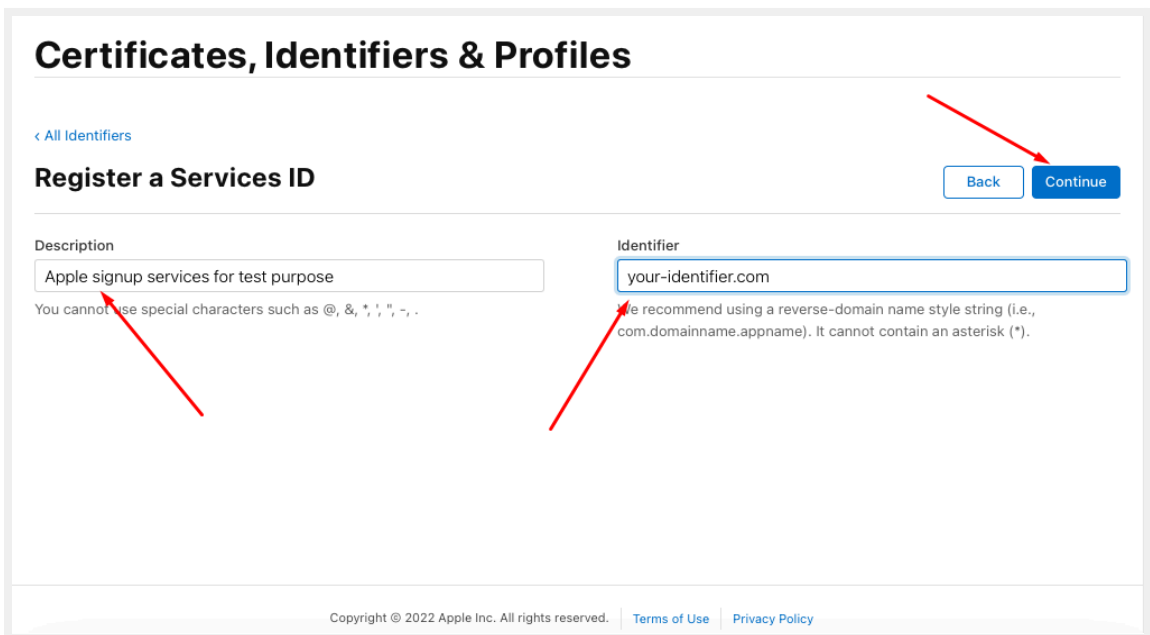

Figure: (43g) Configure Apple login API step 7

- Click **Continue** and then **Register**

64. How to add Attribute for the system?

Answer:

Follow the instruction:

- Firstly, **log in** to the Admin Panel and go to the **Products-> Attribute** from the left sidebar.

- Then **add a new attribute** and click on **Save**.
- You can also **edit** from here and **add values** of attributes.

Figure: (59a) Add attribute

Figure: (59b) Add attribute value

65. How does the attribute work?

Answer:

At the time of product uploading Vendor or Admin can use attributes for their product variations. For example, a vendor is going to upload a new product mobile. Vendor has three different variation's mobile based on storage. For this he just needs to select the attribute like storage and then he just puts the value like 32 GB , 64GB, 128GB. After that he can set the price as previously how he did.

66. What is the new advanced filter option?

Answer:

Advanced filter option means customer or user can search any product using attribute value. For example, Storage is an attribute and 32GB, 64GB, 128GB are the values of Storage attribute's. If any user or customer wants to see the all mobile of 32B storage he just needs to follow the below steps:

- Users or customers just go to the **product listing page**.
- There he/she will get the **value of attributes**
- He/She needs to **select 32GB** and click on **Apply Filter**
- He/She will get the **result**

67. How to upload bulk products from the admin panel?

Answer:

To upload bulk products follow the below steps:

- First of all, the admin needs to login into his Admin Panel and go to the **Bulk Import** menu under the **Products** from the left side bar.
- Admin needs to download the **Download CSV** file.
- Open the downloaded file and fill the information of products like name, description, category id, brand id, brand id, unit price etc.
- After putting the information of all products, now he/she needs to upload the file.
- To upload that file he/she needs to check the same page below, and have an option of **Upload product file**.

- He/she needs to choose the file and click on **Upload CSV**.
- Products will be uploaded.

Figure: (62a) Upload Bulk Product

68. How to upload bulk products from the Seller panel?

Answer:

To upload bulk products from seller follow the below steps:

- First of all, the seller needs to login into his Seller Panel and go to the **Bulk Upload** menu from the left side bar.
- Admin needs to download the **Download CSV** file.
- Open the downloaded file and fill the information of products like name, category id, sub-category id, brand id, unit price etc.
- After putting the information of all products now he needs to upload the file.
- To upload that file he needs to go to the **Bulk Upload** menu.
- There he will get the file upload form and then needs to choose the file and click on the **Upload** button.
- Products will be uploaded.

69. How to translate using Google translate?

Answer:

Follow the below steps:

- First go to **Setup & Configuration -> Language -> Translation** action
- Click on the **Translate By Google** option to automatically translate the site into your language.
 - After clicking this option, **please wait**, as it may take some time to complete the translation. Do not close the tab during this process.
 - If you have manually translated any value before, your manual translations will not be replaced **by Google Translate**.
- To sync translations for the mobile app, click on **Sync Translation For App**.
- If needed, you can also download the translation file by clicking **Export arb File**.

Figure: (64a) Translate page

- To change any translation value manually, directly edit in the **Value** field and click the **Save** button.
- To copy the **Key** into the **Value** fields, click on the **Copy Translations** button, then click **Save**.

70. How to add Classified Products?

Answer:

Customer can add classified products by following below procedure:

- **Log in** to the customer panel.
- First you need to Purchase any Package, For purchasing package go to **Dashboard > Purchase package > Click on Upgrade Package**

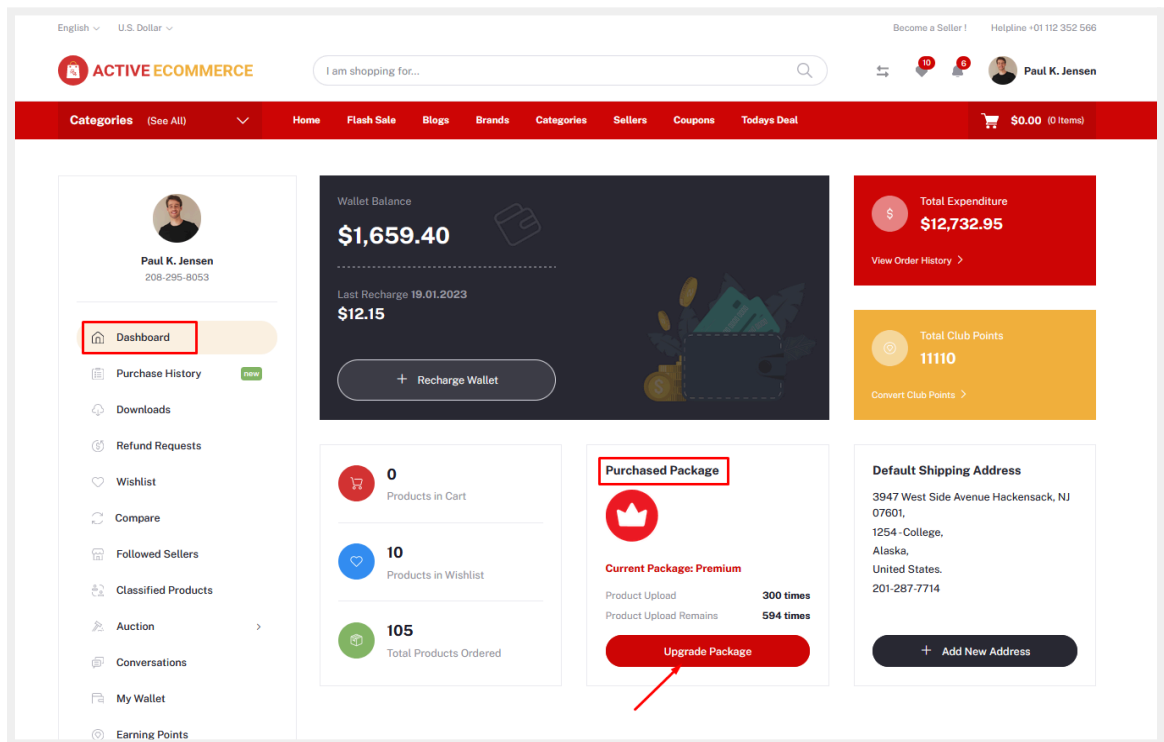

Figure: (65a) Purchased Package

- Now go to **Classified products > Add new product**
- Insert details for product and click on **Save Product**.

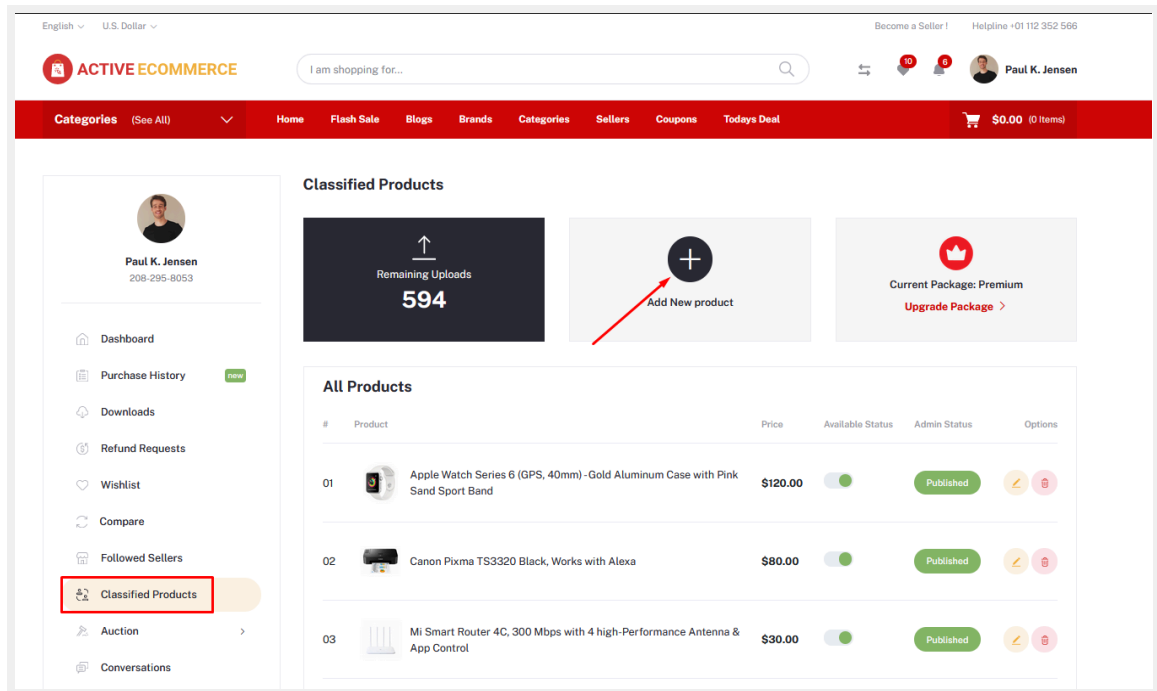

Figure: (65b) Add Classified product

71. How to use Classified Products?

Answer:

To use classified products:

- From admin panel Turn on **Classified Products** from **Setup & Configuration > Features Activation**
- Create classified packages for customer to purchase from **Customers > Classified Packages**
- Then customers can purchase classified packages and upload classified products as product upload.
- You'll see all classified product in **Customers > Classified Products**
 - You need to publish/approve all classified product manually to show in home/listing page
- Users can check the details of the classified product and contact the owner to purchase.

Figure: (66a) Enable Classified product

Figure: (66b) Classified Package

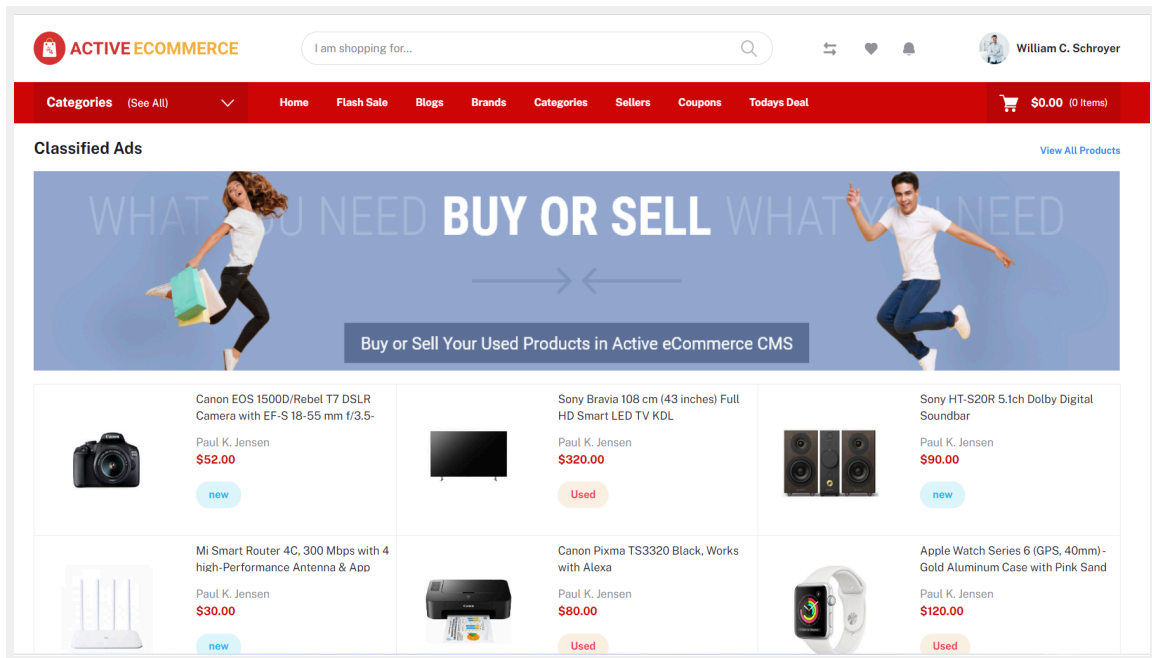

Figure: (66c) In home page Classified Products

72. How to use Digital Products?

Answer:

To use digital products:

- From the admin panel create the Digital product category.
- Upload digital products from the admin or seller panel.
- Customers can purchase the digital products.
- Digital products can only be purchased by online payment.

Figure: (67a) Digital product

73. How to configure the Amazon S3 file system?

Answer:

To use amazon s3 file system follow the procedure mentioned below:

- Firstly, login into the AWS dashboard. And select the s3 service from the list.

Figure: (68a) AWS Dashboard

- Then click the **Create bucket** button.

Figure: (68b) Creating Bucket

- After that, a modal will come up. In there insert your bucket name and the region you want your bucket to reside in.

Figure: (68c) Creating Bucket Form

- For step 2 and 3 do nothing just click **Next** then when the 4th step appears click create bucket and complete creating the bucket.

Figure: (68d) Creating Bucket Form step 2

Create bucket

1 Name and region 2 Configure options 3 **Set permissions** 4 Review

Note: You can grant access to specific users after you create the bucket.

Block public access (bucket settings)

Public access is granted to buckets and objects through access control lists (ACLs), bucket policies, access point policies, or all. In order to ensure that public access to all your S3 buckets and objects is blocked, turn on Block all public access. These settings apply only to this bucket and its access points. AWS recommends that you turn on Block all public access, but before applying any of these settings, ensure that your applications will work correctly without public access. If you require some level of public access to your buckets or objects within, you can customize the individual settings below to suit your specific storage use cases. [Learn more](#)

☒ **Block all public access**
 Turning this setting on is the same as turning on all four settings below. Each of the following settings are independent of one another.

☐ **Block public access to buckets and objects granted through new access control lists (ACLs)**
 S3 will block public access permissions applied to newly added buckets or objects, and prevent the creation of new public access ACLs for existing buckets and objects. This setting doesn't change any existing permissions that allow public access to S3 resources using ACLs.

☐ **Block public access to buckets and objects granted through any access control lists (ACLs)**
 S3 will ignore all ACLs that grant public access to buckets and objects.

☐ **Block public access to buckets and objects granted through new public bucket or access point policies**
 S3 will block new bucket and access point policies that grant public access to buckets and objects. This setting doesn't change any existing policies that allow public access to S3 resources.

☐ **Block public and cross-account access to buckets and objects through any public bucket or access point policies**
 S3 will ignore public and cross-account access for buckets or access points with policies that grant public access to buckets and objects.

Manage bucket permissions

Figure: (68e) Creating Bucket Form step 3

Figure: (68f) Creating Bucket Form next step

- Then you'll be able to see the bucket that you created. Click on the bucket.

Figure: (68g) Bucket Page

- It'll take you to the bucket details. From there go to the **Permissions** menu and then click on the **Bucket Policy** below there you will find the **Policy generator** blue button. Click it.

Figure: (68h) Bucket Policy Page

- The UI will appear after clicking the button. For the policy type insert **S3 Bucket Policy** and for **Principal** insert ***** and from the **Actions** dropdown select box select **getObject**. And follow the convention mentioned inside the red box highlighted with red text color for the **ARN value**. The ARN value will be found in the previous page from where we came from. Just follow the instructions mentioned inside the images below.

Figure: (68i) Bucket Policy page

amazon web services

AWS Policy Generator

The AWS Policy Generator is a tool that enables you to create policies that control access to Amazon Web Services (AWS) products and resources. For more information about creating policies, see key concepts in Using AWS Identity and Access Management. Here are sample policies.

Step 1: Select Policy Type

A Policy is a container for permissions. The different types of policies you can create are an IAM Policy, an S3 Bucket Policy, an SNS Topic Policy, a VPC Endpoint Policy, and an SQS Queue Policy.

Select Type of Policy: S3 Bucket Policy

Step 2: Add Statement(s)

A statement is the formal description of a single permission. See a description of elements that you can use in statements.

Effect: ☒ Allow ☐ Deny

Principal:

Use a comma to separate multiple values.

AWS Service: Amazon S3 ☐ All Services (*)

Use multiple statements to add permissions for more than one service.

Actions: 1 Action(s) Selected ☐ All Actions (*)

Amazon Resource Name (ARN): arn:aws:s3::testing-my-bucket

ARN should follow the following format: arn:aws:s3::<bucket_name>/<key_name>. Use a comma to separate multiple values.

Paste the ARN and don't forget to add /* after the ARN

[Add Conditions \(Optional\)](#)

[Add Statement](#)

Step 3: Generate Policy

A policy is a document (written in the Access Policy Language) that acts as a container for one or more statements.

Add one or more statements above to generate a policy.

Figure: (68j) AWS policy generator

- Finally, click the **Generate Policy** button.
- You will see a pop up and there you will find some text. Copy the texts.

Policy JSON Document

Click below to edit. To save the policy, copy the text below to a text editor. Changes made below will not be reflected in the policy generator tool.

```
{
  "Id": "Policy1600695868258",
  "Version": "2012-10-17",
  "Statement": [
    {
      "Sid": "Stmnt1600695832250",
      "Action": [
        "s3:GetObject"
      ],
      "Effect": "Allow",
      "Resource": "arn:aws:s3::testing-my-bucket/*",
      "Principal": "*"
    }
  ]
}
```

This AWS Policy Generator is provided for informational purposes only, you are still responsible for your use of Amazon Web Services technologies and ensuring that your use is in compliance with all applicable terms and conditions. This AWS Policy Generator is provided as is without warranty of any kind, whether

[Close](#)

Figure: (68k) Policy JSON Document

- And paste it inside the box shown below. And then click **Save**.

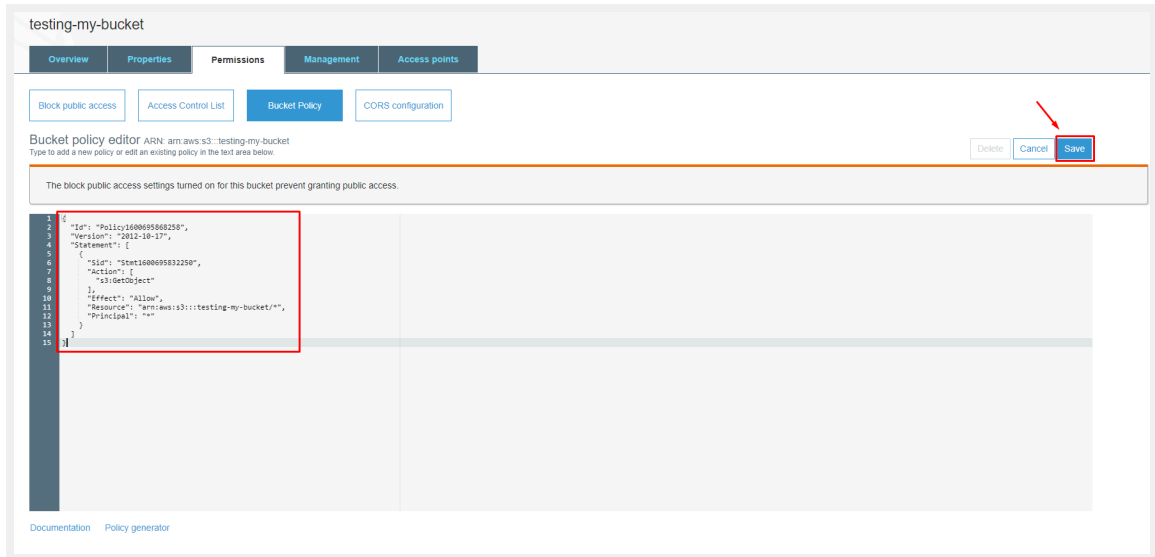

Figure: (68l) Testing Bucket page

- You might encounter an error shown below.

Figure: (68m) Encounter error

- To get rid of this error you need to go to the **Permissions** menu and then go to the **Block public access** menu and then click the **Edit** button shown below.

Figure: (68n) Block Public access menu

- After you have gone to the menu mentioned above uncheck the checkbox saying the following **“Block all public access”** and then click the **Save** button. A pop up will appear and tell you to type in the word **‘confirm’** and then click the **confirm** button.

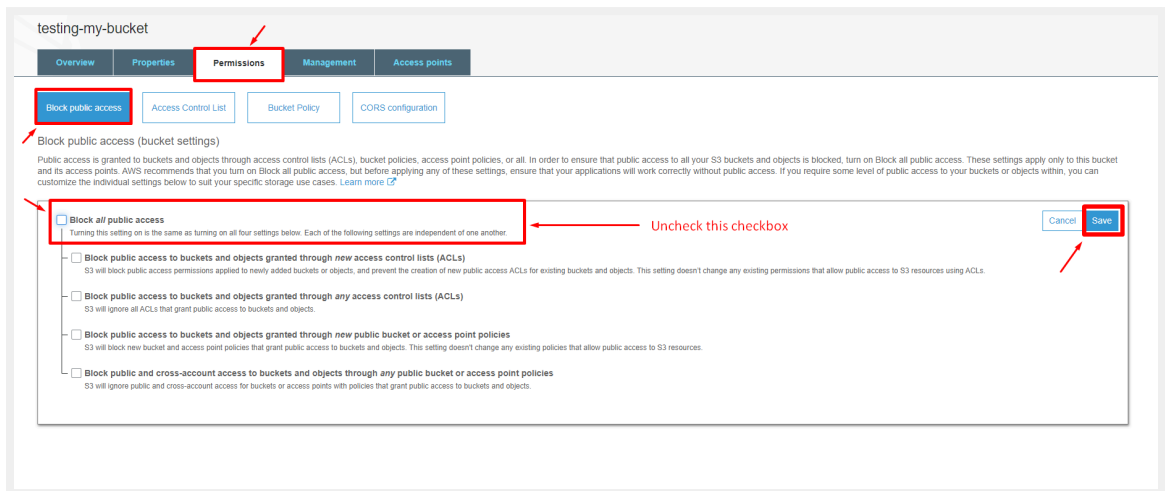

Figure: (68o) Block Public access page

Figure: (68p) Block Public access confirmation page

- After you have done all the instructions mentioned above you need to have to go to **Permissions -> Bucket Policy** and now try to paste the texts and click the **Save** button as mentioned in the instruction above. If all goes well you should see the page shown in the image below. Saying the yellow text **"This bucket has public access"**.

Figure: (68q) showing okay with the text "This bucket has public access"

- Then, notice the top nav of your page and there is a button saying **Services**. When you hover over it it drops a menu down.

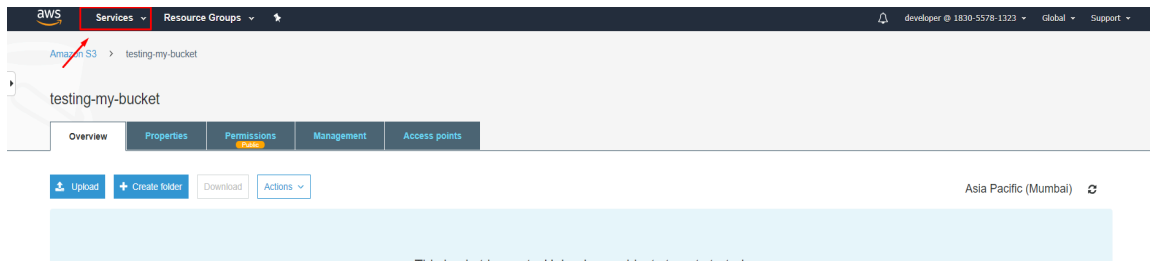

Figure: (68r) AWS services

- Inside the menu there is a search bar. Inside the search bar type in 'iam' and the search result will be shown to you. Select the first result that comes up.

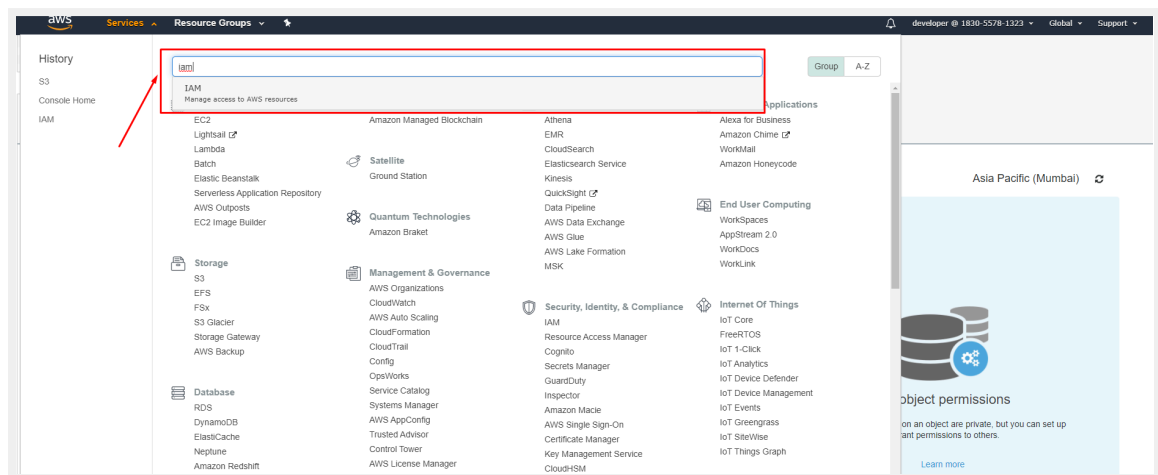

Figure: (68s) Searching iam

- Then go to the **User** menu as shown in the image below and click the **Add user** button.

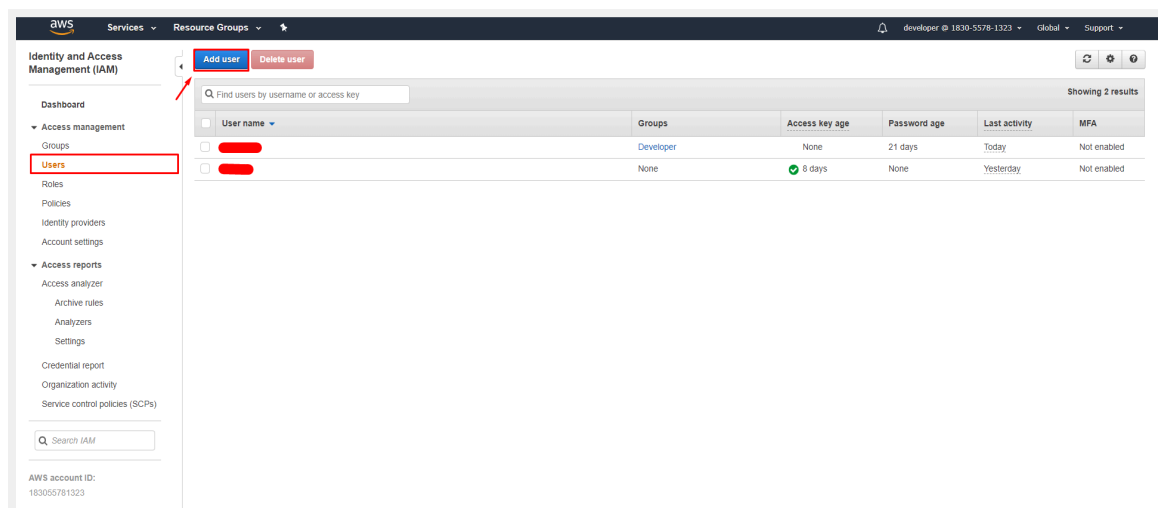

Figure: (68t) Showing all Menu

- After you have clicked the Add User button a page will appear on your browser. There you will see a form. And you need to type in your **User-name** and check the **Programmatic Access** as the **Access Type**. Just follow the instructions mentioned in the image below.

Create user

Figure: (68x) Add user (review) page

- After you have created the user you will be directed to a page where you will find two keys.
 - Access Key ID and
 - Secret access key.

Figure: (68y) Add user (success) page

- Copy these two keys and then go to your admin panel and go to the **Business Settings** menu and then to the **File System Configuration** sub-menu. And then there you will find the two fields where you will need to paste those two keys that you have just copied.

Figure: (68z) Insert S3 file system credentials

- Now you need to set your bucket region. For that go to your bucket details and follow the instruction shown inside the image to find the bucket region. Copy your bucket region and paste it inside the **AWS DEFAULT REGION** field residing inside **File System Configuration's** submenu under the **Business Settings** Menu inside your admin panel.

Figure: (68aa) Copy the region

- Also you need to insert your bucket name inside the **AWS BUCKET** field.
- And for the **AWS URL** just follow the convention mentioned inside the image below.

S3 File System Credentials

AWS ACCESS KEY ID

AWS SECRET ACCESS KEY

AWS DEFAULT REGION

AWS BUCKET

AWS URL

Save

Follow this convention for the AWS URL

https://your_bucket_name.s3.bucket_region.amazonaws.com

S3 File System Activation ☒

Figure: (68ab) AWS url

- And if you've followed all of the instructions mentioned above you should be able to upload your files inside the bucket of your amazon server's s3 file system.
- And also don't forget to activate your S3 File System shown inside the **blue box pointed out by a red arrow**.
- Now click the Permissions tab

Objects | Properties | **Permissions** | Metrics | Management | Access Points

Permissions overview

Access

Public

Figure: (68ac) Permission tab

- Click the Edit button of the Object Ownership section

Object Ownership [Info](#)

Control ownership of objects written to this bucket from other AWS accounts and the use of access control lists (ACLs). Object ownership determines who can specify access to objects.

Object Ownership

Bucket owner enforced

ACLs are disabled. All objects in this bucket are owned by this account. Access to this bucket and its objects is specified using only policies.

[Edit](#)

Figure: (68ad) Object ownership section

- And now follow as per the below

Object Ownership

Control ownership of objects written to this bucket from other AWS accounts and the use of access control lists (ACLs). Object ownership determines who can specify access to objects.

☐ **ACLs disabled (recommended)**
All objects in this bucket are owned by this account. Access to this bucket and its objects is specified using only policies.

☒ **ACLs enabled**
Objects in this bucket can be owned by other AWS accounts. Access to this bucket and its objects can be specified using ACLs.

Enabling ACLs turns off the bucket owner enforced setting for Object Ownership
Once the bucket owner enforced setting is turned off, access control lists (ACLs) and their associated permissions are restored. Access to objects that you do not own will be based on ACLs and not the bucket policy.

☒ I acknowledge that ACLs will be restored.

Object Ownership

☒ **Bucket owner preferred**
If new objects written to this bucket specify the bucket-owner-full-control canned ACL, they are owned by the bucket owner. Otherwise, they are owned by the object writer.

☐ **Object writer**
The object writer remains the object owner.

If you want to enforce object ownership for new objects only, your bucket policy must specify that the bucket-owner-full-control canned ACL is required for object uploads. [Learn more](#)

74. How to migrate existing uploaded files to s3?

Answer:

To migrate to amazon s3 file system follow the procedure mentioned below:

- Download all files from the public/uploads folder.
- Create a folder named uploads in the s3 bucket.
- Upload all downloaded files to the uploads folder of s3 bucket.

75. How to configure the Backblaze file system?

Answer:

To configure the backblaze file system follow the below procedure:

- Go to **My Settings** and enable the “**B2 Cloud Storage**”

Figure: (70a) Enabling B2 Cloud Storage

- You cannot use your **master application key** with the **S3-Compatible API**. So, you have to create application key. Now Go to **Application Keys**, click on “**Add a New Application Key**” button.

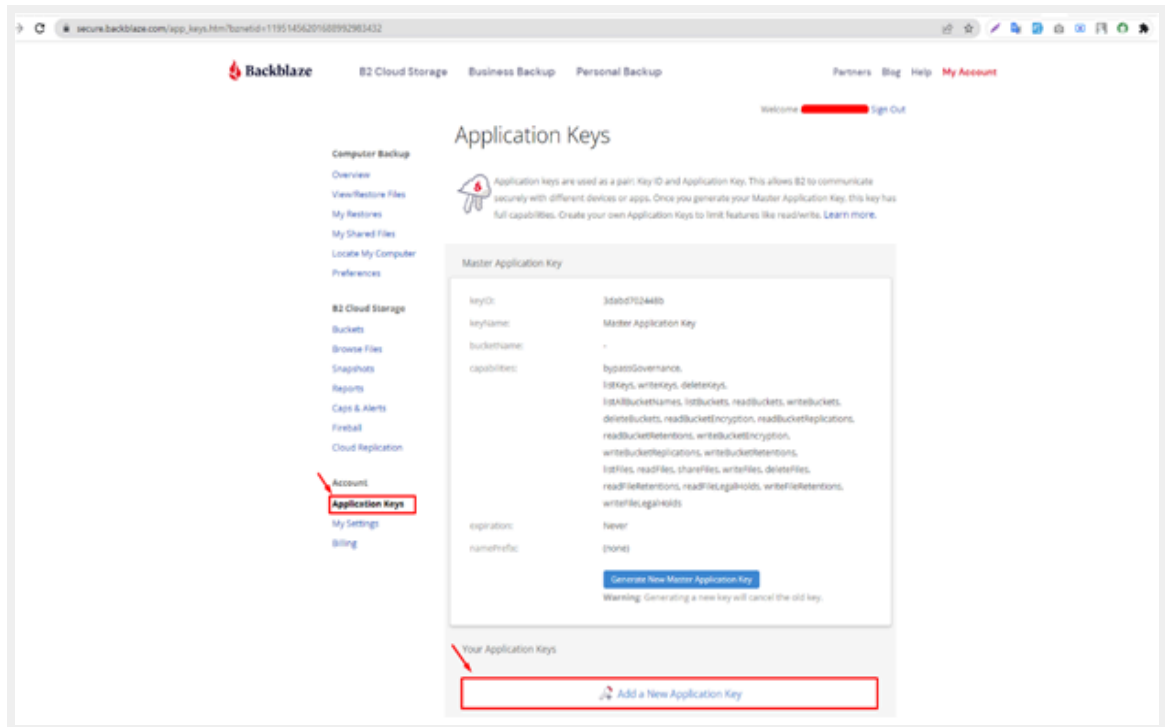

Figure: (70b) Adding new application key

- Now set a **Name** of your application key and make it **“Read and Write”** and after then click on **“Create New Key”** button.

Close (X)

Add Application Key

Name of Key:
(keyName)

Allow access to Bucket(s):
(bucketName)

Type of Access:
(optional)
(capabilities)

File name prefix:
(optional)
(namePrefix)

Duration (seconds):
(optional)
(validDurationSeconds)

Create New Key

Cancel

Figure: (70c) Creating Application new key

- After then, you will get the **key ID**, **key name** and can see the **capabilities** of this **key ID**.

Figure: (70d) Showing application key

- Now go to **Buckets** to create a new bucket. Click on **"Create a Bucket"** button

Figure: (70e) Creating B2 cloud storage Bucket

- Set a unique bucket name (Bucket names must be at least six characters and globally unique. A message is displayed if your bucket name is already in use.) and make it to public.

Create a Bucket

A bucket is a container that holds files that are uploaded into B2 Cloud Storage. The bucket name must be globally unique and must have a minimum of 6 characters. A limit of 100 buckets may be created per account. An unlimited number of files may be uploaded into a bucket.

Bucket Unique Name:

Files in Bucket are: ☐ Private ☒ Public

Default Encryption: ☒ Disable ☐ Enable
Backblaze B2 key (SSE-B2), an encryption key that Backblaze creates, manages and uses for you.

Object Lock: A security feature that can provide data immutability by restricting a file from being modified or deleted for a specified period of time. [Learn more.](#)
☒ Disable ☐ Enable

Create a Bucket Cancel

Figure: (70f) Creating Bucket

- Now you will get the Bucket ID, Endpoint with the default region

Figure: (70g) Showing B2 Cloud Storage Buckets

76. How to set Backblaze file system credentials on your own system?

Answer:

To set backblaze file system credentials you need to follow the steps mentioned below.

- **Log in as an Admin**
- Go to **Setup & Configurations > File System & Cache Configuration**
- **Enable the Backblaze File System Activation** option
- Insert **BACKBLAZE_ACCESS_KEY_ID**. After creating the application key you will find the Key ID Insert the ID here.
- Insert **BACKBLAZE_SECRET_ACCESS_KEY**. After creating the application key you will find the Application Key insert the ID here.

- Insert **BACKBLAZE_DEFAULT_REGION**. After creating a bucket you will find Endpoint, the second part is the default region insert it here.
- Insert **BACKBLAZE_BUCKET**. After creating a bucket you will find the bucket name, insert this name here
- Insert **BACKBLAZE_ENDPOINT** and must have included **https**. For example,
https://.....com
- Insert **BACKBLAZE_URL** by formatting it this way:
https://BACKBLAZE_ENDPOINT/BACKBLAZE_BUCKET.

Figure: (71a) Inserting Backblaze file system credentials

77. How to configure Ngenius credentials(test account)?

Answer:

To configure ngenius you need to follow the steps mentioned below.

- First login to the Ngenius developers panel. [Ngenius developers panel](#)
- Or create an account if one does not exist.

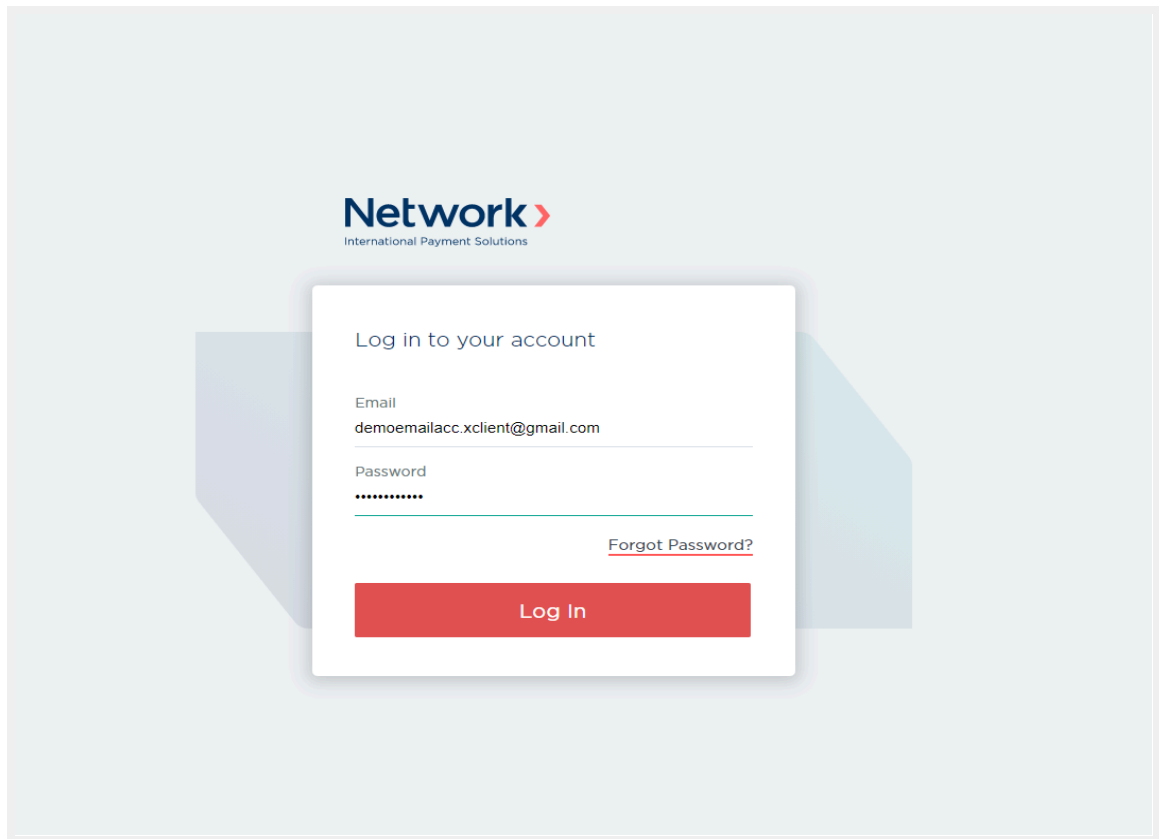

Figure: (72a) Log in panel

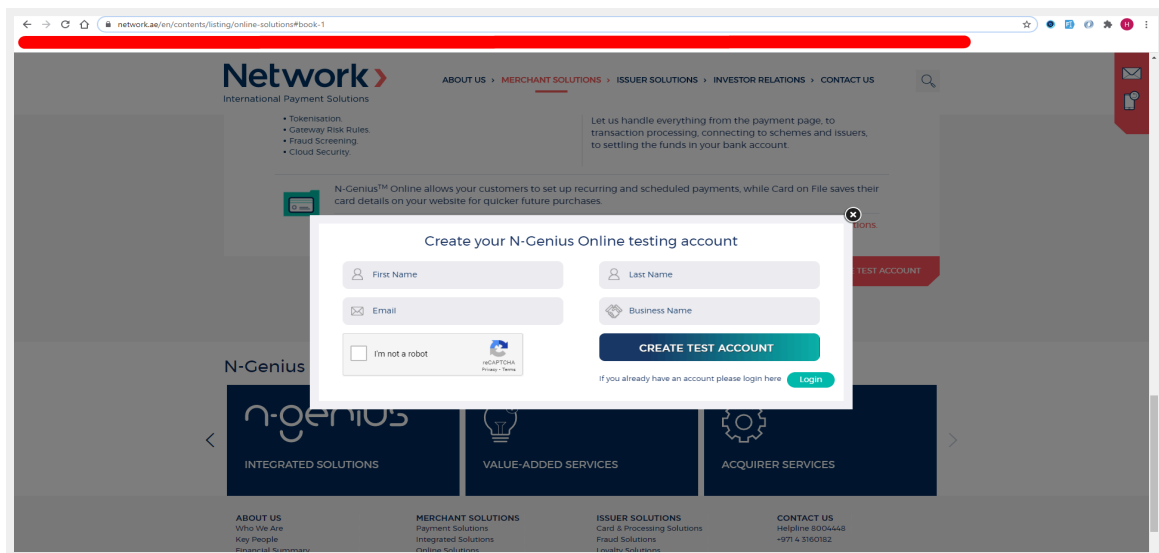

Figure: (72b) Create ngenius account pop up

- After that go to the **Settings -> Integrations -> service account**. Create one service account if it does not exist.

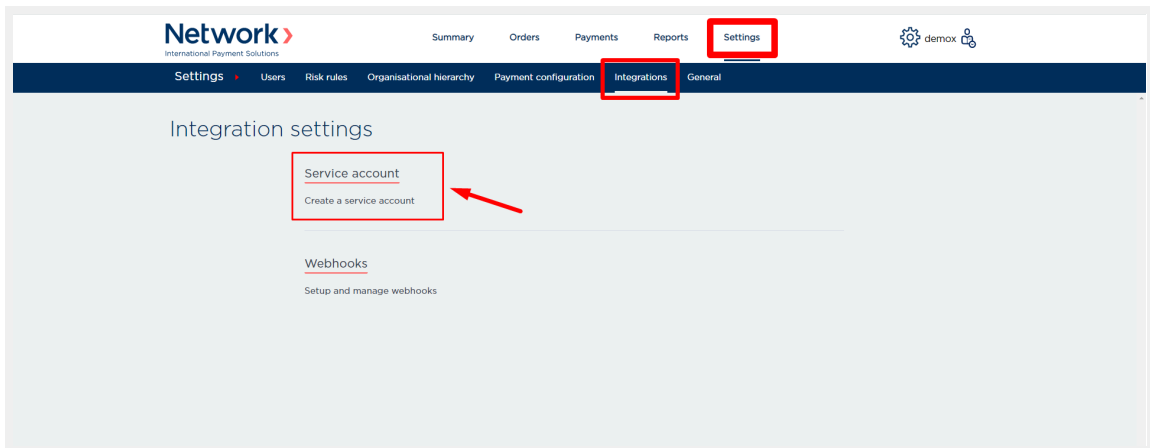

Figure: (72c) Creating Bucket Form next step

- There you will find the API key. Copy that API key and paste it inside your Ngenius credentials **NGENIUS API KEY** field inside the **Payment Method** sub-menu residing in the **Business Settings** menu.

Figure: (72d) Ngenius API key field

Ngenius Credential

NGENIUS OUTLET ID

NGENIUS API KEY

NGENIUS CURRENCY

Currency must be AED or USD or EUR
If kept empty, AED will be used automatically

Save

Figure: (72e) Ngenius credential

- After that you need the OUTLET ID of your ngenius account for that you need to go to the **Settings ->Organizational Hierarchy** then click the **instant_singup_outlet** . After that you will find your reference key pointed out with the red arrow; copy that key and paste it inside the you **NGENIUS_OUTLET_ID** field residing inside the **Payment Method** sub-menu residing in the **Business Settings** menu.
- Finally, Set your currency as **AED, USD or EUR** and click the **Save** button. If you have followed all of the steps mentioned above your app should be ready to go.

78. Which options are translatable in multiple languages?

Answer:

The following options are translatable in multi-language:

- **Product:** Name, Unit, Description.
- **Category:** Name
- **Sub Category:** Name
- **Sub Sub Category:** Name
- **Attribute:** Name
- **Brand:** Name
- **Customer Product:** Name, Unit, Description

- **Customer Package:** Name
- **Flash Deal Product:** Title
- **Pages:** Page Title
- **Pickup Point:** Name, Location
- **Role:** Name

79. How to configure Bkash payment gateway?

Answer:

Follow the below steps to configure bkaash payment gateway:

- Contact bkaash authority for getting api information
- Turn on bkaash switch from admin panel **Setup & configuration > Feature Activation > Bkash Activation**
- Fill up bkaash api information from **Setup & configuration > Payment Method > Bkash Credential**
- If bkaash api is in the sandbox mood, turn on the sandbox switch. For live Turn off sandbox switch

80. How to configure the Nagad payment gateway?

Answer:

Follow the below steps to configure the Nagad payment gateway:

- Contact Nagad authority for getting api information
- Turn on Nagad switch from admin panel **Setup & configuration > Feature Activation > Nagad Activation**
- Fill up Nagad api information from **Setup & configuration > Payment Method > Nagad Credential**
- If Nagad api is in the sandbox mood input NAGAD MODE "sandbox". For live input NAGAD MODE "live"

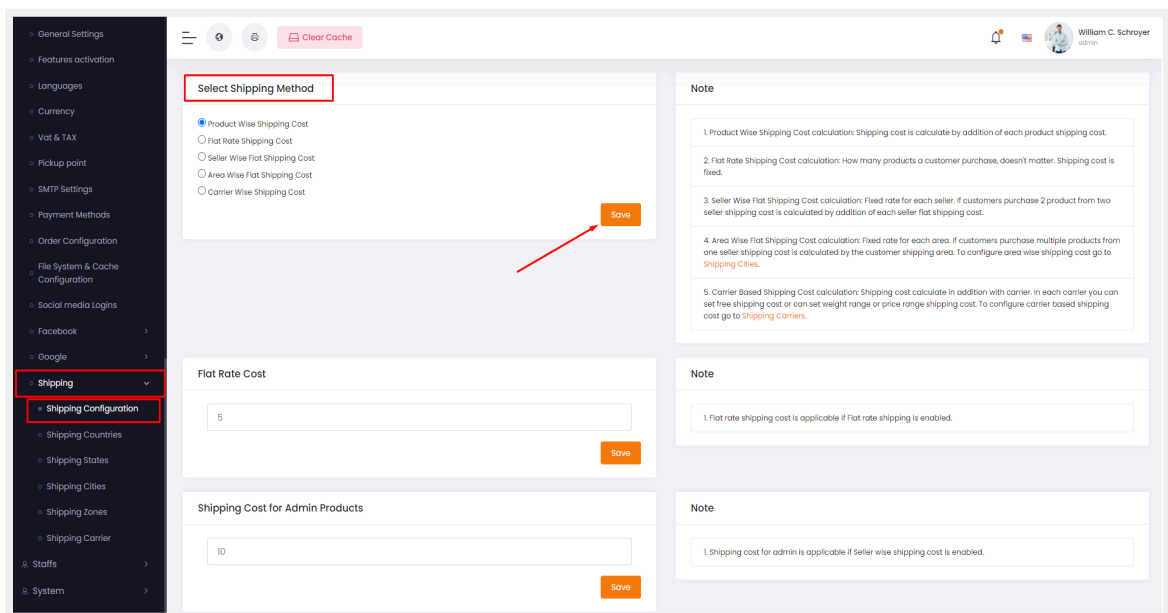

81. How to manage shipping for products?

Answer:

Admin can select the shipping method and the shipping cost calculation will be done according to this shipping method.

For selecting any shipping method please follow the procedure given below:

- **Log in as an admin**
- Go to **Setup & Configurations > Shipping > Shipping Configuration**
- From here you can enable your preferred shipping method

The screenshot shows the 'Shipping Configuration' page in an admin panel. On the left is a dark sidebar with a menu where 'Shipping' and 'Shipping Configuration' are highlighted with red boxes. The main content area has a 'Select Shipping Method' section with five radio button options: 'Product Wise Shipping Cost' (selected), 'Flat Rate Shipping Cost', 'Seller Wise Flat Shipping Cost', 'Area Wise Flat Shipping Cost', and 'Carrier Wise Shipping Cost'. A red arrow points to an orange 'Save' button next to these options. Below this are two input fields: 'Flat Rate Cost' with the value '5' and 'Shipping Cost for Admin Products' with the value '10', each with its own 'Save' button. On the right side, there are three 'Note' boxes providing detailed explanations for each shipping method.

Figure: (76a) All shipping methods

82. How to configure product-wise shipping cost?

Answer:

Follow the below steps to configure product wise shipping costs:

- Go to admin panel **Setup & configuration > Shipping configuration** and choose **Product Wise Shipping Cost**
- Now go to **Products > Add New Product from Shipping Configuration** you will get another 3 options
 - **Free Shipping:** No shipping cost added
 - **Flat Rate:** Fixed shipping cost will be added for every city

- **Product Quantity Multiplication:** Product quantity will be multiplied while purchasing if this option enables

Figure: (77a) Product wise shipping cost

****If the product wise shipping cost is enabled then product upload form admin and seller both will get the options for Flat Rate cost and Free shipping option.**

- From the switch you can enable or disable
- The Inserted amount will be added as shipping cost for the products on the cart.

83. How to configure flat rate shipping cost?

Answer:

Follow the procedure:

- **Log in as an admin**
- Go to **Setup & Configuration > Shipping Configuration**, and choose **Flat Rate Shipping Cost**.

****Flat Rate Shipping Cost:** How many products a customer purchases doesn't matter. The shipping cost is fixed.

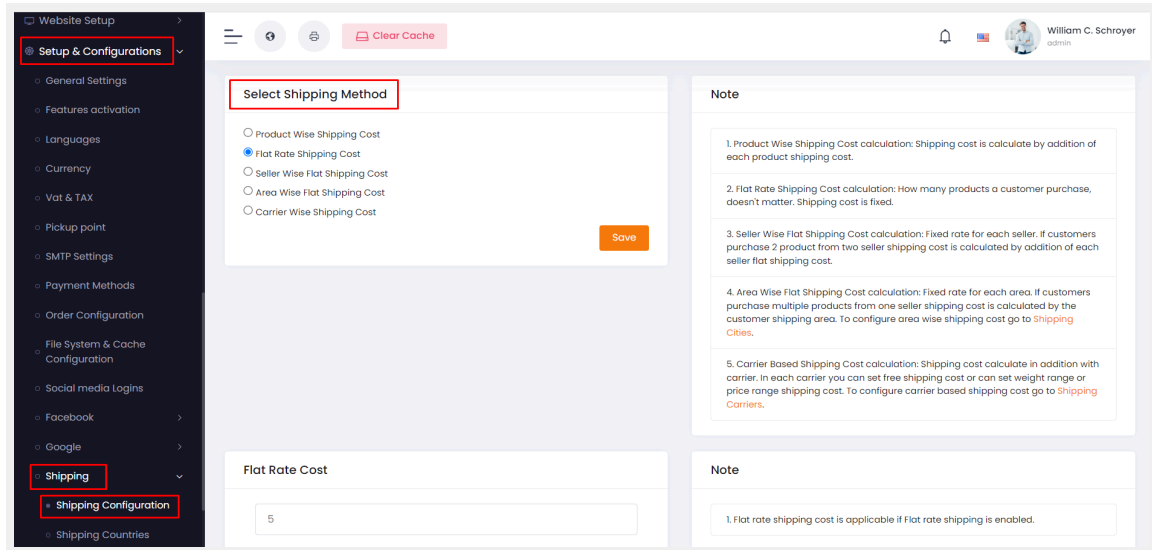

Figure: (78a) Enable flat rate shipping cost

84. How to configure seller-wise flat shipping cost?

Answer:

Please follow the procedure:

- **Log in** to the **admin** panel
- Go to **Setup & configuration > Shipping Configuration**, and choose **Seller Wise Shipping Cost**.

****Seller Wise Shipping Cost: Fixed rate for each seller. If customers purchase 2 products from two sellers shipping cost is calculated by addition of each seller flat shipping cost.**

85. How to configure city-wise flat shipping cost?

Answer:

For configuring city-wise shipping cost admin needs to choose Area-wise Flat Shipping Cost.

- **Log in** to the **admin** panel

- Go to **Setup & configuration > Shipping configuration** and choose **Area Wise Flat Shipping Cost**
- Then admin needs to select the countries, Now go to **Setup & configuration > Shipping Countries** and **enable** or **disable** your preferred countries
- Admin can add city. For adding a city Go to **Setup & configuration > Shipping > Shipping Cities**. Now create a city for the **selected country** and input the **shipping cost** for the city and enable the preferred cities
- For creating the city admin needs to add the state, To add the state go to **Setup & configuration > Shipping > Shipping State** and create a state for the selected country and enable the preferred state

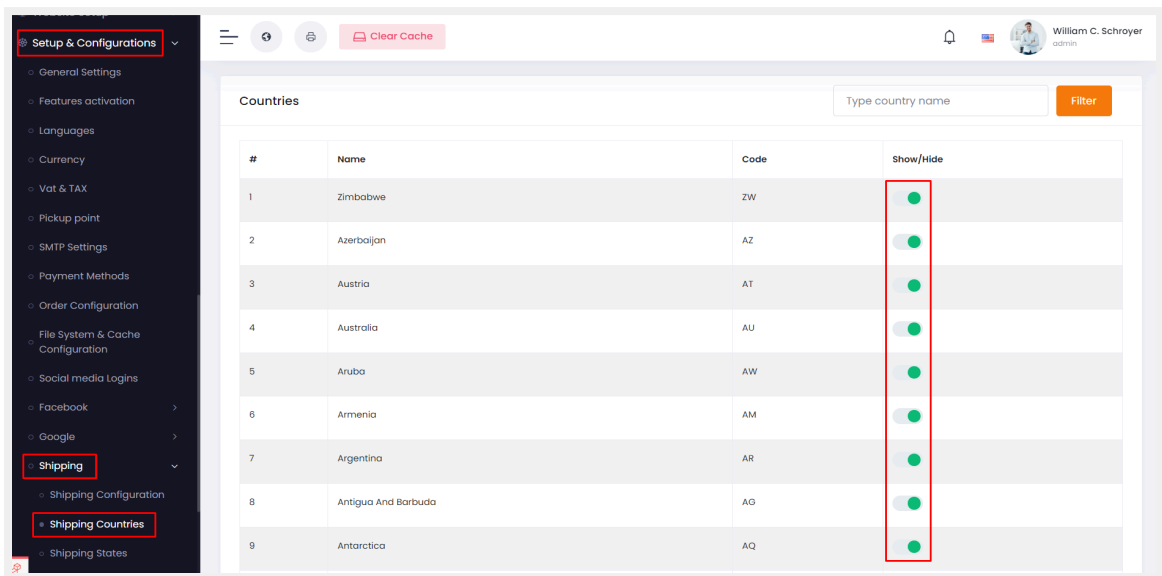

Figure: (80a) Enable preferred shipping countries

Figure: (80b) Enable preferred shipping states and add state

Figure: (80c) Insert city-wise shipping cost

86. How to enable Carrier Wise Shipping Costs?

Answer:

Follow the below instructions:

- Log in to the **admin** panel
- From the left navbar go to **setup & configurations > Shipping > Shipping configuration**.

- From the shipping method select **carrier-wise shipping cost**
- Then click the **save** button.

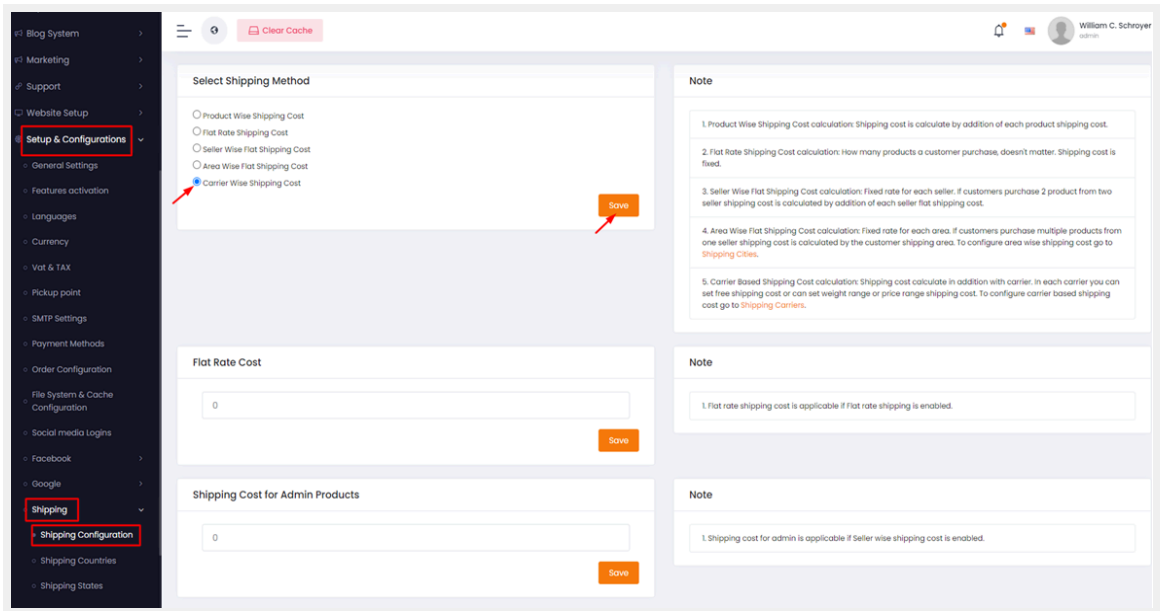

Figure: (81a) Enable carrier wise shipping cost

87. How to add a new Shipping carrier?

Answer:

Create a shipping carrier following the below instructions:

- From the admin panel, go to **Setup & Configurations > Shipping > Shipping Carrier > Add new carrier**
- Fill the form with the **Carrier Name and transit time** (The delivery time will be displayed during checkout process), **Logo**,
- If **free shipping** enables then no range (**weight** based or **prices** based) will be applicable
- Choose Billing type (According to **price**/According to **weight**)
- Ranges (weight based or price based).
- Click the **Submit** button.

Figure: (82a) Shipping carrier add

The screenshot shows the 'Carrier Information' form in the Admin Manager. The form includes fields for Carrier Name, Transit Time, Logo, Free Shipping?, and Billing Type. It also has a section for 'Weight based carrier price range' with input fields for weight and cost, and a 'Save' button at the bottom right.

Figure: (82b) Shipping carrier add form

88. How to create a zone for carrier-wise shipping?

Answer:

Create a zone with countries if not created yet. Follow the below instructions:

- From the admin panel, go to **Setup & Configurations > Shipping > Shipping Zones**
- Click on **Add new zone**.
- From the zone information insert Name and select country. Then click the **submit** button.

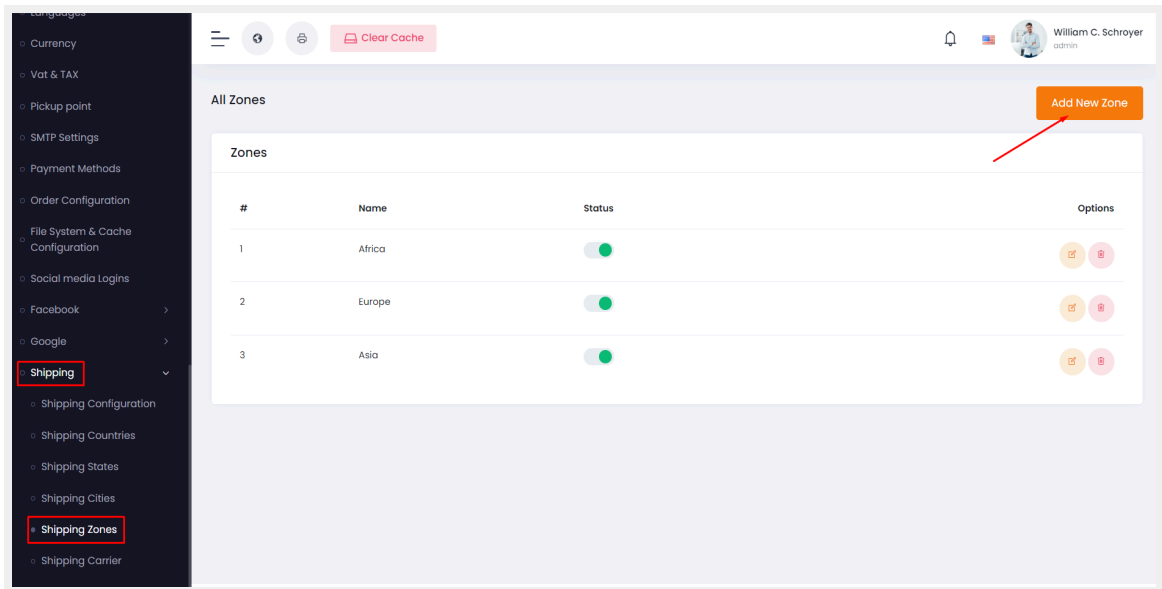

Figure: (83a) Create zone for carrier-wise shipping

89. How to set weight?

Answer:

Now in the **product** section, the weight field will be used to calculate shipping cost if carrier-based shipping cost is enabled.

The screenshot shows the 'Add New product' interface. The left sidebar has a 'Products' menu with 'Add New product' selected. The main form has two columns. The left column, 'Product Information', contains fields for Product Name, Category (Women Clothing & Fashion), Brand (Select Brand), Unit (Unit (e.g. KG, Pc etc)), Weight (n kg) (0.00), Minimum Purchase Qty (1), Tags (Type and hit enter to add a tag), and Barcode. The right column, 'Shipping Configuration', has toggles for Free Shipping, Flat Rate, and Is Product Quantity Multiply. Below this is a 'Low Stock Quantity Warning' section with a Quantity input field set to 1. At the bottom is a 'Stock Visibility State' section with a Show Stock Quantity toggle.

Figure: (84a) insert weight field

90. How can a customer choose a carrier during the checkout process?

Answer:

Follow the instructions:

In the **checkout** procedure on the **delivery info** customer can choose the **carrier** option and then click **continue** to payment.

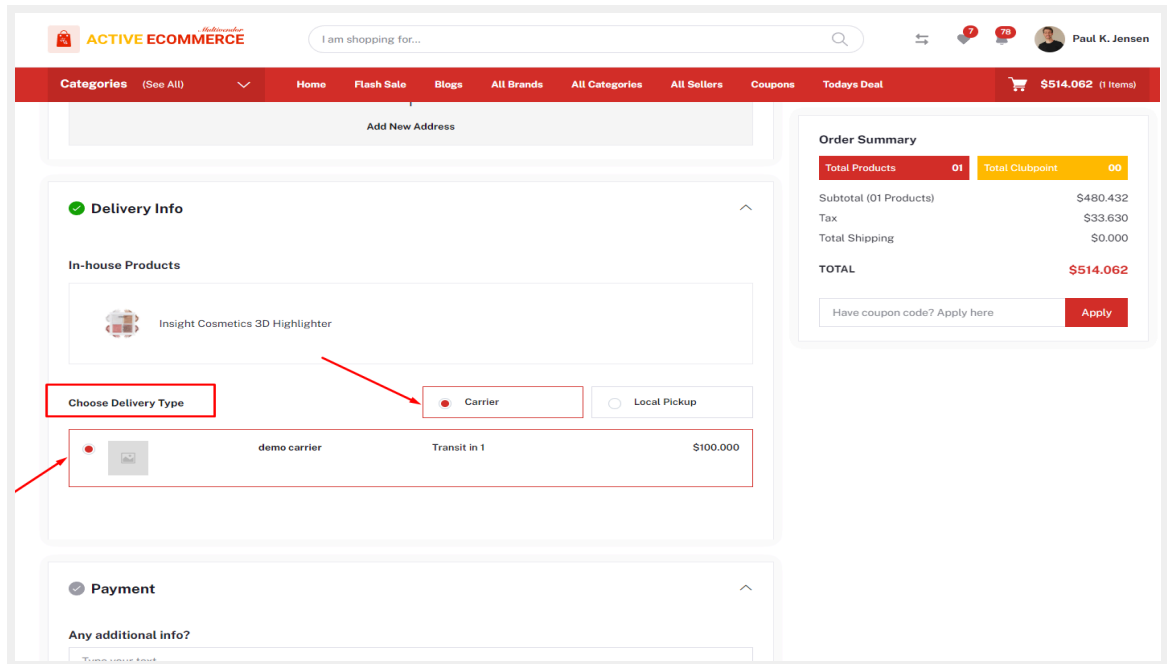

Figure: (85a) Customer chooses carrier during the checkout process

91. How to configure Redis cache support?

Answer:

Follow below steps:

- Go to this link <https://www.techalyst.com/posts/install-and-configure-redis-server-for-laravel> and follow from **Step 1** to **Step 5**
- Go to Admin panel **Setup & configuration > File System & Cache Configuration**
- Choose **Redis** option in **CACHE_DRIVER & SESSION_DRIVER** section and set **Redis Host**, **Redis Password** and **Redis Port** in **Redis configuration** section

Cache & Session Driver

93. How to create and respond to the support tickets?

Answer:

- **Login** to the **customer** panel
- Go to **Support ticket > Create a ticket**.
- Write the Subject, Provide a detailed description, photo upload and click on the Send Ticket button.

Figure: (88a) Creating support ticket from customer

After sending a ticket from the customer, Admin can response to that ticket,

- **Login** to the **admin** panel.
- Go to **Support > Ticket > View** action.
- Now you can answer the customer's query with attachment as Submit as Open > Submit as Pending/ submit as Solved.

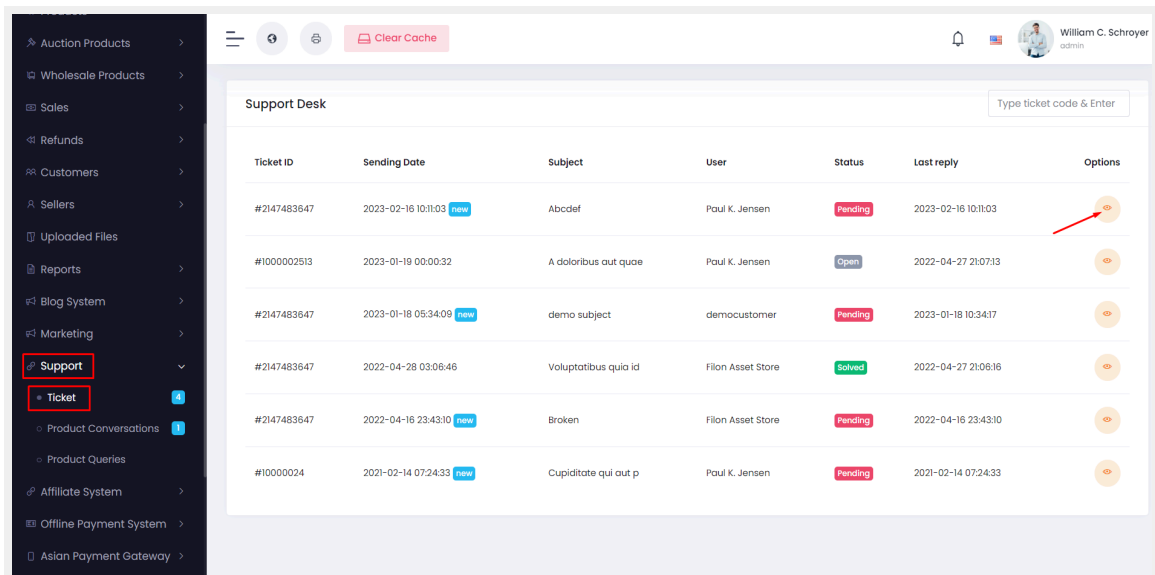

Figure: (88b) Support ticket reply from admin

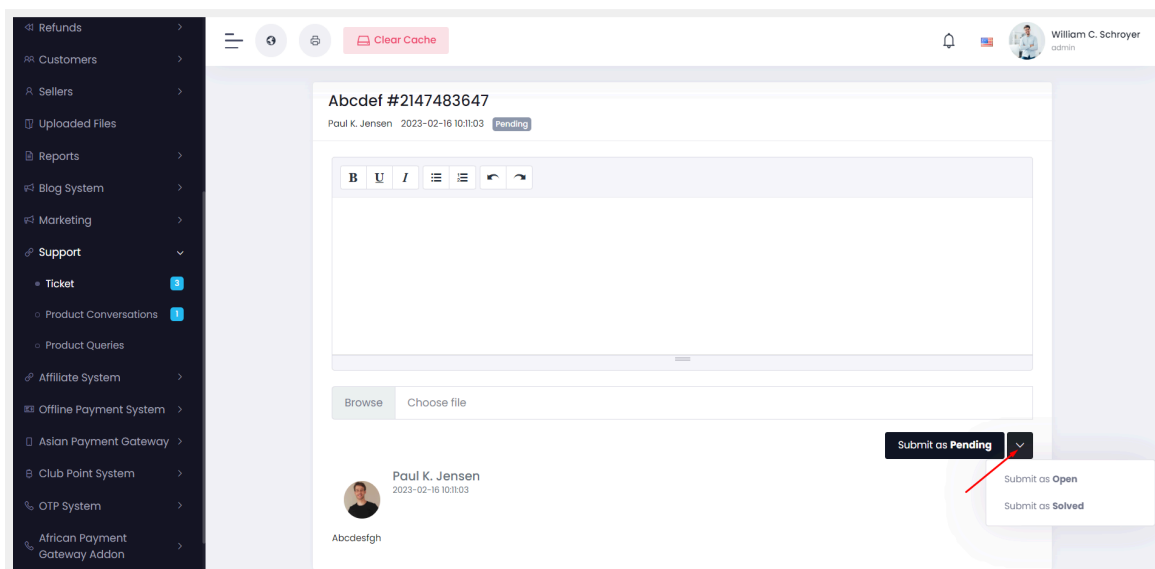

Figure: (88c) Support ticket reply

94. How to Set Up Google reCAPTCHA?

Answer:

To set up Google reCAPTCHA follow the below instructions:

Generate API Keys

- **Login** to the admin panel.
- Navigate to **Setup & Configuration > Google > Google reCAPTCHA**.
- If **Google reCAPTCHA v3** credentials have not yet been created, please register your site by visiting [this link](#) and complete the setup process following the instructions:
 - Enter your website URL (e.g., example.com) in the **Label** field.
 - Select "Score based (v3)" as the reCAPTCHA type.
 - Add your website URL (e.g., example.com) under **Domains**.
 - Optionally, add admin emails for managing settings.
 - Accept the reCAPTCHA and Google Cloud Platform Terms of Service.
 - Click **Submit** to generate your API keys

Figure: (89a) Generated Site Key & Secret Key

Google reCAPTCHA settings

- Toggle **Google reCAPTCHA** on to enable control over specific pages (toggle off disables this option).
- Paste the copied site key into the "**SITE KEY**" field.
- Paste the copied secret key into the "**SECRET KEY**" field.
- Set the **Accept V3 Score** threshold (e.g., "More than or equal to 0.5") to determine if a request is likely human (scores range from 0.0 to 1.0).
- Click **Save** to apply the changes.
- To **enable** or **disable** reCAPTCHA for a page, simply click its button. A pop-up will appear asking for confirmation. Just click "**Confirm**" to proceed or "**Cancel**" to dismiss.

The screenshot displays the Google reCAPTCHA configuration interface. On the left, a dark sidebar contains a menu where 'Setup & Configurations' and 'Google reCAPTCHA' are highlighted. The main panel is titled 'Google reCAPTCHA Setting' and features a green toggle switch for enabling the service. Below this are input fields for 'Site KEY' and 'SECRET KEY', and a dropdown menu for 'Accept V3 Score'. A 'Save' button is positioned at the bottom right of this section. To the right of the settings is a box titled 'How to Interpret the reCAPTCHA V3 Scores' which lists six score ranges with their corresponding human/bot likelihoods and recommended actions. At the bottom of the page, a 'Recaptcha Applicable Pages' section contains a grid of toggle switches for various site functions, including Admin Login, Customer Login, Customer Registration, Customer Mail Verification, Seller Login, Seller Registration, Seller Mail Verification, Forget Password, Delivery Boy Login, Contact Us Form, and Affiliate Application Form. A red box highlights the instruction in the interpretation guide: '6. If Google reCAPTCHA v3 credentials have not yet been created, please register your site by visiting this link and complete the setup process.'

95. How to give a review?

Answer:

Follow the below steps:

- Login to the **customer panel** and you will see a **review popup**.
- Click on **Review Your Products** and you will be redirected to the **To Review** Page.
 - The **To Review** section lists all delivered products that have not been reviewed yet.
- Click the **Review** button, a review modal will appear
- Input all the fields and click on **Submit review**.

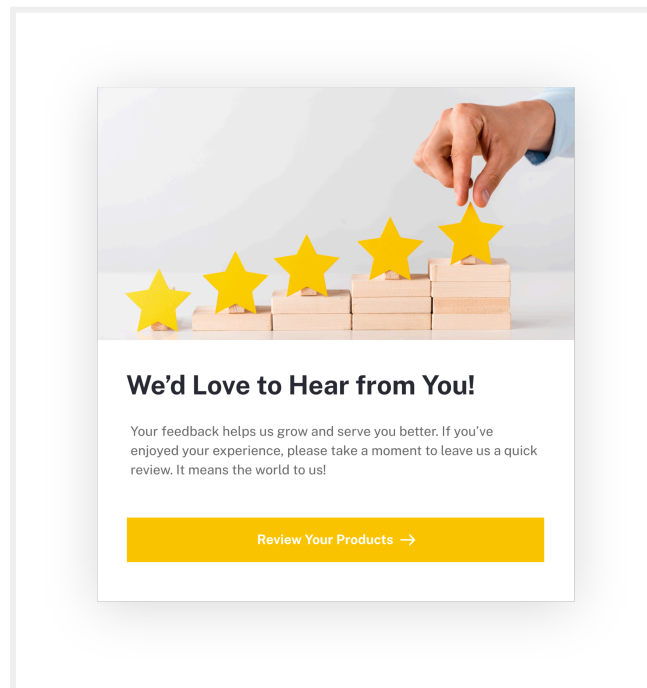

Figure: (90a) Give review from the Dynamic Popup

****N.B.:** The admin must enable the "Product Review" popup from the admin panel and edit the link using the following format: `[your-domain/purchase_history?to_review=1]`

You can submit a Review from **Purchase History** Page:

- Go to **Purchase History** from the left sidebar of **Customer Panel**
- Inside Purchase History, click on the **To Review** status.

- Click the **Review** button, fill in the fields in the modal, and click **Submit Review**.

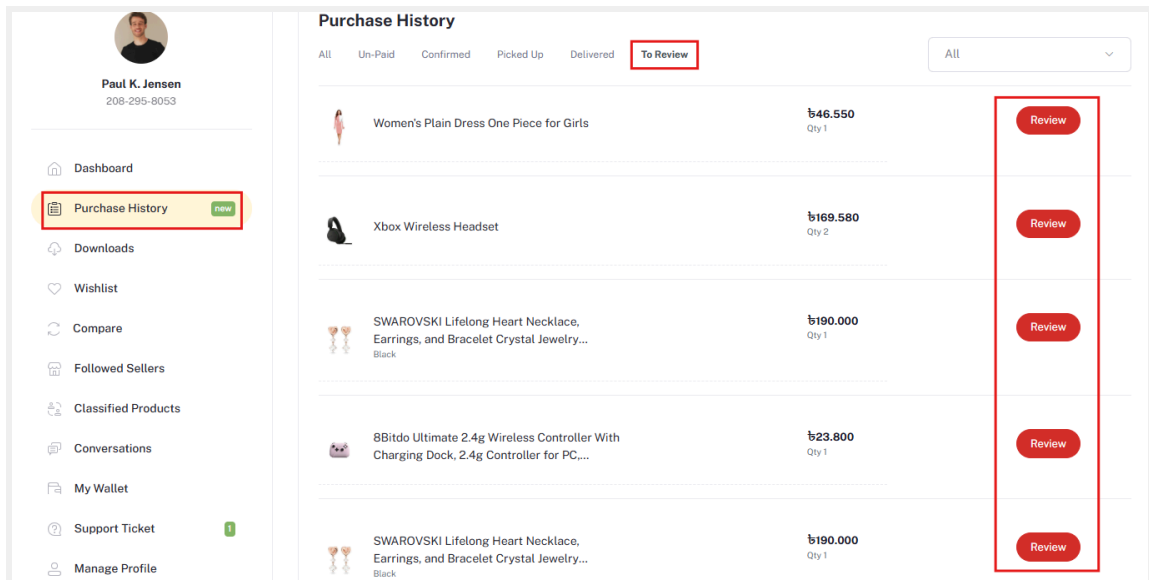

Figure: (90b) All Purchase history

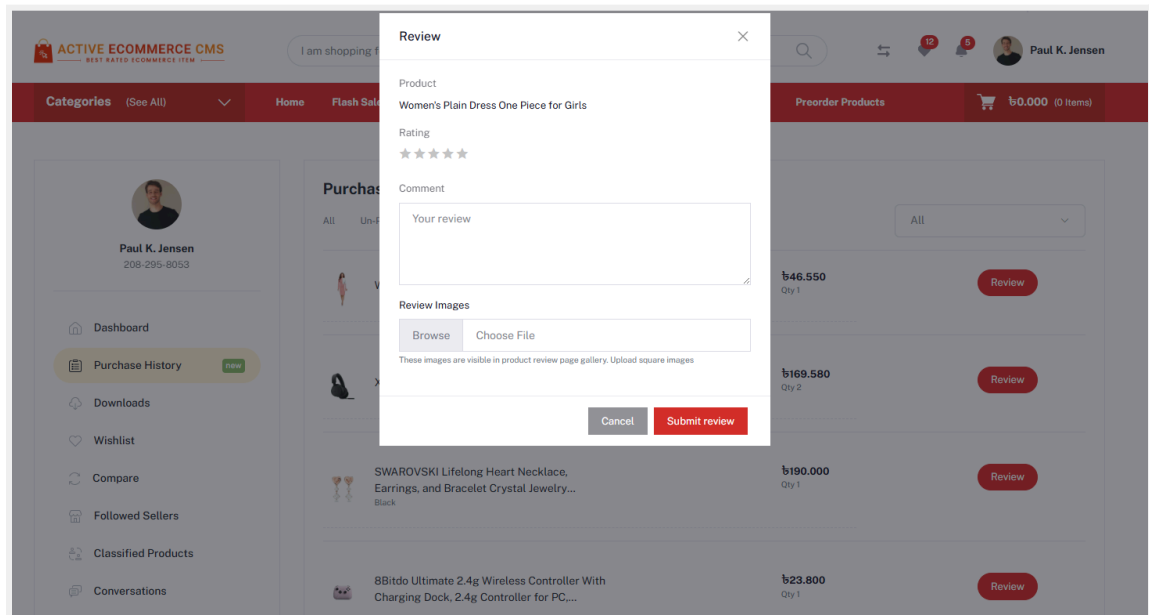

Figure: (90c) Review Modal

You can submit a Review from **Product details** page:

- Navigate to the specific product that has already been **delivered**.

- Scroll down and find the **Reviews & Ratings** field.
- Click on **Rate this Product** option and fill up the rating, comments field and you can also add review images.
- Finally click on the **Submit review**.

Figure: (98a) Size Guide option on the product detail page

104. How to select the Authentication page?

Answer:

Follow the below procedure:

- **Login** to the **admin** panel.
- Go to **Website Setup > Select Authentication Layout**
- Choose any authentication layout, you can view the layout by clicking on the **view** button
- Now click on the **Save** button

Figure: (99a) Select the authentication page

105. How to set up the Authentication page setting for the layouts?

Answer:

Follow the below procedure:

- **Login** to the **admin** panel.
- Go to **Website Setup > Authentication Layout & Settings**
- After choosing any layout admin will find the Authentication page images below
- Admin needs to upload admin login page image, Customer login page image, Customer register page image, Seller login page image, Seller register page image, Delivery boy login page image, forget password image, Password reset page image, phone no verification page image
- Now, click on **Update**

106. How does guest checkout work?

Answer:

Please follow the below procedure:

- First, **activate** the **Guest Checkout** from the **admin** panel

- Go to **Setup & Configurations > Features Activation**
- On this page, enable the **“Guest Checkout Activation”** feature.

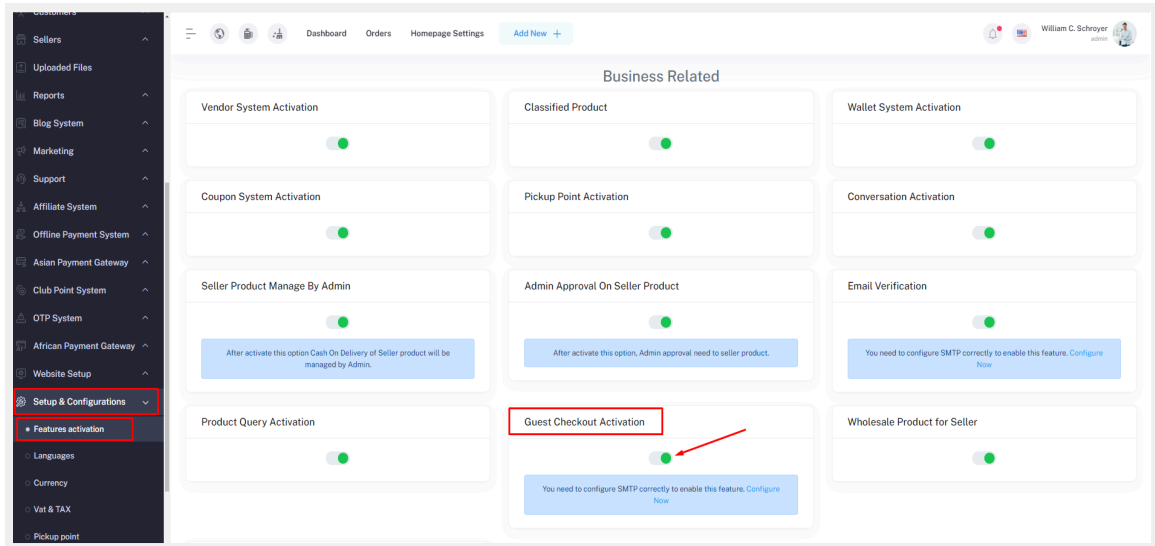

Figure: (101a) Enabling the “Guest Checkout Activation” switch

- Anyone can purchase a product without having an account.
- If customers purchased before using the same email or phone (if OTP add-on is installed), you have to login first to place an order.
- Customers will get an account opening email with an 8-digit auto-generated password that can be used for further login.
- If **email verification is enabled**, customers will also get an email verification email.

****N.B.:** For this guest checkout option, the admin needs to configure SMTP correctly.

107. How do category based discount work?

Answer:

Please follow the below procedure:

- **Log in as an admin**

- Go to **products > Category Wise Discount**
- Set the **discount amount** in percentage and **discount date** range
- Admin can choose the discount for the seller products also. For this **enable** the **seller products** switch.
- Now click on the **Set** button
- The discount is set for the existing products and for the new products this discount will not be counted.

Figure: (102a) Set the Category wise discount on the admin panel

****N.B.: If a seller sets a different discount or date than the admin's settings, the product switch will automatically turn off, and the seller's discount will be applied to that seller's products instead.**

Sellers can also set the category-wise product discount for seller products.

- **Log in as a seller**
- Go to **products > Category Wise Discount**
- Set the **discount amount** in percentage and **discount date** range
- Now click on the **Set** button

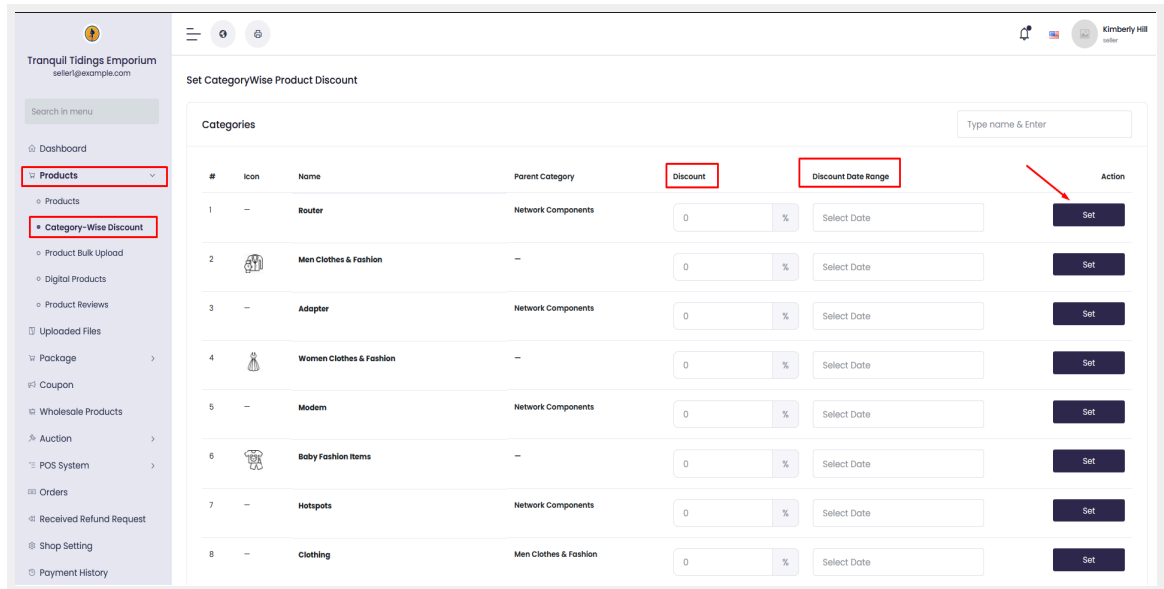

Figure: (102b) Set the Category wise discount on the seller panel

108. How to upload bulk brand/Brand Bulk Import from the admin panel?

Answer:

Follow the below procedure:

- **Log in** as an admin
- Go to the **Products > Brand > Brand Bulk Import**
- Now click on **Download CSV**
- Then edit the excel file and import the excel file by clicking on **Browse**
- Now click on **Upload CSV**

Figure: (103a) Brand bulk Upload

109. How to add Dynamic Pop-up from the admin panel?

Answer:

Please follow the below procedure:

- **Log in as an admin**
- Go to **Marketing > Dynamic Pop-up**
- Now you can **Create New Dynamic Popup**
 - After **clicking Create New Dynamic Popup**, you can see a **form**
 - Here, insert the **title, Summery, image, Button text**, can select **button color**, can choose **button text color**, insert the **link** and click on **Save** button.
 - Beside the form you can find the demo image. This image will show you how the dynamic popup will be presented at the homepage
- You can turn on/off the **status** switch. If the status **switch** is **disabled** for any popup then the popup **will not be shown** on the **homepage**.

- From the list of dynamic popups, the **"Subscribe to Our Newsletter"** and **"Product Review"** popups are **editable** but **cannot be deleted**. For all other popups, you can **edit or delete** them.

****N.B.: The admin must edit the "Product Review" popup link using the following format:**
[your-domain/purchase_history?to_review=1]

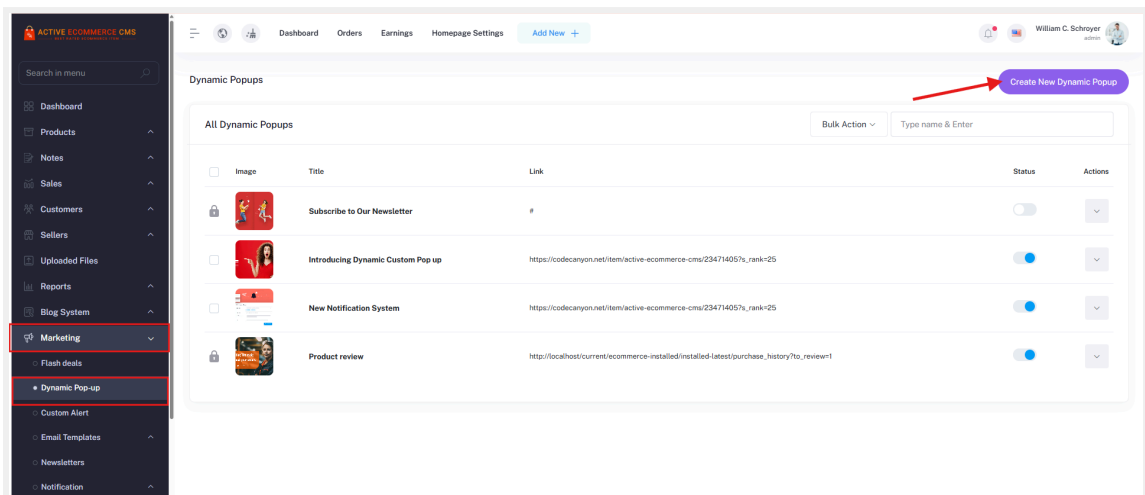

Figure: (104a) List of the Dynamic Popup

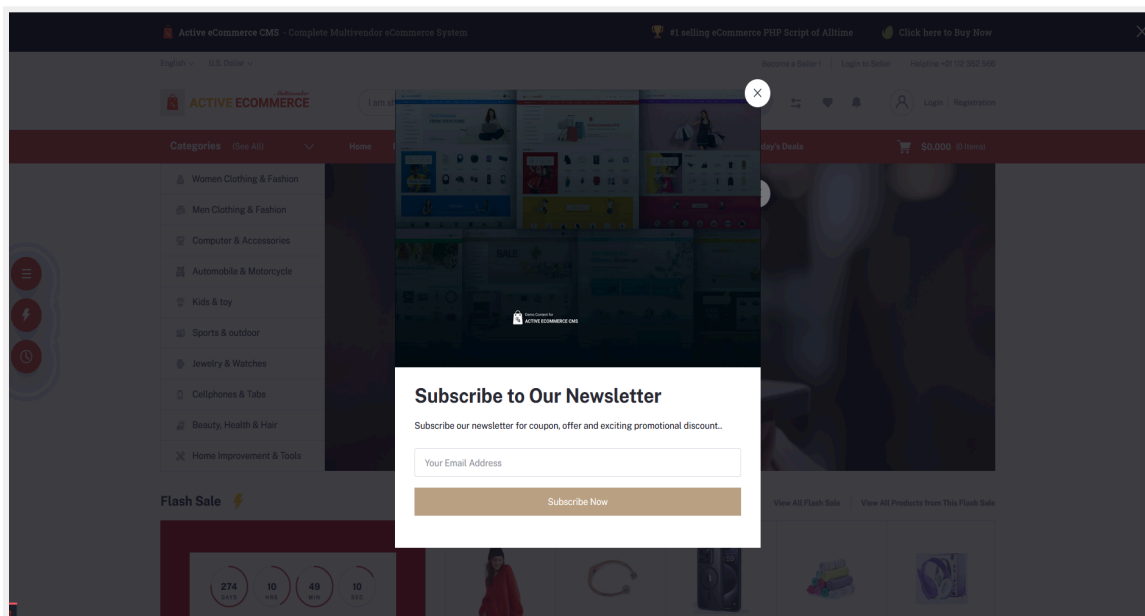

Figure: (104b) Dynamic Popup homepage

110. How to add a custom alert from the admin panel?

Answer:

Please follow the below procedure:

- **Log in as an admin**
- Go to **Marketing > Custom Alert**
- First you have to select the alert location
- You can create a new custom alert, Click on the **Create New Custom Alert**
 - After clicking custom alert you can find a form,
 - Select the **alert size (small, large)**
 - Insert an **image, link, text, Select background color**, choose the **text color**
 - Now Click on **Save**
 - Beside the form you can see the demo design of small alert box and large alert box
- You can on/off the **Trigger** switch. If the status **switch** is disabled for any alert then the alert **will not be shown** on the **homepage**.
- From the list of custom alert, the **first one** is only **editable**, you **can not delete** but for the rest of alerts you can delete.

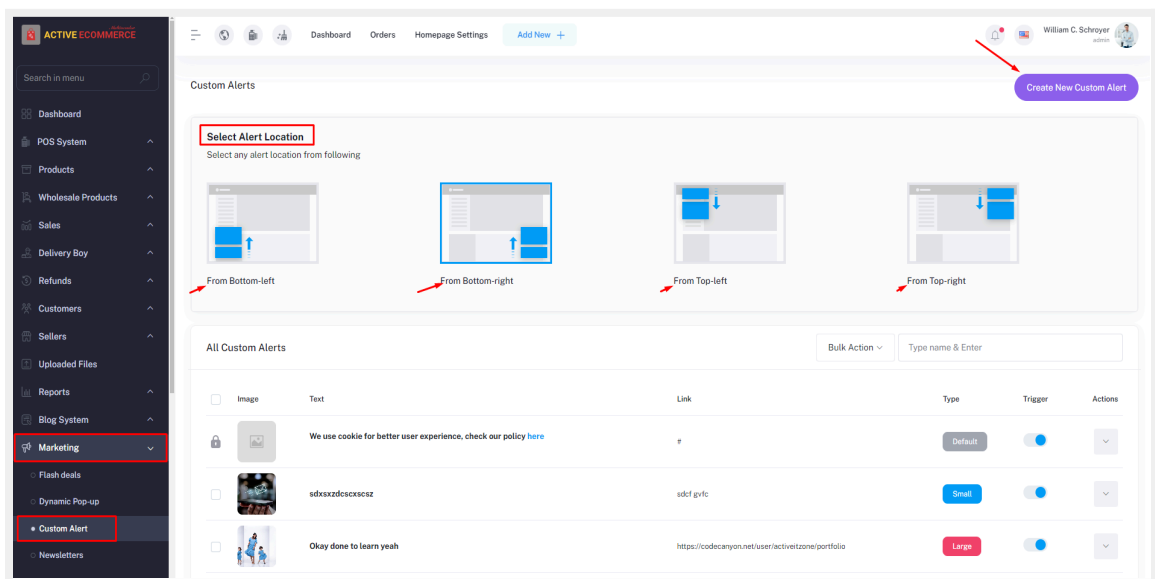

Figure: (105a) Custom Alert listing page

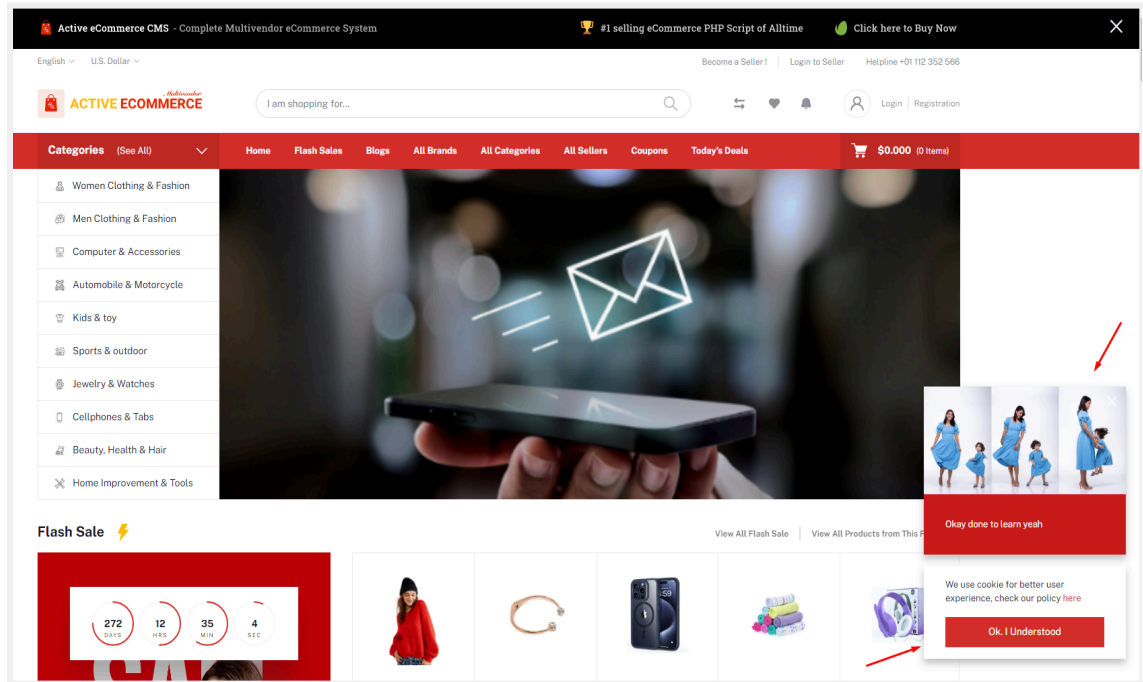

Figure: (105b) Custom Alert homepage

111. How can customers see the last viewed product?

Answer:

Follow the below procedure:

- **Log in as a customer**
- From the very last of the homepage the last viewed product will be shown.
- The products that can be purchased those products will be shown.

Figure: (106a) Last viewed product shown on the homepage

112. How can admin check the total earnings report of the system?

Answer:

Follow the below procedure:

- **Log in** as an admin.
- Go to **Reports > Earning Report**.
- Here, admin & staff (if they have permission) can see full earnings report of the system.
- From the very first portion, admin can see the **all time total sale** amount and **month** wise graph chart, the **total payouts** amount and the **month** wise payout graph, and also the total **category** and **brand** sale amount
- Then admin can see the **net sale report**. In this report chart, the admin can see the total **product sale** (deducting the seller commission & shipping cost), **seller commission** (how much admin earns from the seller product sale), **seller subscription** (earning from the seller package purchase), **customer subscription** (earning from the customer

package purchase), **delivery** (shipping charge), by the week (last 7 days) and month (last 30 days).

The payout netsale report chart is the same as the “**Net Sales**” report. **Seller payout** means how much admin pays to the seller; **product refund** means how much admin pays to the customer for the refund requests, **delivery boy** means how much admin pays to the delivery boy.

- Then the **sales analytics** graph- here admin can see the data **date wise** (running month), **today** (the highlighted chart bar is for today data), **weekly data** (the highlighted chart bar is for last 7 days data), and **monthly data**.

The **payout sale analytics** report chart is the same as the **sale analytics** report.

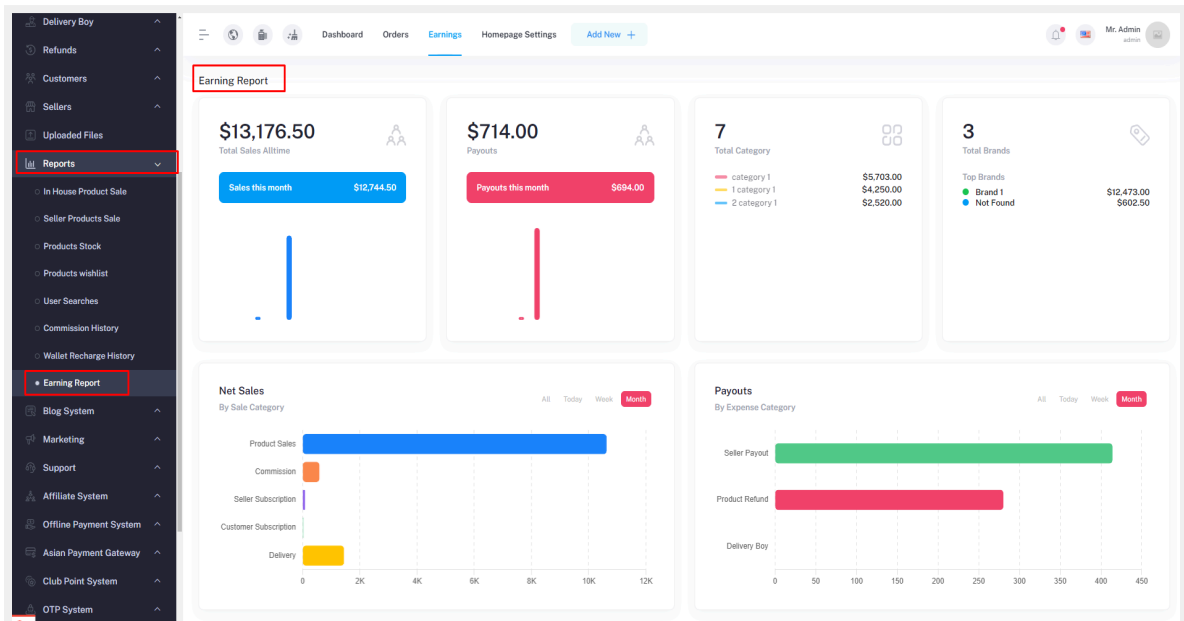

Figure: (107a) Earning report

113. How can the admin change the notification settings?

Answer:

By setting up the procedure admin can choose the design type of notification. Follow the below procedure:

- **Log in** as an **admin**.
- Go to **Notification > Settings**
- Choose any design type and click on **Save**

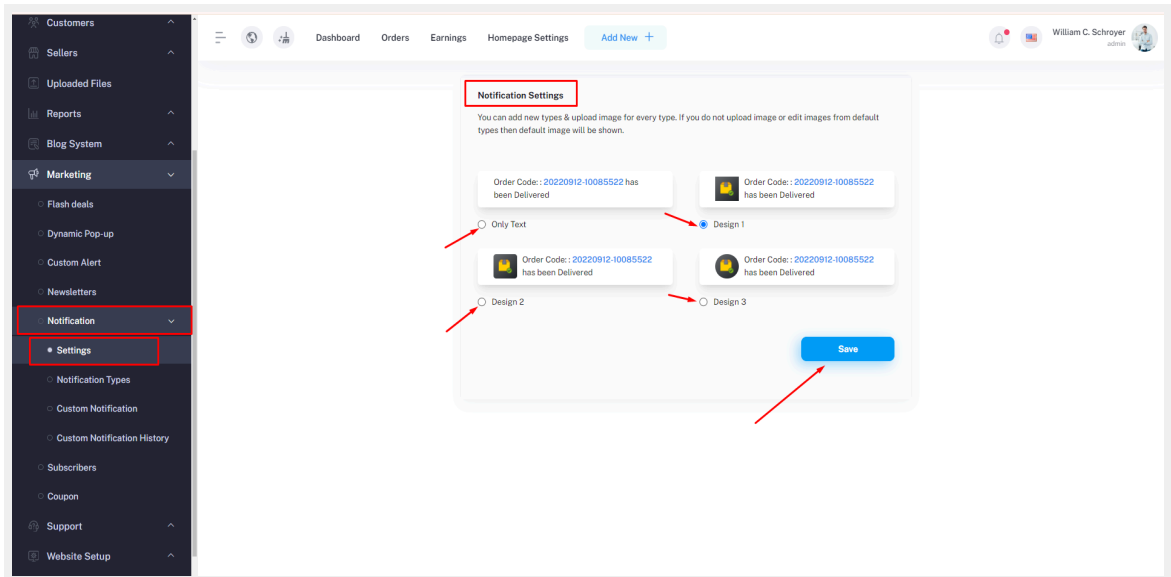

Figure: (108a) Setup the notification setting

114. How can the admin check the notification text?

Answer:

By following the below procedure admin can check the notification text for admin, seller and customer, also can edit the text.

- First, **Log in** as an **admin**.
- Now, go to **Marketing > Notification > Notification Types**
- Here admin can see the notification type of **customer, seller** and **admin**. **Admin** can **add a new notification type** for only **customers**.
 - For adding a new notification type fill up the add new notification type form. Insert all the information and click on **Save** (This notification type will be shown at the custom notification adding form)
- In this page admin can **edit** the **Default text** by clicking on the **edit** button. Admin can also translate the Default text

- Admin can **Enable/Disable** the **Status** switch. If enable the switch then the notification will go to the customer/seller/admin
- Default notification type can be deleted

Figure: (109a) Notification type add and edit the default text

115. How can the admin send any notification to any customer?

Answer:

By following the below procedure admin can send a custom notification to any customer.

- **Log in as an admin**
- Go to **Marketing > Notification > Custom Notification**
- Here admin can see a form, admin can **choose** any **customer**
- Can **Select** the **notification type**
- When admin select type the **type's default text** will be **shown** at the **content box** which in **non editable**
- Admin can **insert** any **link**
- Now click on the **Send Notification** button

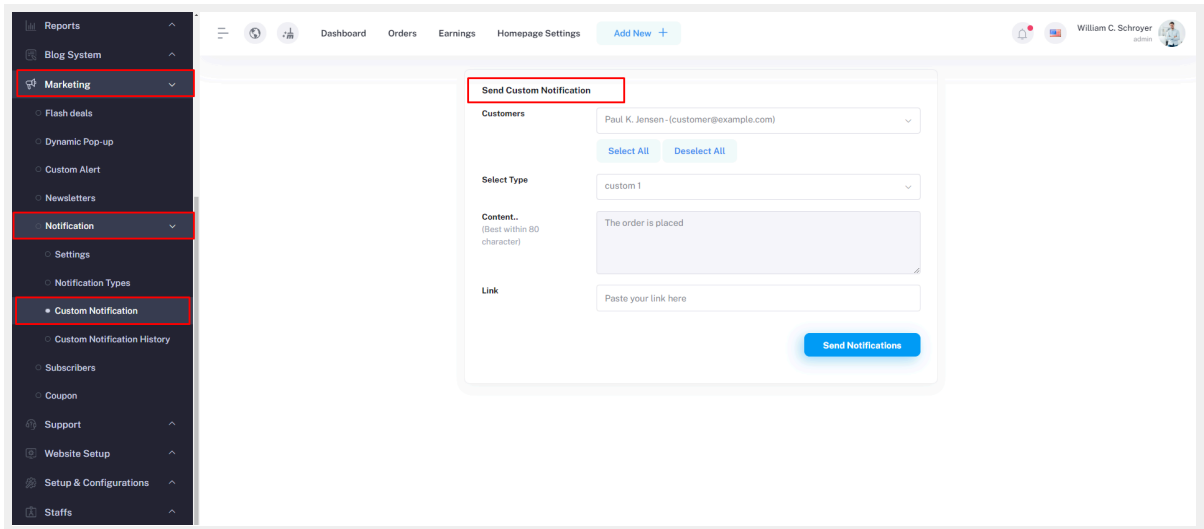

Figure: (110a) Send custom Notification to customer

116. How can the admin see the custom notification history?

Answer:

- **Log in as an admin**
- Go to **Marketing > Notification > Custom Notification History**
- Here the admin can see all the **custom notifications** with the **customer details** information and can **delete** also.

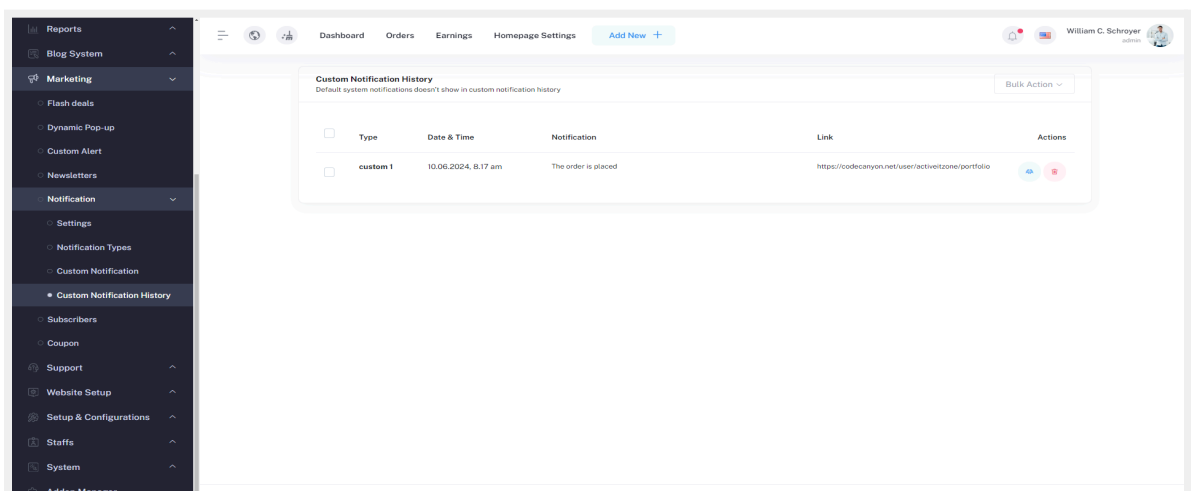

Figure: (111a) Custom Notification history

117. How can the admin set the contact us form and send the quires reply?

Answer:

- **Log in as an admin**
- Go to **Website Setup > Pages**, Now click on the **edit** action of **contact us**
- Here admin can set the contact us information

Figure: (112a) Adding the contact us form

- By going to the **url** of **contact us** anyone can send the **query** to the **admin**

118. How to manage Email Templates?

Answer:

- **Log in as an admin.**
- Go to **Marketing > Email Templates**. Here you can see the submenu of email templates depending on the email receiver user type.
- Then click on any submenu; you can see the list of email templates.
- Click on the **edit** button to edit email subject and default email content. (NB : Do Not Change The Variables Like [[____]])
- Here some email templates are not **editable**. For example, order placement email content is not editable.
- You can select from this list whether the mail will be sent or not in any action by enabling and disabling the status.
- Here some of the email sending status cannot be **disabled**. Like customer registration, add seller registration by admin. Because when admin registers the customer and seller, an email is sent with their password and other information. They can login to their account with this password.

Figure: (113a) Email template

119. How to add custom reviews from admin?

Answer:

- **Log in as an admin.**
- Go to Products > Product Reviews
- Here admin can see all the reviews and also can add review for any inhouse products
 - Click on **Add Custom Reviews**
 - Insert the **Custom Reviewer name, image, Select the Product category, select the product**
 - Insert **rating, date** (today's date by select system date or can select any date), insert the **comment** and add any **review image**.

120. How to add custom followers from admin?

Answer:

- **Log in as an admin.**
- Go to **Sellers > Seller Rating and Followers**
- Here admin can add custom followers quantity, click on **Edit Custom Follower**

Figure: (115a) add the custom followers

121. How to Manage and Configure Sitemaps?

Answer:

To generate a sitemap in **Active eCommerce CMS**, follow these steps:

- **Log in as an admin.**
- Go to **Sitemap Generator**
- **Generate and Download the Sitemap**
Click the **Generate and Download** button.
 - The system will begin generating the **sitemap.xml** file.
 - Depending on the number of pages on your site, this may take a few seconds.
 - Once generated, the file will be automatically downloaded in your browser.

Figure: (116a) Sitemap Generator

- **Refresh the page** to View the Sitemap
After the download is complete, **refresh the page**.
 - You will now see the generated sitemap listed in a table with details including the **Sitemap URL**.
- **File Storage**
All generated sitemaps are stored on the server and will remain available until manually deleted.
- **Managing Individual Files**
 - **Download:** Click the **Download** button in the **Actions** column to download the sitemap file again.
 - **Delete:** Click the **Delete** button to permanently remove the sitemap file from the server.

Submitting Sitemap to Google Search Console

To help search engines discover your content, follow these steps to submit your sitemap to **Google Search Console**:

- **Login to Google Search Console**
Visit <https://search.google.com> and log in with your Google account.
- **Add Your Website as a Property**
Choose between **Domain** or **URL Prefix** method (e.g., <https://www.example.com>) and add your website.
- **Verify Site Ownership**
Follow Google's instructions to verify ownership of your domain.
- **Submit Your Sitemap**
 - In the left sidebar, click on **Sitemaps**.
 - In the **Add a new sitemap** field, paste the **Sitemap URL** you copied from your admin panel.
 - Click **Submit**.

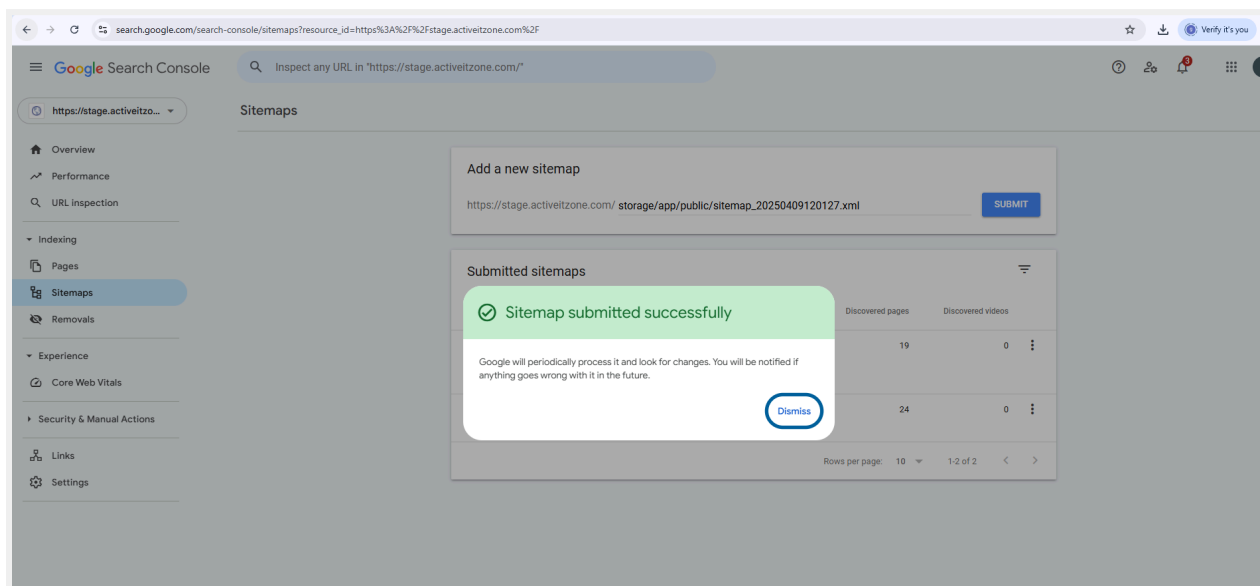

Figure: (116b) Sitemap Upload in Google Console

- **Monitor Sitemap Status**

Once submitted, Google will display the status and statistics of your sitemap submissions for review and monitoring.

Figure: (116c) Successfully Uploaded
